

Coronavirus: "CAGED"

(Made by KF Brazil)

Have you noticed that some of the new cases of Coronavirus in the USA have occurred in nursing homes. Isn't that a kind of "cage" for old people, who used to age at home with their families.

If you read, the "Summary Extract for Doctors Part 1 of the 312 KSW",

Link:

<https://www.facebook.com/notes/keshe-foundation-english-kfssi-official/coronavirus-summary-for-doctors-series-part-1/1904056786395949/>

it says that the scientists think that when wild animals are caged they can create viruses.

From the same summary Mr. Keshe taught,

'So even if we come in touch with the virus, if the amino acid (AA) in our nose or in our lungs are not of the matching plasma field strength to the virus, then we don't catch it. This means that this condition creates a specific matching strength that locks into our AA, and when the strength of the emotion of the animal, matches the strength and the emotion of the man, the virus transfers.'

With great sadness I think about the tragedy that is happening to the Chinese people during this epidemic. Are they not being "caged", or quarantined? When I think about

the horrible way some humans treat animals, it brings to mind what Mr. Keshe told in a previous teaching, that they had been told of some instances in China, that when one person in a family would get the virus, then they would bolt the door of the families home, so no one could get out.
