

Elevation of the Soul in Terms of the Enhancement Unit - Deep Explanation

Excerpt from 353 KSW starting at time 2:43 hours. Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

Summary:

Mr. Keshe was asked by a Knowledge Seeker what is meant by elevation of the soul, how do we do it with the help of the Enhancement Units (EU), and how do we explain it to convince others. First he asked her, "what do you mean?", and then went on to ask her, that to start with, what she understands about her own soul. She gave a nice answer, to be in connection with the Mother, the Source, etc. And then he asked, what is the function and purpose of your soul. She answered essentially to receive all the information from this source and be guided by it and wants to be moral and good. Finally, he asked, how do you recognize your soul and how do you see its existence. This time she went more into her own experiences, but basically she can feel it and listens to her intuition, but ended with, "I don't know if I am correct, maybe I am crazy,"

From here Mr. Keshe went on with a beautiful teaching going subtly deeper into what is the soul and how it functions. The more one ponders it, the deeper it goes.

The soul in essence is the creator of our creation - our physicality. We always considered that our soul was not a part of us, but now we know that it is inside of us, within us, and that our physicality is made around it. When we look at celestial bodies, that center (or soul), is in the middle of the star or the planet, (and the matter state is formed around it). It is the same with us as a human being, or with a tree, or whatever. (Only) we have not just curled up to be that (shape), (instead) we have decided to take a different position. And because we are near another stronger satellite like Earth, the distance of the strength of our soul in respect to the Earth's central MG field force, and its matter state Inertia, it has decided to find (its own) position. When it finds its position and has made its structure, so that it can integrally hold on to its physicality, then we can move it anywhere.

We can be in the womb of the mother on the ground floor or the 10th, it doesn't make any difference, because in that position, we have accepted by genetic, or by collection of fields, that we take this shape and this position. Now that we have taken shape, we are independent, but we still compromise with the field strength of the position we are in. For example, on earth we are 50 kg, but on the Moon we are only 30 kg, but in essence, our total mass may be only 10 kg (note: I think this 10 kg is the soul's essence which is always the same ??). It doesn't matter where we are, but we find a place in respect to our position.

So the soul is independent, once it has created its size, and the representation of its physicality around itself. What the soul (of the Earth) creates around itself we call it the Earth. And what the soul of the man creates around itself we call the body of the man. So that's the soul.

We have to understand, that in a way, we can cut into certain depths of the soul's strength. It's like digging into the Earth, when we only had a spade and a hammer we could only go a few meters down. When we got educated, and we understood with the use of tools, that we could drill deeper and go closer to the soul of the system.

It's the same way for mankind, up to now we only had the spade and hammer to dig into the surface of our physicality, to have contact with our soul. Now with the teaching we can go deeper. How deep can you drill? The more you understand of a higher order structure, or a higher order strength, the deeper you can drill. On the surface you have the soil and the dust, but in the center you get to the gold, you get to the magma, you get to the plasma, and that's all it is. Then you understand more about what is hidden in the Earth, when you dig more. We are doing the same with the teaching. We teach you more about what is hidden inside, but it is for you to understand what you can do with what is inside. When we reach gold, what do you do with the gold, or platinum, or other materials.

So in a way, you call it a digging in the shape of man, understanding of the man, we call it elevation, understanding more, going deeper in the structure of the soul. Up to now we

have only been in touch with the surface of it, the physical emotion, eating, but now we go deeper in the soul. This is when you get more, then you find a way to melt the gold. You increase your knowledge, because up to now it was just something laying around, a piece of metal, but now you increase your knowledge about how to melt it, to shape it, and to present it.

This is the Soul of the Man (STM), and the more you understand the deeper you go. You get to more precious materials, which man hasn't yet got to know. Now with digging deeper, if we can go below 100 meters, or 10 or 100 km, then we find more materials, more rare earth, which to us, it's rare, but to the center it's very common. On the surface it doesn't exist, or very little of it. This is what we, as geologists see. The deeper we go in the oceans we find animals which can't exist on the surface. As we said in a previous teaching, according to man's scientific data, there are places in the ocean so deep that nothing could exist, and yet we see it there existing, in the extreme depths and high temperatures.

So what is the meaning of enlightenment, or elevating the soul? It means to understand more of what is there, and when you have that knowledge, how you access it and are able to use it.

It's not that, how to access it, it's to understand more of it.

When you can really go to the depth of it, to the center of the planet, or whatever we call it. When you reach the lessons of the level of the Creator, because again it is of one essence. So when you speak about elevating the soul. It's how much have you dug into it, to understand more about its construction, more about its interaction.

After this beautiful teaching the KS said it was clear to her, but how can we explain it to other people to convince them that this EU can help them.

The thing is that in these EU, we have done the digging into them and have gone further in the strength, so that you don't need to. It's like when you want to have a gold ring, you don't need to go and get a gold mine to dig it out, instead you go to a jewelry shop and it's there on the table, because somebody else dug it out.

To elevate the STM, we have done that. The combination in the system carries in the essence, the totality of the essence of the creation. So it is there.

Those who cannot make (it themselves), can be helped to be, to reach. You buy the ring, and you wear it. You are given the knowledge, and you carry the knowledge in the essence of the elevation of the soul. As simple as that!

The KS said, so you make a parallel between the gold, which is like the soul. We can see gold because of physicality, but we can't see the soul because it's another nature of ..

K- It's another field strength. If you go to the strength of it (the soul), and you want to manifest an apple in front of you, you know the strength that you have (with you). At this point it can be manifested as an apple, one that you like the taste and color of, and what to you is an apple, then because you put into it the emotion and the presence of it, you

create the apple. It's because you already have a reference point of the apple, which you need in order to manifest it.

We've already shown this in the past, where you put the orange on top of the cup filled with water, and having Gans's around it. Then by drinking the water we got the texture, taste, energy, and emotion of the orange in the water. But is it because we saw the orange that we got the taste, or if we give this cup of water to somebody on the street, would they tell us, "oh, this tastes like orange." You understand. So in essence, it's like what somebody said, when you buy a mobile phone, you don't need to know how it works, or how it is put together. It's such that, we cannot teach the man one by one, so we elevate the soul of the totality in that level, then everyone will understand

English Transcription:

Q: What is meant by elevation of the soul, how do we do it with the help of these EU?

K- What you mean by that?

Q: Nice to meet you again. I am a little bit confused about what you mean by elevation of the soul? (2:44). I would like to hear from you if it is possible an explanation of meaning this elevation of the soul and to do it with help of this EU, Because I would like to explain to other people, but if I don't understand, you understand?

K- Yeah, but what do you understand about your soul to start with?

Q: ... I mean that my knowledge and feeling. To elevate the soul, to be in connection with the Mother, Creator Mother, and to have all these attributes of the Divine.

K- Yes, but what do you understand, that's what I said before, what do you understand about your soul? **What is the function and purpose of your soul?**

Q: This is my purpose my soul, to be connected with the Source and receive all the information's from this Source. Because I know this consciousness, this Source is always good. I don't want to do wrong things, and I will be guided by my soul, which is in connection with this Soul, it is like a guide for me. I want to be moral, to be good and think good, for me and humanity. (2:46).

K- yeah, but I still have a question, **how do you recognize your soul?** If you understand it, and how do you see its existence if I can put it that way?

Q: I can see, I can feel it. I have a feeling, an intuition. Like intuition, always I listen to my intuition, and through meditation, and sometimes I have feelings, sometimes flashes, and always when I start to sleep to talk, sometimes I go in "delta", and I go out from my body and I travel. Always when I start to sleep in the night I just go and out of body and I see many things, and this is the answer of my question. And I am sure this is the answer of my soul, the soul guides me and help me to find the answer. I don't know if I am correct, maybe I am crazy, but you asked me and I answered to you, at my level and of understand.

K- Okay if you look at the way we try to understand, (2:48). is that, the soul is where our physicality in essence, is the creator of our creation. We see the soul, as we always considered to not be part of us. It's something outside, but now we know it's inside within

us, because our physicality is made around it. In a celestial bodies, that center is in the middle of the star, is in the middle of the planet. With us, as a human being, a tree or whatever, we have not curled up to be that, we have decided to take a different position, but because we are near another stronger satellite like Earth, the distance of the strength of our soul in respect to the Earth's central MG field force, and its matter state Inertia, has decided to find a position, that, that position, it can integrally hold on to physicality, so we can move it anywhere, once it made its structure. We can be in the womb of the mother on the 10th floor, or the ground, it doesn't make any difference, because in that position we have accepted by genetic, or by collection of fields, that we take this shape, this position. In so many ways, now we have taken shape, we are independent, but we still compromise with the field strength of the position we are in. On earth we are 50 kg on Moon we are 30 kg, but that is in essence, (2:50). the total mass of us, maybe it's 10 kg, doesn't matter wherever we are, but in respect to the position we find a place. So the soul is independent. Once it's created, the size, the representation of the physicality created around itself. The soul what it creates around, we call it a Earth. The soul the man created we call the body of the man. So that's the soul.

But we have to understand, in a way, we can cut into certain, depth of its strength. When we didn't have the material, we could dig with a spade and a hammer, we couldn't go more than a few meters down. We got educated, we understood the use of tools, now we drill deeper, we go closer to the soul of the system. It's the same way, now mankind, up to now used to dig with spade and hammer on the surface of his physicality in contact with his soul. Now with the teaching we go deeper. How deeper can you drill, or go to a higher strength, the more you understand of a higher order structure, on the surface you have a soil and dust, in the center you get to gold, you get to magma, you ?? find to plasma, and that's all it is. Then you understand more what is hidden in the Earth, when you dig more. And with teaching we are doing the same. We teach you more what is hidden inside, and it is for you to understand, what you can do with what is inside. We reach gold, what do you do with the gold. You reach platinum, you reach other materials. (2:52). So in a way you call it a digging in the shape of man, understanding of the man, we call it elevation, understanding more, going deeper in the structure of the soul. Then up to now we have been in touch with the surface of it, physical emotion, eating, now we go deeper in the soul. This is when you get more, then you find a way to melt the gold, you increase your knowledge, because up to now it was just something, piece of metal, now you increase knowledge how to melt it, shape it, present it. And that is the STM, it's how the more you understand the deeper you go. You get to more precious materials which man hasn't got to know. Now with digging deeper, if we can go below 100 meters, or 10 or 100 km, then we find more materials, more rare Earth, to us it's rare, but to the center it's very common. On the surface it doesn't exist, very little of it. This is what as a geologists we see, the deeper we go, the deeper we go in the oceans we find animals which can't exist on the surface, but according to our data, (deep in the ocean) is a place nothing could exist. But we see it still exists, in the depths of oceans, high temperatures, as we said before.

So enlightened, or elevating the soul, it means to understand more of what is there, and when you have the knowledge how to access it. How to be able to use it. And this is what

has come, this is what it is. (2:54). It's not that, how to access it, it's to understand more of it. When you can go really to the depth of it, to the center of the planet, or whatever, we call it when you reach the lessons of the level of the Creator, because again it is of one essence. So when you speak about elevating the soul. It's how much have you dug into it, to understand more about its construction, more about its interaction.

Q: Yes, it's clear, but this EU (units), how can help the people. .. How can I explain to people and convince them that this EU can help them?

K- ... The thing is that in these EU, we have dug into, we have gone further in the strength, that you don't need to dig. To have a gold ring you don't need to get a mine, and go and dig a mine, to get to the gold and bring it. You go to a jewelry shop and it's there on the table, because somebody else has done that. To elevate the STM, we have done that. The system combination carries in the essence, the totality of the essence of the creation, so it is there. Those who cannot make they can be helped to be, to reach. You buy the ring, you wear the ring, you're given the knowledge, you carry the knowledge, in the essence of the elevation of the soul. As simple as that.

Q: So you make a parallel between the gold which is like the soul, (2:56). and we can see gold because of physicality, but we can't see the soul because it's another nature of ..

K- It's another field strength. If you go to the strength of it and you want to manifest an apple in front of you, you know the strength that you have, at this point can become to manifest it as apple, you like the taste, the color of it, to you is an apple, then because you put the emotion and the presence of it, you create the apple. Because we already have a reference point of the apple which we need. We've shown that with the orange, we put the texture of the orange out, and we taste it, the taste of the orange, the energy of the orange, and the emotion of orange by drinking the water. Is it because we saw the orange, or if we just give this cup of water to somebody on the street and they tell us, "oh, this tastes like orange." You understand. So in essence, as somebody said, as you buy a mobile phone, you don't need to know how it works, how it's put together. So as we cannot teach the man one by one, we elevate the soul of the totality in that level, that they all understand.
