

Pain Pen Teaching Part 2

Chronic Inflammation and Pain

Start of New Teachings on Field Transfer

Excerpt from 2021 03 26 Portuguese Brazil Teaching, Mr. Keshe starts at around 2:08 minutes. Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

Summary:

On the Friday night Brazilian public teaching in Portuguese, Mr. Keshe made a surprise appearance and gave a very powerful teaching deepening the knowledge of plasma by answering follow-up questions about the new Pain Pen. At the same time he opened the door to new technologies and new knowledge to humanity. As he said, after March 21st we start transferring knowledge to humanity that will open up a new dimension. The process has been started here in the Brazil teaching.

Before answering questions he made some important statements about Brazil's position in KF. He began, good evening, it is nice to see how Brazil is leading from the front, the KF movement in South America. What we really need to do now as the structures take place around the world with the KF, is not to lose sight of our purpose, of what you call, technology (T) in exchange for world peace. In the coming weeks our real work starts in that direction. The KF television is a main source for structuring everything the right way for international presentation. My target for Brazil is to open the first factory in the next 6 months.

In that process, we'll continue the work we began a year and a half ago, but was stopped by Corona. This year we'll start making efforts to consolidate Brazil in a bigger way directly from inside. We see Brazil as a big player in our space T, and we'll come back to you with a lot of support. Are there any questions?

Teaching on Pain Pen through Follow-up Questions

Thank you Mr. Keshe for your love and care in answering our questions on the Pain Pen (2021 02 26 Teaching). Such deep and clear answers gives rise to more questions. If you permit we would like to ask some follow up questions on the Pain Pen to further be able to share the knowledge.

Inflammation is like Cancer but in Liquid

Q1: After looking at histology images comparing acute inflammation tissue with chronic inflammation, there appears to be a larger gap between the cells in the chronic inflammation. My understanding is that this gap is filled with interstitial fluid. From Plasma point of view, is this fluid the Gans, that the new Inflammation Pen will transform back into normal Lymph through discharging the higher M fields, and thus return the tissue back to its non-pain condition? How does it work?

K- Understanding of the T is very simple. You have to understand that there is a difference between the pain and inflammation. In a way, inflammation is like a cancer, but in the inflammation process we don't get the solid state, or the more dense formations like in a cancer. Instead, we get liquid. In inflammation the cells expand with liquid, which also leads to creation of pain.

Over years of research in the KF we have learned that we cannot just treat inflammation without treating the pain, while at the same time to understand the pain, we have to understand the inflammation position, and the expansion of the cell. The expansion of the cell, or the liquid within the cell comes from extension of the G field within the liquid.

With the new Pain Pan (Pain Pen Enhanced Version 2021- KF Store) we especially need to understand this principle, which is the connection between the inflammation and the pain, and the emotional condition between them. In inflammation, there is an energy that comes as a pain towards it, even if you don't see the inflammation it still causes expansion of the cell and local pain, or what we call energy transfer "for what it comes." We stand a very good chance to empty it, like the way we emptied it in the cancer cell. By taking the energy from it, and diluting the fields within it, then you can very easily transfer the energy, and return the cell back to its normal size.

It's taken years and years of work to be able to understand the connection between the inflammation and the pain. Now we released the new Pain Pen last week, and I saw them starting to ship them out of the lab today. First, it's understanding this process, and secondly, being able to spread the fields. We've developed a new technology that we can spread the fields wide open. In the current Pain Pen we only work with the tip, but now

with the newly designed structure we cover the whole arm. It's not anymore one point. But we usually tell people to use two Pens, with one on the other side. In this new design we expanded the fields of the Pen, so it's not only the tip anymore. The tip is a point of reference, but now we work round about 5 to 10 cm from the point. The whole area gets effected, and that's why the new Pen has become so effective. The inflammation covers a much larger area, whereas, the pain is usually localized.

We use this technology in many ways, and in the new space systems too. You have to also understand the knowledge of the plasma when you speak about inflammation, which is the concentration of liquid and stuff, whereas a tumor is a more solid dense material, but we treat them both the same way. The new systems are much more powerful and can handle the pain and inflammation by covering a huge area. It's not anymore just one pinpoint, now we cover the whole condition from one to another. We advise you to use 2 Pens opposite to each other, so that it creates a condition of the circulation of the fields. That way it is very effective.

This is an advancement in technology and it works extremely effective. When you deal with inflammation you need to be in comparison with a much bigger area, than when you deal with the pain. Let me explain how it works. The whole body is made of liquid, but now (the area of inflammation) it's a concentration of (the inflammation liquids), then you have to devise a system, which interacts with (only) that position, and not the whole (body), so that it can bring balance. It's a beautiful understanding and it works perfectly in the lab, and we have tested on patients. We don't stop the development of the T, and now we go more into details and create specialized systems that can deliver. The new Inflammation Pen is one of these innovations of the KF.

Maybe what we will see in the next stages of future development is to add to it what we call, transfer of energy, and to understand what this energy was and is. In pain, for example, we want to understand the reason for it, and where we can transfer this energy. It's the part of the T we are now working on called, transfer of information or communication. It will be tested this Monday or Tuesday in the lab. It's where we transfer the energy as information. We understand it in different ways, what that information is, and what has to be done.

We are now heading in the direction where we can communicate with the body to understand the reason for the inflammation or the pain. With the release of new knowledge a lot will open up in the world of communication in the KF and beyond. Now, in a very simple way, we can communicate or transfer energy to another point hundreds of thousands of kilometers away. It sounds a bit complicated, but actually it's a very easy process. Many KF research projects are going on together at the same time. We will release communication lines where you can connect a specific line to your phone, that will allow you to be reached by anybody, anywhere in the Universe. This is now in our hands, but it was developed years ago, as I said, we are moving in a new direction where the T is now coming forward for commercialization. One of the aspects will be this Transfer of Energy.

In the case of inflammation the body uses a lot of energy to create it, and that's a huge amount of fields that can be used outside the body. You can transfer the energy of the pain (and the inflammation,) into useful energy outside the body to do a lot of good things, and it brings a lot of understanding.

This week we tested this new material and this new technology of energy transfer with one of the Knowledge Seekers (KS). We wanted to see what happens if you keep the body in the same position and same condition. For example, if you have a pain in your arm and you use the technology to release it, the pain is still there, but later when you get up and start moving around it disappears. The energy gets transferred right across the body. Or when they use this as a drop liquid, you don't feel the change right away, but when you rest or sleep and then you get up, the body is totally different. There is no more pain, but then you feel so fresh. It's like you just woke up in the morning and you have a whole day ahead of you. This means that a lot of energy was added to the body during the process of trying to reduce the headache, or it could be a pain and inflammation. We were discussing this in the lab, because we tested it this week and now we know exactly how it works. We can even transfer this energy somewhere else, because it's the same energy as the thoughts. Through the understanding of the technology you can produce a lot.

Another example of this new T that is now in its testing phase in the lab, is that you can walk in the snow and ice, or you can even live in the ice, but you won't feel the pain of the cold. It's going to be released soon. Nowadays we transfer energy by burning fuel to heat ourselves up, but with the new T, you can just wear light clothes like a simple glove or hat, something thin on the skin of the body, and then we can transfer energy from anywhere on the planet, or anywhere else, so that you won't feel the cold. You don't feel the pain of the cold and the body starts living and behaving normally.

We can transfer the energy of let's say inflammation into the body that it warms the body up. It heats the body up so that it can stand the cold outside. Instead of you having to wear warm clothing's and gloves, with the new T, you allow the transfer of energy without interfering with anything else, then you don't feel the cold from outside. It creates a new layer of protection without clothing, or without burning any fuel. We have been testing this for a few weeks now and we know it's correct. You will see a new evolution in science and T, with new materials that are more or less the same as the inflammation.

This new T will change a lot of things once it is fully used. For example, you can go into space without any special clothing, because we can create a condition to change the environment, or absorb the fields from the environment and use that energy to heat the body. We just create like a shell over the body, then you don't need to wear protective clothing. You can also go into the deeper part of the oceans without any special clothing or protection, because now we can produce that in the skin of the man itself.

It's a very interesting development and gradually we start explaining it in more detail. The background behind it was the Pain Pen, and the new Pain Pen for inflammation, which has just been released. So we are on the way to learning how to protect ourselves

from cold, heat, or whatever , and by using the energy fields of the environment around us, and not by clothing. It's a very interesting T which is appearing at the moment.

This is what we were explaining a few weeks ago about people who have been paralyzed for years, and then by using the technology, suddenly they start walking without any pain. Now we understand the T and we use it in a very effective way to create (new) conditions by transferring energies. By doing it this way we don't need any outside involvement from medicines or injections, nor do we need years of suffering. We simply transfer the energy from the pain and inflammation to the body itself. It's a very interesting development. We can even transfer your fear into energy, and deposit it to the body. It opens a new dimension in health and in traveling into deep space, where you can get out of the system and walk into the free space without any needs, where you can absorb the energy for your living and warmth through the new transaction or transition of what we call performance.

There is no need for clothing since we can't take it with us anyway, but you still keep the body warm if it is in the matter state. But the interesting part is that you have to allow the energy to be balanced in the body. If you move the body, the body physically feels the change, but you haven't done anything. You did it just by absorbing plasmas. Any other questions?

Q2: You said not to fit the plasma knowledge back into matter state to understand it. What about going the other way, using Plasma science to explain how matter state works. For example, when we take an anti-inflammatory chemical like Ibuprofen, it appears to work? First, we know it becomes a Gas in the stomach, and then what happens? Does the plasmatic field strength of the Ibuprofen transfer into the lymph as "plasmatic Ibuprofen?" And then travel around the body until it finds a matching field strength, what we call, the inflamed tissue? Or does the Ibuprofen just become part of the Lymph "soup".

It becomes part of the lymph soup. When it is needed it will change to (the matter state).

The difference is, that in the understanding of the new T, it is not in just one place, but rather it is available across the entire body. This is what we couldn't understand before, how when we take a tablet it goes to the head, or to the leg where the pain is. In the new understanding, because it's plasmatic it goes right across the whole body, then it doesn't matter where the pain is, it'll take it for its use. It's not that it only goes to the leg, if you also have a headache, it's available to go there at the same time. It transfers fields to both. It's a different way of looking at the knowledge of the body, and how it functions and works.

This comes on the back of the knowledge. As we used to say, that if you drink a glass of water, then your thirst dies, and your whole body gets regenerated. Because as soon as the water passes into your mouth, it goes into the plasmatic condition. We are entering a new dimension both in communication and in transferring of energy, maybe it's food, or maybe it's pain.

In the very near future KF will most probably release small tablets, that in swallowing the tablet you absorb a full spectrum of the energy you need from the environment, you never need to eat. We are taking the T a step further inside the body of the man. In the space by you taking a small tablet, which is actually a field transfer, you absorb energy from outside, you don't need to eat anymore. You bring the fields, as they come in, they feed the cell of the body of the man. The whole world of communication and food, all changes, totally change from now on.

Q3: You said last week that pain is like a virus, an energy pack, that we discharge through the Pain Pen. In present science they found a chemical called Bradykinin, a peptide with ($C_{50}H_{73}N_{15}O_{11}$), they say it causes the inflammation and pain. When they take the Gans out of the vacuum sack of the body, does it become then the matter state, and is that how they find these chemicals?

The chemicals we see, that the body produces are very much like the virus, like a Corona. Corona is an energy, when it interacts with the cell, it creates that crown, what we call the Corona. It's the Inertia of the cell, which allows, in interaction with the energy of the virus, to create Inertia, or manifestation of the element. The element doesn't exist before (interaction with the cell.) In interaction with G or M field of the cell, in the position of the cell, it produces, converts its energy into the material state. We understand this fully now, and this is why we see in certain places certain kind of illnesses, (while in other places) infections don't appear. It's because the muscle tissues or the body tissues do not allow such a transformation of the Inertia field of the cell, into what we call, a pain or whatever else. It's like we don't get a cancer in our lymph tissue, it's very rare. But we get a lot of cancer in the red muscle tissues of the stomach, or in the kidneys or liver. Now we understand the vulnerability of the body of the man, and the energy transfer.

If you consider the body of the man like another galaxy, solar system, or another environment of the space, then you can do a lot of work with this. We don't need to go into another galaxy to find out what happens there. We can go into an organ or another part of the body of the man, and see if what we learn in this part, applies to another part, and what will manifest itself in that part. These are the new ways we are releasing information and technology and how they can be practically applied.

As I said, the evolution in the science and T starts from the 21st of March. You'll hear a lot about these kind of developments coming out of the KF. For example, feeding the man in space and in deep space, transfer of the communication and understanding in different aspects of energy transfer, and in the line of communication.

Very, very soon, if we go to do this phase, what we have done with the Corona, we'll do in reverse (in the body). What we took away from virus, to become a normal cell. With the new T we'll deliver energy packs within the body of the man, that man never again needs to eat in his (entire) life. Now it's feasible, now it's practical, now we can produce it, because the Gans technology and energy transfer is understood. It's a revolution in T,

which we now start bringing out from the 21st of March. New sciences will come out, and these are part of that new science.
Any other question?

Q4: Are you using the Gans of Bradykinin to match that of the pain in the body to discharge it?

K- What?

R: Because in the last question it was said about this peptide, in English I am not saying this correct, that they discovered called, Bradykinin. So he is asking if you are using the Gans of Bradykinin? ..

K- No .. no (we don't use the Gans of Bradykinin)

R: Do you want to say something about this Mr. Keshe?

K- About what?

R: About this question, "not the Gans of Bradykinin." Are you using the Gans of Bradykinin to match that of the pain in the body to discharge it? The answer is no.

K- No, no ... we understand the transfer of the fields. The body of the man is a collection of it and where it ?? is in ?? the paths, the body releases it all in one go.

Q5: My understanding is that for chronic pain we will have to use 3 things, the new Inflammation Pen, the Pain Pen, and the Gans's you indicate? Will you teach us how to use all these methods? This is a huge breakthrough as every being on this planet will suffer pain in their life.

K- Can you repeat?

R: My understanding is that for chronic pain we will have to use 3 things, the new Inflammation Pen, the Pain Pen, and the Gans's you indicate? Will you teach us how to use all these methods?

We are developing (a new system that will cover all of these in a single unit). The system is on the table in the lab. With one system I can change hunger or inflammation in your body, with one transfer. Therefore, if I locate the new system in a city, then I can change the man, that no one (in the city) feels hunger, no one feels pain, and we can satisfy the Soul of the Man.

This is what we are now testing with the flight system. It's on the table. I was looking at it yesterday. Where we see the evolution of transportation. If I want to go to the supermarket, which supermarket, where do you want to go, (what) field do you have? The composition of the place you want to be, gives you that position with your system to travel to. These are edge of science technologies which we are releasing. As I said, from 21st of March the game is over. It's not people thinking that it's the end of the world and the rest, but now it's the beginning of the new technology, which we could not even dream possible, and these are part of it. These are the breakthroughs in what I call, science of technology.

If we tell the man that he cannot kill outside, then we have to provide the energies for his existence. The new system and new technologies developed do just that. Try to look at it

in a way that we have never looked it at before. For example, you are walking down the street and if you want to cross the street and a car is passing, whether it is going slow or fast is more or less irrelevant, because it's you who will inhale the car's exhaust into your lungs. Now if you are standing at a junction with many cars passing, then literally, you are continuously connected to the exhaust of all of them, because as they pass they release a lot of energies as exhaust. As you stand there and say 50 cars pass, you have taken the energy from those 50 cars. That energy in the oil was embedded there millions of years ago, and now these machines are burning it, and making different fields available.

We understand this process and are developing technologies to access different fields. At this moment we are passing hundreds of thousands of galaxies and stars, like with the car exhaust we are developing technologies to access these fields, but at the energy level and not by the matter state gases. This creates a new dimension in space travel where you don't need to eat and you'll never get sick, because your body continuously balances itself. We'll start teaching these in the coming time. It's not something coming new, the prototype of it was set on the table months ago. That's why I said, when the change comes we'll do all these things. Now the change has come for the new technologies, but in the space level, not in the man's level of matter state. Tonight is the first time we start releasing it, then it will be followed in the public teachings. The breakthrough in science, in space science and universal knowledge science is huge.

Q6: Once you said you could hold the Pain Pen in both of your hands and direct the fields to where the pain is? Any advice on how we can do that, because it is really difficult to hold the Pain Pen on your back?

You can do, but you have to understand how. Understand the energy transfer, don't look at the position where you put Pen.

We had a case of a very bad headache, and we applied the new technology yesterday to test it. After applying the Pen the headache was still there, and even when the Knowledge Seeker (KS) went to sleep it was still there. But when he woke up, it was like, "I never had the pain," it was an absolutely fresh day, with so much energy. The whole purpose was to see if we could not only sort out the headache, but also if we could use the energy of the headache, to become part of the man's energy. In a way, like eating food while you are asleep with the headache (and waking up with the energy ready to be used.) It's a different approach, but it's the essence of the new plasma technology.

I cannot put an apple across the table, or in the other room and expect you to enjoy the energy of it without eating it. Now you can. Now with the new T, I can create a condition and you can enjoy the apple anywhere, more or less anywhere in the U, because the new T doesn't just bring the energy of the apple, it brings the emotion as well.

We always looked and said, "oh, I want to eat this apple." But now look at it from the apple's side, "I want you to eat me, because then I can transfer my energy inside you, and that energy can become something else." So is it the man who goes for the apple, or is it

the apple that says, "come and eat me." Because it is alive, it has information, it has a reason (for life). "I was created to transfer energy through, that it will be energy of the apple."

We never looked at the true essence of the creation, nor the energy transfer. Now we do. Why do we crave for something and we go and get it. You are sitting in a chair, and suddenly say, "oh, I would like to have a pot of yogurt or some cheese," and you go and get it. Is it the emotion inside (you), or is it the cheese in the frig that says, "come and get me, come and eat me?" And then it connects a link to you, because it satisfies an emotion in you. Now we understand more in a different direction. We have to look at the science in all aspects, not just what you have been taught and follow.

When you pass a table and pick something up, or when you feel, "oh, I see an apple, I want to eat that apple." Is it you who feels to eat the apple, or does the apple say, "come on, I create an emotion in your head that makes you want to come and pick me up." Because then, it's not that the apple has to transfer its seed somewhere else to become a tree, rather it can transfer its energy somewhere else, by becoming part of something else.

These are what we have to understand in the new dimension of life, and then gradually you'll understand more. If I desire to be in such and such a galaxy, or I want to see what the star I am looking at feels like, then I can instantaneously be there, because I can go through the line of emotion and the fields that have been transferred to me. That star is a living thing and it has emotion, (it says,) "I show myself for you to come and see me." Then transportation and transmutation takes on a new meaning and new ways.

We start explaining these kind of things in more detail in the coming weeks and months, and you will see, that a lot of you will change in your understanding and being able to apply it. "We will not eat another animal, we will not eat another entity, because if an animal wants to be eaten, ??? outside the body of the man, it converts itself to the Gans production of itself in an energy that the man needs."

Next question.

Q7: For example, if we only had access to a Pain Pen that we made ourselves, which you said is nothing like the ones from KF. How can we use our soul to relieve the pain? I have tried visualizing the knowledge you gave us, by imagining all the energy packs of pain and inflammation are flowing into the Pain Pen, and through the Nano coating, the left over energy is traveling back into the body through the hand. Sometimes a strong relaxation comes over the body and the Pain Pen feels warm. It seems to help, but the pain comes back. Please, can you help us further our ability to heal ourselves? thank you.

The pain comes back because you have not created the right balance. It's still there, the essence of it is there. It's like a hunger. It's the same process. The hunger comes back, because the energy is used somewhere else. We'll go into more depth about these in the teachings, in the coming time, so that you learn how you feed yourself in deep space. We

can't keep on saying that we'll take you there and then bla, bla. You have to know what to do, if you are the last man standing. This is the new cycle of teaching that starts today.

The body of the man, and the Soul of the Man have to be looked after at the same time while in the depth of the space through understanding of the transfer of fields of the U, not the mankind or a potato, or a banana. It's a new cycle, and this is part of what we said, that we'll start from the 21st of March.

Q8: Once you taught us to make a Pain Pen with 2 double coils in it, next to each other. You said, one was for the body and one for the emotion? (3:18). This was the time before you started teaching about the soul. How to understand what you were trying to teach us. How do these Pain Pens work differently from a single coil?

We usually teach sometimes far ahead, but people don't understand it, so they leave it. People still don't understand a lot of the things that were explained before. The Pain Pen if you look at it, is a double coil, and if you look at the Cup of Life #1, #2, it's no different.

We know that when you have a coil, you have a dimension of the soul or the emotion. When it was taught years ago, nobody understood, but now that the Cups have come in, you call it Cup #1. You use 2 coils, one Nano coated and one not Nano coated, and 1 plate, or whatever. Or if you use 3 Nano coated coils, then you work through the soul level. So if you look at it, we taught you more or less, the essence of the creation of the soul, and elevation of the soul with just simple Pain Pens years ago. Years and years ago, but nobody understood. Even now after I explained it, a few of you might understand, but the rest of the KF are like what I call, "in another dimension and work, and just too much involved in material life."

Q9: The last question is. There must be emotional issues around chronic pain. Will this procedure you are teaching us cause the emotions to come to the surface and be dealt with?

If you get a kick, and you get inflammation, there is no emotion in it, just your physicality got damaged. You can look at it that way too. However, if there is an emotion involved, then because of the way we have produced the new systems, they will simultaneously handle both the emotion and the physical damage. You can't take Paracetamol with you into space. You have to understand the energy which effects and works as "the energy of the Paracetamol." For a long time this is what I have been explaining to you, move into the energy and the transfer of the motion of the fields. You can even make Paracetamol from the energy of an apple. But it depends does that energy give you the feeling of the what we call, "better-ness." We'll start moving away from jumping from one thing to another, and move into the understanding of the interaction of the fields, then everything is possible.

Pulling Out of the Plasma what You Like

Try to remember the story about the fields coming from a magnet. If you are 1 cm or a kilometer away from the magnet, on the other end is the magnet, which is the essence, is the source (of the fields.) It is the same with the plasma energy, if you stand on this end of the fields, on the other end is the center of the plasma, or it's the Principle Energy. What do you want to take from that center? Now you have the road, you have the rope, and you can pull out what you like. This is what the KS haven't understood yet. And then you see at the end of the string, it depends on whether you work with it, a meter away from you, or 10 meters away from the center of the plasma. A meter away from you and it will be the energy of the pain, whereas 2 meters away from you towards the magnet, or the center of the plasma, and it will be the emotion of the satisfaction of "no pain." This is what has to be understood. That's why I said, we start explaining the fields.

In the teaching I will explain more of this as we go along. This is what the mankind has forgotten. You are at one end, for example, if you stand on the motorway 100 kilometers from Brasilia, you're still looking towards Brasilia. Brasilia is 100 km away. If you go 20 km towards Brasilia, then it's only 80 km away, but at the end it is still Brasilia. So there you can see the cars coming towards you. You see the energy comes to you, at the 100 km point you receive certain energy, but at the 80 km point you receive different energy, because the cars have (traveled less, so they have) more fuel, and they carry more (energy) to you, if look at it that way. I will start explaining field transfer in technology from now on, and then we'll see that we don't need the matter state. We need to get on the track of understanding the fields, then the speed of the transportation, and transformation (will be) nothing.

Thank you very much for letting me teach and share knowledge with you. But from now on, we have to understand the true essence of creation, not what we call the matter state. As I said in the teaching of Thursday, all of us have the ability to reach any state we would like to reach, even the state of understanding the Creator. It depends how we do it, and to what fields we want to attach ourselves to, and elevate our souls, that it can come in touch with.

Thank you very much for today, hopefully see you next time.

END

Key Phrases

Brazil becomes a big player - factory
Part 2 of the Chronic Inflammation and Pain teaching
Inflammation is just like Cancer, but liquid
How medicines work as Gans in body - Lymph Soup
Start of transfer of next level of plasma science
FIELD TRANSFER

Summary of Topics:

Not loose sight "technology in exchange for peace"
Brazil big player, targeted to get factory in 6 months

Pain Pen follow-up questions part 2

Chronic Pain teaching -

Q1: Will Pen transform inflammation back to normal lymph?

Inflammation like cancer but in liquid - transfer fields - cell back to normal

New Inflammation Pen shipping - covers wide area not just tip

Advise to use 2 Inflammation Pens create flow of fields

New Teaching -

Transfer of fields to another point - whether energy as information or inflammation

Transfer energy directly to skin - Don't need clothing for cold

New technology come out of development of Pain Pen

Communication lines connect anywhere in Universe

New Pen converts inflammation energy to food for body - after resting

Can transfer inflammation energy outside body like thoughts

Go into space without special clothing

Fear can be transferred into energy and deposited in body

Can do space walk freely without any support

Q2: Does Ibuprofen to Gans then transfer to Lymph soup or plasmatic Ibuprofen?

Pharmaceuticals to Lymph Soup - changes back to when needed

Chemicals transforms to Gans, but plasma spreads throughout whole body

KF developing small tablet - don't need to eat any more - absorb energy from Universe

Q3: Scientists say chemicals like Bradykinin cause inflammation - what are they seeing

The Chemicals we see in body are much like viruses, materialize through Inertia

Why some parts of body don't get cancer

Compare body like a galaxy, can study galaxy by studying human body

Now after 21st march revolution in science and technology

Q4: Are you using Gans of Bradykinin to discharge pain and inflammation?

No - we understand the transfer of fields - released all in one go

Q5: How do we use Pain Pen, Inflammation Pen, and Gans for chronic inflammation?

We are developing a system to transfer all the energy > inflammation, pain to feeding

Not the end of world but a new beginning in science and technology

When car passes you - energy from millions of years ago is being converted

We pass galaxies - that energy will now become available to man

Tonight we start releasing new technology

Q6: You said you can just hold Pain Pen in your hands and direct energy, how?

Look at energy transfer - we'll teach in future how

Now we can transfer energy and emotion of apple from anywhere to anywhere

Look at from apples point - does it tell you to eat it?

Travel to any star - it is living and can transfer emotion to you

Q7: Adding soul to Pain Pen - but pain comes back?

Because you have not created right balance - it's like a hunger keep feeding

We'll teach you how to feed yourself in coming time

Q8: Meaning of 2 double coil type of Pain Pen taught in past?

Pain Pen coils and Cup of Life - the same knowledge - Soul Elevation

Coils have dimension of soul or emotion

Q9: Do systems help us deal with emotional issues in chronic inflammation, pain?

Acute inflammation from injury - no emotion involved

New systems deal simultaneously with emotional and physical damage

Instead of Paracetamol we'll transfer its energy - same energy even from an apple

Learn to pull the fields of whatever need from center of Plasma

From now on it's FIELD TRANSFER

We can reach any state we like - even understanding the Creator

English Transcription:

Mr. Keshe .. (2:08:45)

(2:08). K- Yes, good evening. ...

It is nice to see how Brazil is leading from the front, level ?? of the KF movement in South America. What we really need to do now as the structures take place around the world with the KF, is not to lose sight of our purpose, of what you call, technology (T) in exchange for peace. As of next week and the week after, our real work starts in that direction. The KF television is a main purpose, a main source of structuring everything the right way for international presentation. (2:10).

R: Translates.

K- My target for Brazil is to open the first factory in Brazil in the next 6 months. In that process to start establishing the root of the KF in Brazil, in a way we started a year and a half ago, and we stopped because of Corona. But we start making efforts to consolidate Brazil in a bigger way directly from inside.

R: trans

K- This is what we would like to do in Brazil this year. We see Brazil as a big player in our space T.

R: trans (2:12).

K- And we come back to you for a lot of support. This is what we would to expand this year from now on into Brazil, as we see a natural process for Brazil to become part of the main space T the KF and the other countries.

R: Translates

K- Is there any questions?

R: We have some follow-up questions written about the Pain Pen (PP). Let me read it.

Thank you Mr. Keshe for your love and care in answering our questions on the Pain Pen. Such a deep and clear answer gives rise to more questions. If you permit we would like to ask some follow up questions on the Pain Pen to further be able to share the knowledge.

Since we are organizing the Easy Plasma Learning and one of the teachings is about the PP. ..

Q1: After looking at histology images comparing acute inflammation tissue with chronic inflammation, there appears to be a larger gap between the cells in the chronic inflammation. (2:14). My understanding is that this gap is filled with interstitial fluid. From Plasma point of view, is this fluid the Gans, that the new Inflammation Pen will transform back into normal Lymph through discharging the higher M fields, and thus return the tissue back to its non-pain condition? How does it work?

R: Translates ..

K- Understanding of the T is very simple. .. You have understand there is a difference between the pain and inflammation. (2:16). The inflammation is a way of, like a cancer, and in the process of inflammation we don't get the solid state like a cancer or more dense like cancer, but we get liquid, or we get expansion of the cells by liquid. Where the inflammation, the expansion, leads to creation of pain. What we have learned in KF over years is, we do not treat inflammation without the pain, and we do not most of the time treat, to understand the pain, without the inflammation position, or expansion of the cell. The expansion of the cell or the liquid within the cell, comes from extension of the G field within the liquid, so especially the Pen, which now we introduced, especially I think it starts shipping out this week, is understanding this principle. The connection between the inflammation and the pain, and the emotional condition between it. The inflammation when we take the energy, or the energy which comes as a pain towards it, even if you don't see the inflammation, it ?? cause the expansion local pain, or what we call energy transfer for what it comes, (2:18). then we stand a very good chance to empty it, like the way we emptied the cancer cell. When you take the energy from it, and you consider dilution of the fields within, then you can work very much, easy, in energy transfer, and returning of the, what we call cell back to its normal size. It's taken years and years of work to be able to understand the connection between the inflammation and the pain. Now we released the Pen last week, and I saw them today in the lab, they start shipping them out. It's understanding this process, and secondly being able to spread the fields. We've developed a new T that we spread the fields wide open. In the PP today we work with the tip, now with the new structure of the design we cover the whole arm. It's not anymore one point, the point sits with, we usually say use two Pens with the other side, Now we have developed this T which we expand the fields of the Pen, it's not on the tip anymore. Tip is a point of reference, but now we work round about 5 - 10 cm from the point. So the whole area gets effected, that's why it has become so effective.

R: trans .. (2:20).

K- (2:22). So to understand the pain, usually it is localized, but the inflammation covers much more area. We have to develop this T, but we use this in so many ways, in the new space systems too. So when you speak about inflammation, is understanding the knowledge of the plasma, as concentration of the liquid and stuff, like a tumor, as a more solid dense material, and we treat it the same, and now the new systems are much, much

more powerful, that we can handle now the pain and inflammation, but we cover a huge area. It's not anymore just one pinpoint, now we cover the whole condition from one to another. We advise now to use 2 Pens opposite to each other, that it creates the condition of the circulation of the fields. It's very effective.

R: Translates (2:24).

K- This is advancement in T and as I said, it works very effective. It works extremely effective. To understand when you deal with inflammation, you need to be in comparison with a much bigger area, than when you deal with the pain. If I could explain to you how it works. The whole body is made of liquid, but now it's a concentration of, then you have to devise a system, which you can interact with that position, not the whole, that it can bring balance. It's a beautiful understanding and it works perfectly in the lab, and we have tested on the patients.

R: Translates

K- Any other questions. We don't stop the development, and the development we look at now more, and more detailed, more what you call, specialized system, that it can deliver. And this new PP and inflammation is one of those innovations of the KF. (2:26).

R: Translate

K- The future what we see, maybe in the next stages of development is to add what we call transfer of energy, to understand what this energy was and is. In a pain, understanding the reason for the pain. Where we can transfer this energy now. It's the T part of what we call, transfer of information or communication, and we work now with, it will be tested this Monday, Tuesday in the lab, where we transfer the energy as information. And then we understand it in different ways what that information is, or what it got to be done.

R: Translate.

K- We communicate with the body to understand the reason for the inflammation or the pain, and now we are heading in that direction. (2:28). As I said in the teaching, new knowledge has been released, and that allows, in a way, a lot of new opening in the world of communication in the KF and beyond. We now can communicate or transfer energy to another point in a very, very simple way, hundreds of thousands of kilometers away. This T, in way allows to understand the reason for the pain, for example, we transfer the information of the emotion and understand it. It sounds a bit complicated, but it's a very, very easy process. KF in the next few, again I told you many researches are going together at the same time. We will release communication lines where you can connect to your phone, and in so many ways, a specific line, you can go anywhere in the U, anybody can contact you. This is now in our hand, we, it was developed years ago, now, as I said, we are moving to a new direction, the T is now coming forward for commercialization, and one of them is, transfer of the energy. Because the body uses a lot of energy, even for

the inflammation, and that's a huge amount of fields which can be used outside. You transfer the energy of the pain, into useful energy outside the body. It does a lot of good things, it brings a lot of understanding.

I was talking, we tested this, this week with one of the KS. (2:30). This new material, and this new T of transfer, and he .. What happens if you keep the body in the same position, some condition. For example you have a pain in your arm, and you use the T, to release the pain. The pain is still there, but when you get up and you start moving the pain disappears. It transfers the energy right across the body. Or when they use this as a drop liquid, you don't, you feel no change, but when you sleep or rest, and you get up, the body is totally different. There is no pain, but then you feel so fresh. It's like you have a whole day ahead of you. Which means you bring a lot of energy in, during the process of trying to reduce the headache, or a pain and inflammation. We were discussing this, because we tested this week and we know exactly how it works. Now we can transfer this to somewhere else, the same energy as the thoughts. Through the understanding of the T, then you come much ??? produced.

R: Translated .. (2:32).

K- One of the examples of this new T which is going to be released in, because now it's in testing phase in the lab, is that you can walk in the snow, in the ice, you can live in the ice, but feel no pain, or no, what you call cold. In a way, nowadays we transfer by burning fuel, energy to heat up, where the new T, you can just wear a simple glove, or you can wear a simple hat, or something very similar, or very small to the skin of the body, and we can transfer energy from anywhere on the planet, (2:34). or anywhere else that you don't feel the cold. You don't feel the pain of the cold, and the body starts behaving and living normal. In a way, we can transfer energy, of let's say inflammation into the body that it warms the body up. It heats up the body, that it can stand outside cold. Instead of you are wearing a glove, or wearing warm clothing, the new T allows the energy transfer without interfering with anything else, then you don't feel the cold from outside. It creates a new layer, new protection without clothing or without burning any fuel. This is now, it's nearly a few weeks testing, and it's correct. So you will see a new evolution in science, a new material, a new T, more or less the same as the inflammation.

R: Translates .. (2:36).

K- This new T will change a lot of things once it is fully used. If for example, you can go into space without any clothing, because we can create a condition to change the environment, or absorb the fields from the environment to the heat energy for the body, we just create like a shell, you don't need to wear a protective clothing. You can go into deeper part of the oceans without any protection, or any clothing, because now we can produce that in the skin of the man. It's a very interesting development and gradually we start explaining it more in detail. The background behind it was the PP, and the new PP which has been released. So we are on the way to learn how to protect ourselves from cold, from warm or whatever. And using the energy fields, environment around us, not by clothing. It's a very interesting T which is appearing at the moment.

R: Translating (2:38).

K- This is what, for example a few weeks ago, we explained that people which are paralyzed for years, they start suddenly walking using the T, without any pain. Now we understand the T, we use it in a very effective way, that we transfer energies to create that condition without any medicine, without any outside involvement by injections or suffering for years. We use the inflammation and the pain to transfer as an energy to the body. It's a very interesting development. We can even transfer your fear into energy, and deposit it to the body. It opens a new dimension in the health and travel into deep space, where you get out of the system and walk into a free space without any needs, where you can absorb the energy for your living and energy for your warmth through the new transaction or transition of what we performance. In a way, there is no need for clothing because we can't take clothing with us, but you keep the body warm, if it is in a matter state.

R: Translates .. (2:40).

K- But the interesting part is that you have to allow the energy to be balanced in the body, move the body and the body physically feels the change. We haven't done anything, by just absorbing plasmas.

R: translation

K- Any other question.

R: Yes, (2:42).

Q2: You said not to fit the plasma knowledge back into matter state to understand it. What about going the other way, using Plasma science to explain how matter state works. For example, when we take an anti-inflammatory chemical like Ibuprofen, it appears to work? First, we know it becomes a Gas in the stomach, and then what happens? Does the plasmatic field strength of the Ibuprofen transfer into the lymph as "plasmatic Ibuprofen?" And then travel around the body until it finds a matching field strength, what we call, the inflamed tissue? Or does the Ibuprofen just become part of the Lymph "soup".

K- Becomes part of the lymph soup. ... When it is needed it will change to. The difference between the understanding of the new T is that it is not in one place, it is available across the body. This is what we couldn't understand, how we take a tablet and it goes to the head. Or we take a tablet and it goes to the leg where the pain is. In the understanding, the new understanding is that, because it's plasmatic it goes right across the whole body, then it doesn't matter where the pain is, it'll take it for its use. It's not that it goes only to the leg, it's available if you have a headache too, at the same time. It fields transfers to both. It's a different way of looking at the knowledge of the body, and its functioning and its work.

R: translates (2:44).

K- This comes on the back of the knowledge, as we used to say, you drink a glass of water, your thirst dies, your whole body gets regenerated. It's that when the water pass, goes in the mouth, now it's in the plasma condition.

R:

K- We are entering a new dimension both in communication and transfer of energy, maybe it's food, or maybe it's pain. It's, in the very near future KF will release most probably small tablets, that in swallowing the tablet you absorb full spectrum of the energy you need from the environment, you never need to eat. We are taking the T a step further inside the body of the man. So in the space by you taking a small tablet, (2:46). which is actually field transfer, you absorb energy from outside, you don't need to eat anymore. You bring the fields, as they come in, they feed the cell of the body of the man. The whole world of communication, food all changes, totally changes from now on.

R: Can we go to the next question?

>>

Q3: You said last week that pain is like a virus, (2:48). an energy pack, that we discharge through the Pain Pen. In present science they found a chemical called Bradykinin, a peptide with ($C_{50}H_{73}N_{15}O_{11}$), they say it causes the inflammation and pain. When they take the Gans out of the vacuum sack of the body, does it become then the matter state, and is that how they find these chemicals?

K- The chemicals we see the body produces is very much like the virus, like a Corona, Corona is an energy, when it interacts with the cell, creates that crown, what we call the Corona. It's the Inertia of the cell, which allows, in interaction with the energy of the virus, to create Inertia, or manifestation of the element. The element doesn't exist before. In interaction with G or M field of the cell, in a position of the cell, it produces, converts its material or energy into material state. We understand this fully now, and this is why we see in certain places certain kind of illnesses, infections don't appear, because the muscles tissue does not, or the body tissue does not allow such a transformation of the Inertia field of the cell, into what we call, a pain or whatever else. It's like we don't get a cancer in our lymph tissue, it's very rare. But we get a lot of cancer in red muscle tissue in the stomach, (2:50). like kidneys or liver. Now we understand the vulnerability of the body of the man. And the energy transfer.

R:

K- If you consider the body of the man like another galaxy, another solar system, another environment of the space, then you can do a lot of work like this. We don't need to go into another galaxy to find out what happens there. We go to another organ, we go to another part of the body of the man, and we see what we learn in one part, does it apply

in the other part, and what will manifest itself in that part. These are the new ways which in practical, we are releasing information and T. (2:52). The, as I said, the evolution in the science and T starts from 21st of March. You'll hear a lot about these kind of development in KF. Feeding the man in space, feeding the man in deep space, transfer of the communication and understanding in different aspects of energy transfer, and in the line of communication. Very soon, very, very soon, if we, what we call, we go to do this phase, what we do with Corona, we do in reverse. What we took away from virus, to become a cell, a normal cell. With the new T we deliver energy pack within the body of the man, that man does not eat ever in his life. Now it's feasible, now it's practical, now we can produce it, because the Gans T and energy transfer is understood. It's a revolution in T which we start bringing out as we said, from 21st of March. New sciences will come out, and these are part of the new science.

R: (2:54).

K- Any other question

R: Q4: Are you using the Gans of Bradykinin to match that of the pain in the body to discharge it?

K- What?

R: Because in the last question it was said about this peptide, in English I am not saying this correct, that they discovered called, Bradykinin. So he is asking if you are using the Gans of Bradykinin? ..

K- No .. no (we don't use the Gans of Bradykinin)

R: Do you want to say something about this Mr. Keshe?

K- About what?

R: About this question, "not the Gans of Bradykinin." Are you using the Gans of Bradykinin to match that of the pain in the body to discharge it? The answer is no.

K- No, no ... we understand the transfer of the fields. The body of the man is a collection of it and where it ?? is in ?? the paths, (2:56). the body releases it all in one go.

R: ... the next question is.

>>

Q5: My understanding is that for chronic pain we will have to use 3 things, the new Inflammation Pen, the Pain Pen, and the Gans's you indicate? Will you teach us how to use all these methods? This is a huge breakthrough as every being on this planet will suffer pain in their life.

K- Can you repeat?

R: My understanding is that for chronic pain we will have to use 3 things, the new Inflammation Pen, the Pain Pen, and the Gans's you indicate? Will you teach us how to use all these methods?

K- We are developing these in, for one purpose, the system is on the table in the lab. Is, if I can change hunger, or change inflammation in you in one body, with one transfer, the new system if I locate it in a city, (2:58). I can change the man, that no one feels hungry, no one feels pain, and we can satisfy the Soul of the Man. This is what now we testing with the flight system. It's on the table. I was looking at it yesterday. Where we see the

evolution of the transportation. I want to go to supermarket. Which supermarket, where do you want to go, the field you have. The composition and the place you want to be gives you that position with your system to travel to. These are edge of science T which we are releasing, and as I said, from 21st of March the game is over. It's not people thinking, it's the end of the world and the rest, but now it's the beginning of the T, which we could not even dream could be possible, and these are part of it. These are the breakthroughs in what I call, science of T.

If we tell the man, man cannot kill outside, we have to provide the energies for his existence, and the new system does. The new T developed does. Try to look at, for example you are walking in the street, you have, we never look at it this way. If a car passes you and you want to cross the street, the speed, (3:00). or the slowness of the car passes, is more or less irrelevant, because it's you who will inhale the exhaust of that car into your lung. When we stand at a junction with so many cars crossing, you are continuously, literally connected to the exhaust of all of them, because as they pass they release a lot of energies as exhaust. And what is standing there, 50 cars passes, you have taken energy from 50 cars, from what was embedded in there millions of years ago, now machines are burning it and making different fields available. So we understand this. We are developing T that now we pass hundreds of thousands of galaxies and stars, we can take those energies, but in an energy level, not by the matter state gases. And this creates a new dimension in space travel where you don't need to eat, where you'll never get sick, because your body continuously balances itself. And we start teaching these in the coming time. The prototype of it was set on the table months ago. It's not something coming new, that's why I said, when the change comes. Now the change is now, the change has come. New T, but in the space level, not in the man's level of matter state. Tonight is the first time we start releasing it, that then, will be followed in the public teachings. The breakthrough in science, in space science and universal knowledge science is huge. (3:02).

R; (3:04).

Q6: Once you said you could hold the Pain Pen in both of your hands and direct the fields to where the pain is? Any advice on how we can do that, because it is really difficult to hold the PP on your back?

K- You can do, but you have to understand how. Understand the energy transfer, don't look at the position where you put Pen.

R: Translates

K- We had a case of a headache, very bad headache, and we applied the new T yesterday. The headache was there. When the KS went to sleep it was still there. (3:06). When he woke up, it was like, "I never had the pain," it was absolutely a fresh day, so much energy. The whole purpose was to test to see that not only we sort out the headache but we used the energy of the headache to become part of the man's energy for, like eating a food while you are asleep with the headache. It's a different approach, but in essence through the new plasma T. I cannot put an apple across the table, or across in the other room and expect you to enjoy the energy of it without eating it. Now you can. Now with

the new T, I can create a condition and you can enjoy the apple anywhere. More or less anywhere in the U, because the new T doesn't just bring the energy of the apple, it brings the emotion as well.

We always looked and said, oh, I want to eat this apple. But look at the other side. I am the apple I want you to eat me, because then I can transfer my energy inside you, and that energy can become something else. So is it the man who goes for the apple, or is it the apple that says come and eat me. Because it is alive, it has information, it has a reason I was created for to transfer energy through, that it will be energy of the apple. We never looked at the true essence of the creation and energy transfer. Now we do. Why do we crave for something and we get up and go and get it. (3:08). You are sitting on the chair, and suddenly say, "oh, I would like to have a pot of yogurt or some cheese," and you go and get it. Is it the emotion inside, or is it the cheese in the frig that says, come and get me, come and eat me? And then it connects a link to you, because it satisfies an emotion. Now we understand more in a different direction. We have to look at the science in all aspects, not just what you have been taught and follow. When you pass a table you pick something up. But what about when you feel, "oh I see an apple, I want to eat that apple." Is it you who feels to eat the apple, or the apple says, "come on, I create an emotion in your head that you come and pick me up." Because then, it's not that I have to transfer my seed somewhere else to become a tree, I transfer my energy, that my energy becomes somewhere else. These are what we have to understand in the new dimension of life and then gradually you'll understand more. I desire to be in such and such a galaxy, I want to see what that star I am looking at, how does it feel. I can instantaneously be there, because I go through the line of emotion and the fields that have been transferred to me. That star is a living thing, it has the emotion, I show myself for you to come and see me. Then transportation and transmutation takes a new meaning, new ways.

R: Translates (3:10). (3:12).

K- We start explaining these kind of things in more detail in the coming months and weeks, and you will see a lot of you will change in understanding and applying it. We will not eat another animal, we will not eat another entity, because if an animal wants to be eaten, ??? outside the body of the man, converts itself to the Gans production of itself in an energy that the man needs.

R: One more question (3:14).

Q7: For example, if we only had access to a Pain Pen that we made ourselves, which you said is nothing like the ones from KF. How can we use our soul to relieve the pain? I have tried visualizing the knowledge you gave us, by imagining all the energy packs of pain and inflammation are flowing into the Pain Pen, and through the Nano coating, the left over energy is traveling back into the body through the hand. Sometimes a strong relaxation comes over the body and the Pain Pen feels warm. It seems to help, but the pain comes back. Please, can you help us further our ability to heal ourselves? thank you.

K- The pain comes back because you have not created the right balance. It still there, the essence of it is there. It's like a hunger. Hunger comes back because the energy is used somewhere else, and it's the same process. You .. in the coming time in the teachings, we go into depth in these, that how you feed yourself in deep space. We can't keep on saying we take you there and then bla, bla. You have to know what to do if you are the last man standing. This is a new cycle of teaching starts. Body of the man, and the STM has been looked after at the same time in the depth of the space through understanding of the transfer of fields of the U, not the mankind or a potato, or a banana. It's a new cycle, and this is part of what we said, we start from 21st.

R: (3:16). Can we go to the next question, we have 2 more here.

K- Yes, I said if you can make it the last question. it's nearly 2:30 in the morning here. To the last 2 questions, no problem

R: Q8: Once you taught us to make a Pain Pen with 2 double coils in it, next to each other. You said, one was for the body and one for the emotion? (3:18). This was the time before you started teaching about the soul. How to understand what you were trying to teach us. How do these Pain Pens work differently from a single coil?

K- We usually teach sometimes far ahead, people don't understand they leave it. And now people still don't understand a lot of things which were explained before. The PP if you look at it, a double coil, and if you look at the Cup of Life, if you look at the Cup of Life #1, #2, it's no difference. Now we know when you have a coil you have a dimension of the soul or emotion. Now when it was taught years ago, nobody understood, now it's coming to the Cups, you call it Cup #1. You use 2 coils one Nano coated and one not Nano coated, and 1 plate or whatever, or you use 3 Nano coated coils you work through the soul level. So if you look at it we taught you more or less, the essence of the creation of the soul, elevation of the soul with the, with just simple Pens years ago. Years and years ago, but nobody understood, now even, now that I explained a few of you might understand, the rest of the KF are like what I call in another dimension and work, and just too much involved in material life.

R: (3:20);.

K- Carry on.

R: Q9: The last question is. There must be emotional issues around chronic pain. Will this procedure you are teaching us cause the emotions to come to the surface and be dealt with?

K- If you get a kick and you get inflammation, (3:22). there is no emotion in it, your physicality got damaged. You look at it that way too. The process is, if there is an emotion involved, because the way we produced the new systems it simultaneously handles the emotion and the physical damage. .. You can't take Paracetamol with you into space. You have to understand the energy which effects and works as energy of the Paracetamol. This is what for a long time I have been explaining to move into energy, transfer motion of the fields. You can make Paracetamol from the energy of an apple. It

depends does that energy give you the feeling of the what we call, better-ness. We'll start moving away, jumping from one thing to another. Move into understanding of the interaction of the fields, and everything is possible.

You've got to remember a story, if you remember, that if you look at the fields coming from a magnet and you are 1 cm or a km from the magnet, on the other end is the magnet, which is the essence, is the source. So in the plasma energy you see, you stand on this end of the fields, the other end, (3:24). is of the center of the plasma, it's the principle energy. What do you want to take from that center? Now you have the road, you have the rope you can pull what you like. This is what the KS haven't understood. And then you see at the end of the string, it depends, you work with a meter away from you, or 10 meters from the center. A meter away from you it will be the energy of the pain, 2 meters away from you towards the magnet, or plasma it will be the emotion of the satisfaction of no pain. So this is what has to be understood. That's why I said, we start explaining the fields. In the teaching I will explain more of this as we go along. This is what the mankind has forgotten. you are at the end. If you stand on the motorway 100 kilometers from Brasilia you're still looking towards Brasilia, Brasilia is 100 km away. In 20 km, it's 80 km, but at the end it is Brasilia. So there you can see the cars coming to you. You see the energy comes to you, at this point you receive certain energy, at the other point you receive different energy, because the cars have less fuel, or more fuel, they carry more to you, if look at it that way. I start explaining field transfer in T, as we said, from now on. and then we'll see we don't need the matter state. We got, need to get on the track of the fields, understanding, then the speed of the transportation, transformation comes nothing.

R: Translates .. (3:26). (3:28).

K- Thank you very much for letting me teach or share knowledge. But from now on we have to understand the true essence of creation, not what we call the matter state. As I said in the teaching of Thursday, any of us has the ability to reach any state we would like to reach, even the state of understanding the Creator. Depends how we can, to what fields we want to attach ourselves to, and elevate our souls that it can become in touch with.

Thank you very much for today, hopefully see you next time.
you very much.
