

Suicide and Euthanasia Prevents the Maturity of the Soul

Excerpt from 355 KSW , starting at around :16 minutes. Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

Summary:

A question was asked by a Knowledge Seeker to Mr. Keshe that in his teachings awhile back he talked about suicide as being a universal sin. Assisted suicide is legal in Canada for terminally ill people with no hope.

Mr. Keshe replied, that there are two ways to look at what we call euthanasia. Just because you do it with permission of government, or put it in legal papers, does not give the man the right to end the physical structure by the man himself. There are no legal papers and governments for the Soul of the Man (STM) in the Universe. This is something that man has to come to terms with, and bring all dimensions to the point of acceptance.

The reality is that all of us who live in the dimension of physicality will leave it, either by choice or by accident. Now with what we know, that we can extend or change our departure from physicality, and appear in and out of the physical dimension as we need, will give a new dimension of existence to man.

Up to now we have had to suffer within this physical body, but from now we don't need to. We have and are gaining the knowledge, and at the same time producing systems and structures that allows us to bring the energy of the physicality into the soul, and then re-manifest ourselves in the dimension, position, and time we choose. But does this mean that if you are paraplegic, or with a disease in the physical body of the man, that when you interact through your soul, and manifest yourself in a different dimension, that it will carry the same diseases over into that other position? In reality, no.

Therefore, we don't see euthanasia in any shape or form as being acceptable, because man now has the knowledge to be able to do what we call, elevation of the soul. That means that the soul brings within itself the dimension of the physicality. And if man so feels, he can re-manifest himself in perfect physical condition. But in reality, when man does such a thing, the book of the Soul of the Physicality (STP) has to be clean and clear, and that he is not doing this as a way to escape, or to hide, or to find a short cut. This will not happen.

You've got to realize that those who we call (terminally ill), or in a coma, or with any other diseases in the physical dimension, that they still have a STP, which is in perfect working shape and operation. (It is because of) its interaction with its environment, that it

gives this effect (what we call the disease). So in reality, the STP has to be in line with the STM, (to be able to) reconstruct itself to the perfection. Does it mean you can come back cured, without any diseases? That is possible. It depends on what the STM decides, and what perfection the STP has reached. Just because the body of the man is entangled up with, what I call physical life, does not mean that the STM or the STP is in the same position. It has chosen out of the time and position.

With the new knowledge there is no need for euthanasia, as the elevation of the STP can lead to the elevation of the STM, and visa versa. I was talking to one of the KS in the past few days in the same manner. The STP has the right to terminate its work with the physical dimension, but it has not got the right to terminate with the STM.

At the point of natural death, all the energies of what we call the soul of the physical man, adds to the STM, which allows it to depart. As we talked before, when we get old, we gradually transfer the STP to the STM. At the point when the balance is reached, then the field energy of the STM exceeds the physicality, and it can break through the barriers of what we call, the cage, through the circulation of the blood. This why we age. As I have explained before, as we grow older, we give more and more to the soul for it to find its freedom, and with that the physicality suffers. We call it aging.

With the new knowledge we don't need to go through this process, because we can elevate the STM so that it can elevate the STP. At the same time, we can also elevate the STP itself, so that in that process, physical death does not occur. We can live for thousands of years. This is the process of life that I live through, and how I have been here on Earth. As was explained before, we walk away from one city, and then appear in another. Time, in life and essence, and the demise of it, is manmade, and not the process and work of the soul. In that process, we walk from one village to another without anybody knowing, as a new traveler. We take position in the STM, and we live through it, and mankind will gradually be taught this.

And as I said, from 21st of March, this process will be set to start, with the new life, the new cycle, and the new way. I keep on saying, as I said before, it takes only one soul to change, and that soul will be created to bring that change, but it has to have the love, pure love, and not be tainted. And in that way, it will be brought up as a perfect example, that the others will follow and live through.

In so many ways, euthanasia in the dimension of the soul does not exist. When you commit euthanasia or suicide in any shape or form, the soul has not received all that it needs to be matured, to be able to live in its new dimension to its full potential. Suicide and euthanasia are forbidden because in a way, the soul is not complete, it's half cooked, and that cannot be done.

It's your responsibility in the dimension of physicality to give all to the soul, so that it has full and complete strength of its fields, to be able to survive in the Universe. In a way, you don't leave a soul to be again paraplegic, this time in the soul, by not being fully completed, and not being able to complete its cycle. When you go through this process of

euthanasia or commit suicide, you leave a soul half ready to take its position, and that is why it is forbidden. Everything in the dimension of soul has to reach its full maturity, that it can take its responsibility and its position. We don't look at euthanasia and suicide in the physical dimension, we look at what it does to the STM. A soul that is freed from the cage, must be fully trained and carry with it everything it needs. This is why we know how long it will take, and when we die in the physical dimension of ?? nowadays, where in a matter of living will never happen again.

In nuclear physics we talk about nuclear decay, that nothing is lost, but is converted, and this here is exactly the same. In the process of the plasmatic field of the STM, when it receives the whole of the energy from what we call the STP, it becomes more elevated. (If we terminate early), what we will leave behind are the matter states, each one having its own soul, but with no coherent field pulling them all together. This is why after the departure of the soul the man disintegrates, because it has lost its central control, it has lost its STP, and with it, what it was leeching on to, which is the STM.

If you could create a condition that you allow the STP to remain in touch with, and be able to have a coherent interaction with the soul of the matter states, which we see as the body of the man, then the man even in the state of death, as you call it, will be alive, and be functioning to stay alive. This is the reason why when we die the body disintegrates, because it loses its central control, the soul, and the STP, which has given everything to the soul for it to be able to depart. Now you have everything, but without the glue.

The glue of the physical body of the man is the STP, and the interaction between the STP and the STM creates the emotion, what we call gravity, what we call magnetic field. This is what it is. You need 2 to confirm existence. Now you have the STP and the STM in their interaction, one creates the atmosphere, which is the physicality of the man, and one creates gravity, which is the emotion of the man, and this gives dimension to the existence of what we call physical dimension. "But when both fields are collectively collected together there is nothing to create the magnetosphere to hold it together, the whole structure disintegrates." That is why when we die, after a while, we find nothing, because now the control has gone. The glue has itself let go. It's like being in a pressure tank, as long as the pressure is there, it holds everything together, the minute you release the pressure, everything explodes.

The STP gives all its energy to the STM, so now the STM in the dimension of physicality has nothing with which to create that magnetosphere, or what we call the body of the man. This is why euthanasia and suicide are forbidden, because you deprive your creator from totality. With the new technology you don't need to do this. What you need to do, is to elevate the STM and the STP of the man, and then let it decide whether or not it wants to manifest itself in the condition we see.

English Transcription

Suicide is Universal Sin - Euthanasia prevents maturity of soul

Q: .. your teachings awhile back, you talked about suicide as a universal sin. Now I have talked to a number of people, because a lot .. One thing that is legal here in Canada is assisted suicide, they can choose the end of life, and it is legal. It's basically for people who are terminally ill, with no hope. This is resting on my soul, knowing with what you have given, and the information that suicide is a universal sin, so how does this follow into that ... we have plans for EU that will help people with that. ?

K- If I am correct you are a nurse. There are 2 ways to look at it, this what we call euthanasia, (:18). with permission of government does not give the right to the physical structure of euthanasia by the man himself. Just because it has been put in the legal papers, there are no legal papers and governments in the U, and not for the STM. This is something that man has to come to terms with, and bring all dimensions to the point of acceptance.

Euthanasia Not Necessary as we can Merge STP into STM

The reality is that all of us in the dimension of physicality, we will leave the physical dimension by choice, by accident, now knowing that we can extend it, or change it, and appear when we need. This will give a new dimension of existence to man. In a way, up to now we have to suffer within this physical body, from now we don't need to. We have the knowledge, and we are gaining the knowledge, and we are producing structures and systems, that allows you to bring the energy of physicality into the soul, and then re-manifest yourself, in a dimension, position, and time as you choose. But does it mean if you are paraplegic with a disease in a physical body of the man, when you interact through your soul and manifest yourself in a different dimension, will it carry the same diseases as in the other position. In reality, no. So, we don't see euthanasia in any shape or form acceptable, as man now has the knowledge to be able to do what we call elevation of the soul which brings in the dimension of physicality within it, and then can manifest itself in a perfect condition, if he feels so. (:20).

Balance Books of STP - Not as Escape or Shortcut

But the reality is, when man does such a thing its book, the book of STP has to be clean and clear, and not a way to escape. Not a way to hide, or find a short cut, that will not happen. You've got to realize those who we call them, in Coma , or any other diseases in the physical dimension they still have a STP which works in perfect shape and operation. It's interaction with its environment, gives this effect, so in reality the STP has to be in line with the STM, that it can reconstruct itself to the perfection. Does it mean you can come back cured, without any diseases? That is possible. Depends what the STM decides, and what perfection the STP has reached.

The Elevation of the STP can Lead to Elevation of STM - Visa Versa

In so many ways, just because the body of the man is entangled up with, what I call physical life, does not mean the STM is in the same position, and not the same with the STP. It has chosen out of the time and position. And with the new knowledge, there is no need for euthanasia, as the STP elevation can lead to the elevation of the STM, and visa

versa. I was talking to one of the KS in the past few days in the same manner. The STP has the right, (:22). to terminate its work with the physical dimension, but has not go the right to terminate with the STM.

Aging is when the STP gives its Energies to STM - Physicality Suffers

At the point of natural death, all the energies of what we call the soul of the physical man, adds to the STM, which allows it to depart. When we get old as we talked before, we gradually transfer the STP to the STM, at the point when the balance reaches, then the STM field energy exceeds the physicality it can break through the barriers of what we call, the cage, through the circulation of the blood. That's why we age, that's why we grow older as I have explained before, we give more and more to the soul to find its freedom, and with that the physicality suffers. We call it age.

Don't need to go through this Process with New Knowledge - Live thousands years

With the new knowledge we don't need to go through this process, as we can elevate the STM, that it can, what we call elevate the STP, at the same time we can elevate the STP itself, that in that process physical death does not occur. We can live for thousands of years.

Mr. Keshe Lives in the STM on Earth for Centuries

This is how I have been here. This is the process of life I live through. We walk from one city and appear in the other, explained before. Time in life and essence and the demise of it, is the manmade, not the process and work of the soul. And in that process, we walk from one village to another without anybody knowing, as a new traveler. (:24). We take position in the STM, and we live through it, and mankind gradually will be taught this.

This Process will Start March 21st - New Soul Created out of pure love
And as I said, from 21st of March, this process will be set to start, with the new life, new cycle, new way, and I keep on saying, as I said before, it takes one soul to change, and that soul will be created to bring that change, but it has to have the love, pure love, and not tainted. And that way it will be brought up as a perfect example, that the others will follow and live through.

In so many ways, euthanasia in the dimension of the soul does not exist, and when you commit euthanasia or in any shape or form, suicide, the soul has not received all to be matured, to be able to live in its full potential in its new dimension. In a way, you let a soul, half cooked, not complete, and that cannot be done. That's why suicide and euthanasia are forbidden. It's your responsibility in the dimension of physicality to give all to the soul, that in that soul has a full and complete strength of its fields to be able to survive the U. You don't leave a soul, in a way, paraplegic again, not being fully completed, not being able to complete its cycle. In a way, when you commit suicide, or you go through this process of euthanasia you leave a soul half ready to take its position, and that is why it is forbidden. Everything in the dimension of soul has to reach its full

maturity, that it can take its responsibility and the position. (:26). We don't look at euthanasia and suicide in a physical dimension, we look at what it does to the STM, when that soul is freed from the cage, not fully trained and it does not carry everything. This is why we know how long it will take, and when we die in the physical dimension of ?? nowadays, where in a matter of living will never happen again.

In a way, in nuclear physics we talk about nuclear decay, nothing is lost, it is converted, and this is exactly the same. But in the process of the plasmatic field of the STM it becomes more elevated when it receives the whole of the energy of what we call the STP. What we will leave behind in so many ways, is the matter states, with each one their own soul, with no coherent field putting it together. That's why the man after the departure of the soul disintegrates, because it has lost its central control, it has lost its STP, and with it, what it was leeching to, which is the STM. If you could create a condition that you allow the STP to still have touch, be able to have a coherent interaction with the soul of the matter states, which we see as the body of the man, the man even in the state of death, as you call it, will be alive. Will be functioning to stay alive. This is the reason why we die and the body disintegrates, because it loses its central control, the soul, and the STP which has given everything to the soul to depart. And now you have everything without the glue. (:28). The glue of the physical body of the man, is the STP, and the interaction between the STP and the STM, which creates the emotion, what we call gravity, what we call magnetic field. This is what it is, you need 2 to confirm existence. Now you have the STP and STM in their interaction, one creates the atmosphere, which is the physicality of the man, and one creates gravity, which is the emotion of the man, and this gives dimension to the existence of what we call physical dimension. But when both fields are collectively collected together there is nothing to create the magnetosphere to hold it together, the whole structure disintegrates. That is why when we die, we find nothing after a while, because now the control has gone. The glue has itself let go. It's like being in a pressure tank, as long as the pressure is there, it holds everything together, the minute you release the pressure, everything explodes. Now the STM in dimension of physicality, STP gives all its energy to the STM, there is nothing to create that magnetosphere we call the body of the man. That is why euthanasia and suicide is forbidden. You deprive your creator from totality. In so many ways, with the new T you don't need to do. You need to elevate the STM, you need to elevate the STP of the man, and then let it to decide, (:30). if it wants to manifest itself with what we see in the condition that it wants to separate itself from.

Q: ..
