<b>Part I: Teachings.....</b>	<b>2</b>
<b>Part II Q&amp;A.....</b>	<b>26</b>

## Part I: Teachings

(:14). K- Yes, good morning, good day to you as usual. Wherever and whenever you listen to these series of Knowledge Seekers, of the Keshe Foundation Spaceship Institute. We welcome you back with great pleasure. It maybe one of the greatest pleasures mankind has ever known. As we listened to the Intro, recorded some three, four or five years ago, we see how the evolution in science has brought us to what we see today. What this Intro explained or brought forward is now a reality with the technology and the systems, which we have developed. Where we work through the Soul of the Man (STM). When we directly get ourselves involved in elevating the STM to the point of passing the boundary, the physical structure of the man. There are many of you, hundreds of you, now we run into thousands, have been through the system, have traveled, have seen your loved ones, you have gone to places you never could imagine you go. And with the dimension (D) that you understand and you control.

(:16). So, what was amiss for thousands of years, in past five years have become reality to many of you. And the good news is that, in the next five years, it will take a new direction, elevation, and dimension in all aspects of technology. In the coming weeks and months, Keshe technology and the development of the space technology will take a leaping jump. In the coming weeks, I will

explain more and more as we consolidate, as we change, as we grow, and become one of the major corporations and major organizations in partnership with other structures. Keshe Foundation is just about to break through in the dimension of the space technology (T), in dimensions of the structure of the technology worldwide. And this has come through the hard work of many of you as Knowledge Seekers (KS). It allows us to deliver the development of the STM for more people to understand, for more people to benefit by this structure of the technology, which has come through the introduction, understanding of the collective fields effects of any entity, be it the STM, be it the atom, be it electron, be it the soul of a tree, be it the soul of an animal. Now, the knowledge has reached to the point that it's time to leap forward, the frog leap will be so huge in the coming months and years, that many of you will say, I was there when it started. I am one of the original Knowledge Seekers.

(:18). I am one of those who understood in 19, in 2000, or whatever it came across. Many of you heard about the Keshe Foundation since 2010, 2005. The teaching and explanation of the science to many scientists goes back to 1980s, early 80s, discussions with NASA, all recorded in letters and correspondences, that such a technology, such an evolution in science will come. We've seen Musk, burning one of the biggest rockets last week, and they are happy that they just could take off. In the next few weeks, the Space Technology of the America will become obsolete. By the technology,

which the Keshe Foundation in collaboration with a major government, will make the American space technology to a halt. All we've seen as NASA. All we've seen as a space technology, and all the wonders of burning rocket fuel, will come to an end. The evolution of the science and technology is at the reach of the man, not only at the reach, it has been developed, to be delivered. In the coming weeks, as we unravel the new collaboration and cooperation's with many governments, with many structures, you will understand, what you as Knowledge Seekers been waiting for, has been accomplished. We stay quiet, we just tell you what is to come. And it's the job of the governments to announce the collaborations. It's the job of their structure to deliver the technology to the population. We are ready and we have delivered, and in coming days we are ready to take that leap of development and delivery of the technology to millions of people. It comes out of the hard work.

(:20). It comes in understanding the elevation and evolution of the world leaders. When we asked you to raise the level of the Soul of the world leaders, it had a reason. We have reached that point. Many of you took part. Many of you with sincerity raised that point and today we have reached that point. In a coming time, in the next few weeks and months, you'll become aware of the change in technology, in evolution in technology, and collaboration with structures will bring that change forward. Keshe Foundation, as you as Knowledge Seekers, will become one of the

prominent structures in science and technology. When we will not hear any more about Americans are about to launch a shuttle, launch a rocket and burns, and we are happy we passed the first 30 seconds, the first minute of flight without exploding. As we heard with Musk's flight couple of weeks ago, or past few days, that we are just happy. The age of the rocket technology and propulsion is finished. It literally has come to a halt. We will deliver technologies which will replace through the structure of the space technology for man. Man now has two options. You can travel as you've seen through the physical dimensions of the space technology, like UFOs. Or you can travel in the dimension of the Soul, as an energy ?? pack. As I've explained many times, if I make an envelope of the plasma, doesn't matter if I put a pen in it, the STM in it, or a chair, or a dog. That envelopes, when it delivers and opens up, then whatever is in it, will manifest itself, (:22). according to the time, place, and position of the fields of the environment. If it's on Earth, you go in as a dog, you come out as a dog. You go in as a tree, you come out of as a tree. You go in as a man, you come out as a man, out of the envelope. A plasmatic envelope. This technology is unknown to outside, it's a dream. If you listen to the transportation and what the scientists up to now have done, they've been trying to move an electron, energy of it, part of it less, up quark, down quarks, and all that mess we have created in the dimension of the physics. Now, it doesn't matter you are a up quark or down quarks,

whatever you are. A dog, a cat, a man, once we create that envelope, when we deliver that envelope in the atmospheric condition of the Earth, on a land to land position, you come out as you are. But, when we deliver that envelope from Earth to Moon, you mutate and expansion of opening of the envelope to the dimension and the condition of the environment you're in. We will not see man wearing a space suit on the moon. As man will evolve to the dimension and structure, can live in the moon, on the moon, inside the moon, in the upper or lower atmosphere of any planet, any space and time. Maybe you can understand the teaching of the past. When we said the time of death, the separation of the STM from its physicality (P), the space and the time and the position of the Soul in the dimension of the Creation, has been decided by the strength of the Soul itself.

(:24). Now if your Soul happened to manifest in a water of a distant planet, would you drown and die? Or would you manifest as a new creature, which can live in that environment, taking the D of Soul of Physicality (STP)? Evolution in change, it comes from transmutation in energy fields. In next two quarters of this year, we go ahead with the journey transportation and transmutation of first two men on the moon. How would we see them? And then in the following months and years, we plan to open colonies in cooperation with the governments. Keshe Foundation is not alone anymore. Keshe Foundation will establish with collaboration one of the largest governments in the

world to establish the first colonies on the Moon and Mars. How would we turn up? If you come outside the dome which we have created? If by accident you land on the surface of the moon when the dome is not there, how would you look? What about if we transmute you in the combination, in the direction and dimension of the gravitational (G) field forces of the Earth into a dome condition on the moon, you'll manifest as a man. The way you left on Earth. But have you gone on the Moon just to walk on the dust and the dirt? Or are you going there for a real experience of living in the atmospheric condition of the Moon? Are we changing a free prison of the Earth to a, what we call, prison of a dome on the Moon?

(:26). This is not the space travel. This is not the way man should be. This is not the way just going from one cage to another. Man should be free. When you go on the Moon, you're happy to be in the dimension of physicality of the man to land. You want to go beyond the dome. Or you still want to be in the dimension of the frog suit, of the America space technology? Or do you want to be in a real condition of tasting, feeling the pressures, the atmospheric condition of the Moon or any other planet? Are you only prisoner tourists, or are you a space tourist? If you are a space tourist, we have a beautiful saying in Farsi; "Geh khawheena shaheed uswa hamrangi jamaach." If you don't want to be embarrassed, become part of the culture, become part of the society. If you don't want to stand out as an idiot, as a leftover, as an uneducated, as whatever you want to call it, when

you go to the moon you want to mix with the creatures of the Universe on the other side of the dome. Now you understand you have a choice. Even still we take you from Earth to the moon in a UFO, in a rocket which has no what we call, a firework on the end of it, and we deliver you. Are you just happy to say you've been on the moon. I've been to such a country just in the airport, in the transit. I've seen all the countries in the world in the airport in transit. You see a country when you get out of the airport, when you go and mix with the society and then you become a member. Then you can say I've been to this country, I've seen this statue, I've been to that museum, I've eaten their food.

(:28). So man to go to space has to become to that point. It's better to handle this now than in 20 years, 50 years and then trying to find a solution. Where from the beginning we have the solution. Then you come to understand when we go to the moon do you still want to end up in the dome like a fish tank, or would you like to be outside, where the other souls of the creatures of God live? With the present knowledge, the name is irrelevant. Because we can create the gravitational magnetic field of the Earth on any point, anywhere in the Universe, even in the open spaces of the Universe. Would you like to be in the fish tank? Or would you and to be part of the society of the Universal Community and be part of the Community. Now you have a choice. Now you understand how the options of the travel into space has narrowed down to no option, except travel by the dimension of the

energy fields of the body of the man, we call it the STM. We have no choice, unless we want to fool ourselves. Yes, we've seen, we've been, but actually, yes, as prisoners and a fish tank. I wonder how many of you will travel to the moon and bring souvenirs made by Chinese, sold to you on the moon, "I've been to the moon," and bring it back to the earth and bring it back to China. Then you understand. To be the true members of the Universal Community, which we have set up the knowledge for it, we have set up the structure for it, that every Knowledge Seeker can understand, (:30). is not exclusivity of a government organizations or whatever. Is the collective knowledge of the creation that we all possess, and we all have to do. As I said, the knowledge has to be taught in public dimensions, in public teachings, in Internet and everything else, that we bring the whole culture of a nation of the man to one level. And we have to deliver that we don't stay, just the talkers. And the Keshe Foundation has reached a point to deliver. We deliver technologies to the governments. We show the power of the technology in the essence of solving the present problem of this planet, eradicating poverty, bringing food and the knowledge and energy as food available to every man and every corner of this planet. We have worked for years for this target and today we are about to bring it to an end. Where we can feed all man equal. Where there is no more hunger. Where there is no more lack of water. Where there is no more lack of energy. Where there is no more lack of what we

call, food, that Man can survive. We are on the verge of the opening doors of the knowledge to all humanity and thanks to many of you. This is not an easy task. It will take us years to accomplish. It takes us years to set up systems to change the course. And as one of the men of the table said, we write the books and let them read.

(:32). We rewrite the book of the knowledge of the man in the dimension of plasma technology and knowledge and let the others read. When in the next few weeks, many of you witness the collapse of the NASA technology, the rocket propulsion and what I call, the "Chinese fireworks." Not by talk, but by delivering technologies which shows everything is obsolete. Obsolete but progressive development of the knowledge. Not obsolete just because it becomes. Donkeys and chariots were the best things in the time of Romans. And today we keep them in museums. And now the rocket technology and the space technology, which we've been brought in by the German based knowledge of the rocket and the Chinese firework has come to be part of that chariot. It's set to be and it'll be part of the museum of development of the knowledge of the man. In next few weeks, on a daily basis, on a weekly basis, Keshe Foundation will release new dimensions in development of the technology. And collaborations. And we have the time, and the place, and the knowledge to attract enough to bring the changes. We worked for years to bring that support, that stability in technology and the knowledge. And we are just about to break through. To show what was even 5 years ago, as

we saw in the beginning, now a reality that it will become part of the work of the Keshe Foundation. As I said last week, the Keshe Foundation Exhibition Center in Linz, in next couple of weeks, will shut down.

(:34). Keshe Foundation in totality will move out of Austria. For development of the technology with partnership and collaboration with major governments and corporations. Where the knowledge of the Keshe technology becomes part of daily life of every man, and plants, and animal who lives on this planet and beyond. Thanks to work of many Knowledge Seekers. It's taken a long time. We had to prove step by step and we have reached the point that, now we should be able to deliver technologies which is developed by you and knowledge of the Keshe Foundation, as Knowledge Seekers. In the next 24 hours we'll run a test for addiction, and more than hundreds of you have joined this structure. We want to see what you feel in next 2 or 3 weeks, has there been change in your addiction? Have you changed, or have you felt even an addiction that you were not aware of, has been changed? The session which goes on tomorrow, in 12 o'clock Central European time for addiction, will bring us a new knowledge. As I explained in the past, you look at it for addiction, we look at it for the progressive development of our technology and structure in the upcoming developments. If you are addicted to kill, to eat, when we put you in the space, the one Soul you see on the other side of the dome is not food. And does not look at you as food.

(:36). We don't create new systems of what we call, gun policy, to be ready to kill and kill more, that we bring peace. We teach you, you are equal. And the others on the other side of the dome in space are peaceful. They don't have mouth, they don't have a stomach to eat. It's not that they don't have the stomach, they don't have a physical stomach, that they need you to be digested. Now we understand, with the understanding of the new technology. And now we understand with development of new technologies, we have no choice but become man of peace. As peace is time and the place where man has no needs and no worries for the needs that he might have. Many of you, many of you have been wondering when this technology is going to be, what it says and what it does. Now is the time. Now is time to deliver those technologies, step by step. As one said, we see it, we understand it, we know what to do with it. Will become one of the basic structures of many of new organizations and the works which has been done and will be developed. As I always said, if you look at the sands in a desert, the knowledge up to now, what we learned, is one of those sands in that desert. We should not be proud that we are the sand, we are a sand which has enough knowledge of the physical world of the man.

(:38). The rest of the sands in that desert is the rest of the knowledge of the Creation and the Creator. In your cycle of sand, how many of the other sands you come in touch with, that you understand that there are so many in the desert? We have opened that sand, that grain of sand in the desert, in the

desert of the knowledge of the knowledge of the man, that the man becomes aware of the desert he's in. The desert of his own ignorance, but the vastness of the knowledge and the others which are in that desert. We need to learn, we need to understand and we need to understand the principle of the Creation that we understand how every grain lives and works on its own and how we can move into and understand it and move out to bring them to see how we live. There is no difference if you look at the number of the sands in the desert and number of the stars in the sky. Maybe there are more stars in the Universe than there are sand grains in the desert. Then you understand, even as a dream, now we have the capability to understand the totality of ?? some. And in time maybe a little more than some. And this should not make us proud and ignorant to the fact, that we know nothing still at all. In a coming time when you become, and your children become and your grand become the travelers of the space, the true way, teach them one thing. (:40). Always be humble that you can receive. And not arrogant that you cannot give. By receiving you gather strength. By receiving you gather knowledge. By receiving he becomes somewhere down the line maybe just about equal in the knowledge of the Creation, if you can meet with every grain of sands in that desert. For man to gain the total knowledge of the Universe man has to travel to every single Universe, and every single star, and every single planet, and every single life on each of the positions in the Universe of the

Creator. Because each one is unique, each one has his own principle of the Creation, it has own condition and it has its own dimension in the world of the Creation. And without one grain of sand, you cannot have a desert. But with a collection of sand, you make that desert. In the desert sand, we don't see any difference between the sand. Unless we pick it up and observe it closely. As they say, to find a matching stone, matching grain in the desert, is like trying to find a matching snowflake. So, every grain is different, even though they look the same from outside. And for man to learn the knowledge of the Creator, you have to learn about everything about how that brain was created and what lives within it, (:42). and how that structure of the life has given it the manifestation of the physicality. Then you understand. With all the knowledge which man is proud of achieving, we have not even become that grain of sand, let alone the grain of the desert of the knowledge and creation of the Creator. Once we understand this, we start moving forward. Once we understand that the knowledge we gain is part of the knowledge of understanding the totality. Once we understand how the interaction of the fields leads to what condition, then we become part of the knowledge that by working out, by comprehending, we add to the knowledge of the others, that they have access to us unconditionally. In a way it becomes us, in a way it becomes the "Soul of humanity" that teaches the Soul of the Universal Community as a whole, what we learned. Be it what we learned

from the fish, be it what we learned from the trees, be it what we learned from the sand. When you look at the new knowledge, and now that you understand even a stone, even a sand has a Soul, then you have to carry that knowledge within you from Earth, that when you live with the others in the Universe,

(:44). you can transfer that knowledge. Then we come to understand the Totality of the Creation. Then we become humble enough to understand where we are about to go and what we are about to learn. And then we have to understand, what will be the next step in development of the science and technology for us. Which way we decide as Knowledge Seekers and the collaborators with us, to where and how to share this knowledge that we all understand. We need to develop technologies that we can communicate with the Soul of the plants. We can communicate with the Soul of the fish, and the dog and the cat. Then we understand we can communicate. If we cannot communicate with our own Soul, with the dimension we are born in, how do we expect to communicate with those of the space? In the next few months and years, man has to understand how to communicate not verbally, through the Soul with the other creatures of this planet, which were us up to now, they were 4 legged walking, or they were going up the wall, and we ?? picked their fruits. We need to understand this, we need to comprehend. And then, once we complete, accomplish, how to interact with the Soul of each other, how to

interact with the Soul of the other creatures of this planet, how we respect each other's Soul, (:46). then we are ready to enter in the world of the Creator in other dimensions, to be able to interact with the other Souls of the Universe. Many of you, many of you will come in the next few weeks and months to question your own integrity of the knowledge. Many of you in the coming months and years will question yourself, what have I understood? What have I missed and what I need to understand to become part of? If you want us to ship you into a fish tank, you're quite welcome. But if you want to become true passengers of the Universe, you'll have to learn to let go of the dimension of physicality of the man, and live and exist in the dimension of energy of his Soul. Then we have two tourists, physical tourists and the Soul tourists. And what happen if the husband wants to go with the Soul, and the wife wants to go with the physicality? What are the future mayhems we shall see? And what will be the structure of our governments to allow which and which. We will see a total change in approach of the, what we call, the funny passports, and no entry visas, and the rest of it. I don't need you to issue me a visa to enter your airport, (:48). as I'm already sitting in your pocket as an apple, because I decided to be an apple in your pocket. Do we need now to issue passports and visas for every apple and orange and every bird? Now you understand what this technology has brought. As I said many times in a very clear way, do the birds which migrate, have a passport on

their tails, passing every border, starting from Siberia to African destinations? Do they present their passports when they land in South Africa, coming all the way from Europe? Sorry, have you got vaccination, otherwise you cannot land, go back. Now man is in that position. With the development of the new technologies, with understanding of your effect and the power of your Souls, I wonder how many of you have a Soul passport? And how would you show it? The upcoming changes in the world of technology, and transmutation and transportation will create not a headache, but a freedom for governments. What I call, international, national taxation for providing services, well, that's on the card. It's a reality of it in the next few years. Where collectively all the areas, whatever your country call yourself, become responsible for collective care of everyone. Because with the new enhancement, what we call, health unit, (:50). we don't need to move to a hospital to get a better service in Germany than we can get in Africa. Because now we get the same service in Africa as we get in Germany, because doctors of the Keshe Foundation are there to provide you irrelevant of your nationality, time and position. As I said in our talks with the people of the government very recently, your nation is awake 8 to 12 hours a day. The systems are workable 24 hours a day. The same system in your country, now after passing of the time of the day here, are usable by the rest of the people in other continents which their day starts. Then we see international

collaboration and setting up of the systems for healthcare and food become part of "One Nation." I built the structure of this technology as One Nation, One Race. In a near future, governments which use the food, and the green and energy as the means of control will live in the doldrums of their own dreams. With one App you get the food, with one App you get the medicine, with one App you get the energy you need, and that App is free. And then who can control it? Then who become the governor? Then it becomes for those who control the totality, to deliver the totality. When a nation is not worried about feeding its citizens, when a nation is not worried about the energy to deliver to its citizens, when a nation can deliver the health care and welfare at any point to its citizens,

(:52). that nation is at peace. That nation will find comfort. You don't find no one robbing no one to eat, we don't find someone selling drugs to have money to eat, and then we find out most of the addictions of the man, by being provided for, becomes irrelevant. The world without addiction of killing to survive. World without addiction to destroy to possess. In the next few months, you will witness one of the biggest industrial revolution in the history of man. In the next coming up weeks, you will see step by step how the progressive development of the technology will become applicable to many people through the interim use and understanding of the technology. From where we sit today and when we look at the next 10 years, most of the government's

budgets will go through the window. Because you don't need to allocate money for food that your nation is fed. You don't need to allocate money for energy that Arabs can hold on to, to charge you more, for the king of Saudi to have a better women, nicer women and more of them in the same bed. That's all we've done. We have, we have given with our rights to work day and night to pay for the fuel for these people to become the abusers of the man himself. When you can have all the energies, Arabs can sell their sand to themselves. (:54). These are not talks. These are, as we see in next 5 or 10 years, now becomes a reality of what we call, One Nation, One Planet, One Race. Equality to access to the basic amenities through the technology. We set up this through the system we offered you a few months ago. For health, this, for food, that, even those we put up in a very near future, will be revamped into a very effective, powerful way to deliver. And this will come out of disasters, not out of the pleasure of the world leaders and governments. When we see another massive earthquake. When we see another massive flood, where people know the technology is there, they just call their family, get this App, you'll have food, get this App you'll have medicine, get this App you'll have energy. You don't need to die under the earthquake, which happened in the desert, or in a snow place and die of hunger, lack of medicine or frost. And then this become natural process as more and more will get access to it. It's the responsibility of the Keshe Foundation Knowledge Seekers to deliver these technologies

today, not tomorrow. And we've done our best. And we are on the verge of breakthrough to achieve it. But we have to play, as I call, two horses at the same time. One gradual introduction of technology that majority of the population can understand. And one the "fast track" that the advancement technology can be understood by some that those who come in a slow course can join it in next three to five years to join a fast track.

(:56). I was privy, or I was put in a position in the very recent past, without anybody knowing I was just a bystander sitting outside and there was a discussion which with men of military at the highest level. And one said to the other, we have the latest so-and-so from America, and by the law we have to fly 35 hours a year, our pilots have to keep the standard and our certification. He says, all our pilots maximum flown last two years is four hours, we don't have the fuel, we don't know why we are buying these things, which we don't have the fuel to fly. Tens of millions paid in the debt of a nation to protect it. And those who are trained to protect it, don't have the money to train and live with it. Very soon we'll pay visit to the runways of the nation's military bases, to watch these obsolete F-18s and all others. The drones which could travel and do whatever they like. Because you sell a F-17, F-18, F-16, we don't need to fly it anymore. We just create a field that the pilot does not even want to have a fight. He will land, he says, take the

aircraft, it's yours. Even they bring electronic remote,

(:58). we can change the essence of the emotion of the drone. We don't need to capture it like on December, in 2011. Don't forget, even the chip, through the interaction of the fields of it has a Soul. And when you get that information to the Soul of the chip, goodbye. I'll explain to you something for the first time. And I'm sure my colleagues and friends will kick me for it. But let me tell you a secret of technology. When you capture a drone, through the process of the Keshe Foundation, and in the long term hold to land it, you'll find out something very strange. In some of the reports, when the Americans got trapped by the fields of the submarine and aircrafts, of what we call, the Russian Air Force, in May, a few years ago, this was not revealed by the Americans. Because they were ashamed to say. But, by those who captured the drones of the Americans and now can do it like catching a fly. You find out one thing, we can copy the chip on every latest drone we capture. It's a very simple system. You literally put it through MRI system,

(1:00). and you rotate it and every circuitry Americans spend billions of dollars to create for a drone to do certain thing is in the chip. But there's one problem with this chip. When you put it through magnetic field of the capture, it all gets screwed up, the chip burns out, the chip doesn't burn out, it becomes what we call, ineffective. Because the fields all connect to each other and there is no field. You capture a drone with the

latest chip technology in it, but not flyable. Don't forget, the American 24 and 7 soldiers of America, when the "Donald Duck" arrived in the Romanian port, they told us, but nobody understood, that the officers could not even talk to each other on their mobiles on the board of the ship. Because their mobiles are all short-circuited. And if you keep it long enough, as Knowledge Seekers you know it, they get Nano coated. So, when a nation like Iranian forces capture the drone we get a Duck. Literally what happened to Donald Duck. It's a shot down duck. Americans would not tell you this, that we got their ship back, it's perfect, but electronically it doesn't work. They even couldn't understand how this works. It's the first time we explain to them. The magnetic fields created by gravitational fields, by the frequencies, (1:02). creates a short circuit of the fields and the system does not work. Magnetic field trapping. So when you want to copy the chip, you put it in a MRI, you make a copy of it, but the copy works now because you have the original, which is short circuited. But in the new one, you don't see short circuit. Because it's a new chip. So, as I said through a message to the American administration at that time, we can give you your dead duck back. The systems going through new space technology has to be developed in the way that electromagnetic field, plasmatic fields, cosmic ray fields, does not affect their operation. And there is a way to do it. What you put in space, has to come back to you, not to be effected by the fields of the space. This is the reason we developed this

technology. At the speed of light and above light you pass through many field strength, different strength, different power, different combination, different direction. One like positrons, like electrons, one, another. You can't have the condition which once we put the American drone through, it all looks good, but nothing inside it. That's why we put it on the platform to show it, we couldn't fly it. Now you know why the Iranian put the drone on a platform and they showed it in December of 2011. Because electronically it was un-flyable, because by capturing it electronically, (1:04). plasmatic magnetic field ?? wise, we short-circuited everything. But now we can sell the drones cheap and new, because we just put every single chip, we copied it physically, and now we can make it. The same Americans took the Donald Duck back to America, and they found out, sorry, it's just a drone. They brought parts and replaced it, and it worked. But never understood why it didn't work. Because higher field plasma condition, those little fine wires, which is drawn by microchip lines, they are very sensitive to high fields of plasma and they Nano coat themselves. They become isolated, insulated, superconductor. Which means, they don't work. So, in the development of the new Space Technology, we have to consider all these. We learned when the drone landed in Iran, that, uh-oh, we have a dead duck. Don't worry which I tell you this, because Iranian government released my name as a man behind the development of this technology, February of last year. So, I'm officially known to

be involved with these kind of technologies. And Iranian television in the past few weeks have released 10 or 15 minute program showing me as the new father of the new space technology of Iran. So, it's not a secret. So, we can tell you how 10 years ago, after we said on the what we call, 3rd of December we're going to show the power of the technology,

(1:06). on the 4th of December we captured the most powerful toy of the American president. Obama said, can we have our toys back? Up to now was the most advanced drone in the world. But the question comes, do we need to spend money on the useless defense technology which has no use anymore? And then we need to go into the space technology which is real. Do we need to fight, or do we deliver the waves of love, and care and harmony to the pilot in the fighter which is heading to drop a bomb? It turns back. I'm there to defend my territory, I'm not there to kill. You've got to understand, now with this new technology we are entering a new era of understanding the emotion, and the Soul of man and the creatures. And we need to learn that to be able to survive in the space. We need to do that to be able to travel the depth of space. We need to understand the working of the Universe. Then it comes to the new position. That, how do we take next step? And would we use the new opportunities created for us to show the new ways of thinking, and to show the new ways of living that it bring that change? In so many ways, in the next few weeks and in the next few months you will see a change in the attitude of

the world leaders due to manifestation, presentation of the new technologies. (1:08). Which is based on the development, understanding of the plasma technology and not exclusively by the Keshe Foundation. As now we open the doors of flooding the world of business and technology with a new knowledge, with a new understanding, Knowledge Seekers, new scientists as Knowledge Seekers will speed up the delivery of the technology, speed up the understanding of the technology and spread of the plasma technology. We don't see many, what we call, the industrial revolution tools of understanding the work of the steam engine anymore. Except when we go to sauna, we want the little bit of it on the fire. The same shall be the present technologies which we are used to at the present time. In the coming weeks and months, new doors, new opportunities, new tools, new ways for development and delivery of technologies will be accepted and done by the governments that will bring that change. A new era in the world of science of the man, understanding the work of plasma, delivery of the plasma and new dimension and directions. New universities which teach the real work of the Universe, not the way we were fooled by Einstein. A smart Jewish boy, but unfortunately like the rest belongs to the ?? wall , and bang their ?? heads till ?? doomsday. In so many ways, in the coming weeks and time, many of you as Knowledge Seekers will look at the knowledge and science in a different way. As you become more,

(1:10). as it becomes more in the domain of public, and the explanation and use of it becomes more public. Maybe, maybe it's time to start the change. Maybe when you as the members of the Keshe Foundation met with the world leaders, not as subordinate, but as those what you wanted to bring and change, has come to flourish. Let's see what time it is. And let's see what man will decide to bring as a change. In the second, third quarter of this month, this year, we endeavor to land the first two people on the surface of the Moon. In the dimension of the Soul, in the dimension of them deciding manifestation of physicality. And then it will a mass orders through governments and operations, once the one is shown, with the others. We go for a break and we come back, and we listen to what your questions are, and we can enlighten each other with the knowledge of the future. Thank you very much Rick. If you want to go through a break.

BREAK >>> 483 KSW April 27, 2023

## Part II Q&A

(1:18). K- More or less, yes. There are a couple of things I've been asked to raise some points here about. The list we put on, now you see on screen. We received donations to supply very large numbers of products as a donation to Knowledge Seekers who could ask for it, it was there, it was paid for, all you need was to ask for it, if you could

have it. We have fulfilled all these donations and requests. These are the balance of the items which are left to be, still to be donated. It's been paid for. If it's yours. Just don't ask for it. And then, just for the sake of having it. If it's of use to you. It's like the Gans education travel kit. It's so many, it tells you, one kit left, Gans household reactor, one piece. Gans household reactor, it's four of them. Keshe Gans pants long XXL it's one piece of the donation left. And there's another one, two of them. So, we have two ?? hands left of the full lot. Household reactors, four of them. And one Gans education travel kit. This is a small kit for, what you call it, children or if you're starting. So out of a huge number of donation, this

is what is left to any of you, have any interest in or have a use for it. Just don't get it because you can ask for it, and it's there. Somebody (else) might have a use for it. And so, be generous for what it is. We received some donations for, or from others,

(1:20). they paid for anyone who wanted to be part of the, what we call, the trials of tomorrow for addiction. Everything has been allocated, whatever comes to us, we have allocated and we have delivered. Most of you receive most of your products, what you ask for in the next few days or weeks. As the things comes, most have left, Keshe Foundation, it's on the way to you. And if there are more people who would like to donate to the Foundation, say what they want to donate for, we put it up and you can make a, what you call it. These are all postage and package, everything has

been paid by the donator. It's just that if you have a need for it, There was a very large list, now this is what is left. And all been sent, allocated to, to go. And we still have those few paintings, we received some ridiculous offers by a couple of people, which we would say, we leave it to you, you're conscience. They are still available, if you want them, they are in Keshe Foundation Exhibition Center. And we still look for donations. Do not forget, those of you who've been donating or sending money to Keshe Foundation Holland from outside EU, now this account is closed and it's transferred to the Keshe Foundation new accounts. Which if you write to info, they give you the new accounts where you can make the donations to. And wherever you buy. Any purchases from outside EU now, will go through the new account system and not through the Keshe Foundation Holland. If there are any other points which we can help you with, you can raise a question. But primarily, we have to inform you the Keshe Foundation Austria, (1:22). the Exhibition Center, within next few weeks will shut down, totally. Operation, we moved the systems and our equipment into a new location, to one of the largest city in the world. We are relocating, that more people can see, more people can have access to. And ?? one of what we call, "flag ships" of the new technology and development exhibitions. And we will inform you, as it's done in next 2 -3 - 4 months, when it reopens in a position and destination. And how it's going to be set up. And we move totally our

operations out of the nation of Austria in the coming months, as we cannot operate in that system which is run, and the way we now develop our technology in a different way. We are still there for a few months to come, but Keshe Foundation we ended up in Austria by accident, total, something out of control. But it was the best thing happened to us, in so many ways. We came across some of the most beautiful Knowledge Seekers and this process now moves. It was not ever planned for us to move to Austria. It was done on the betrayal of, in marriage and we saw it. We were moved there and now we are moving back to a proper structure and we'll see what happens in the coming time. So, we're going back in a stable position and for a long term with a beautiful hopefully Exhibition Centers which many of you can come to and see in one of the most beautiful capitals of the world. We will not be in the mainland Europe, but it'll be an amazing place for you to see and it's set up to bring the technology in the public domain in a very beautiful way. In time, once we finish, we'll ask some of you could participate,

(1:24). in part of the Exhibition, as you have done something for the Foundation to show the evolution of the science and technology around the world. You can still join the 200 people group. The 25 is full. Now we are looking for the 200, you can sign in and join in. And they'll be part of the, as I said, most probably, 40 - 50 of you will become one of the first passengers of the transmutation, transportation, into the new structure of the

colonies we are setting up, to become part of it. Many of you ask us, how can we join in? Just go to [info@keshe.foundation](mailto:info@keshe.foundation), and you ask for it, it will be given. If you're outside Europe, you pay to the new accounts. If you are inside Europe, you make a payment to the Keshe Foundation in Holland, to what we call, further notice. And then Keshe Foundation moves totally, it's structure on work, in a totally different direction and dimension, as it's announced by the governments. Most of the moves we'll make in the coming time will be in cooperation and collaboration with national governments, and this is the way we want it to be. And once we achieve and complete it, we... you will understand that Keshe Foundation has become an international organization, and many of you work towards it and we are hoping to complete in the next few weeks. And in that process many of the Knowledge Seekers around the world will become part of the work of the structure. The only thing is, just because you're a Knowledge Seeker does not give you the "God-given right," as we call it. You have to be whatever it is, excellent proof that you can do, that as normal work in the new organization, (1:26). and we have to carry your own, what we call, "load on a string." If there are any questions let's answer and then we go to the next one.

Q: .. Hello Mr. Keshe, in trying to visualize single rays to better understand total plasma basics, my questions are. Question one, let's say we have two rays in the same environment, the environment is in the strength of a Hydrogen, one ray is in the

strength of a Carbon, and the other ray is in the strength of a Bismuth. Which ray is bigger and which ray is smaller? And is the difference between them in this environment just the size? K- First of all, this is not the physicality that the size counts. It's, you have to understand. Go back on one of the pictures, I think it's book three. And somewhere in book 2 there's another relevant picture. Does not matter if you have Plutonium, or Carbon or whatever else. Doesn't matter if it's a Hydrogen, Oxygen or whatever environment, magnetic field environment. You always have interaction of the fields with the others, and the friction and the division, what we call, the sparks, with it. So, you can stay in the strength of the Carbon, but in the interaction with the fields and density of the fields, (1:28). the Plasmatic Magnetic fields, you create subdivisions and above divisions fields, that you get the spectrum of all fields, even though you're in Carbon. And in those interactions, let's say you put them, and then it has the same interaction, same environment, parts of the fields of the, what we call, equal from both rays, will interact and create a condition of balance. This is part of understanding the work of the fields. When a ray goes through an environment of Hydrogen, you call it, it's magnetic field Hydrogen, it's not in the matter state you talk. If it's a matter state, it hits, absorbs, release energy whatever. But if you talk about environment of the magnetic field of Hydrogen, and the gravitational magnet of field strength, then you see a spectrum of different

fields. We've seen this, we tried to publish this in the Book, in the, I think it was in the first Book, where we show the Raman spectroscopy. When we brought the infrared spectroscopy and Raman spectroscopy data out, we saw a massive range of fields released from Hydrogen to, above Plutonium from one ?? ray, one field, just the CO2. So, when you understand this, you look at the totality, you don't say which has. Because that, whatever you have, in comparison to the other, can actually be in more interactions with the Hydrogen, than the Carbon.

(1:30). Then it has less, because it's not the interaction of Carbon, and whatever the other material is. It is interaction with the fields of the environment. And then those fields with each other, which dictates the condition and the field strength. In so many ways, you could have a Carbon in one environment to be the strongest and you change slightly the Hydrogen field strength, still in Hydrogen to one of ??, or to interaction, the Hydrogen loses the environmental energy to another, then you find out it becomes weaker. So, when you look at the plasma interactions, field interactions, you have to understand there is not singularity in the environment of the test, or observation, or which one is going to be stronger. It's not anymore how many Carbons you have and how many Oxygen's or Hydrogen you have. Is what is the field interaction in a given dimension and direction in the fields. Then you always look at the spectrum. And this is one of the ways that production of the cosmic rays we look at. In

technology development we are fully aware of these things and we use it. Any other question?

Q: .. The first question was about rays, (1:32). the second question is actually about two plasmas. So he says, let's say we have two plasmas in the same environment. For example, in one jar of water we have Gans of Carbon, and in another jar of water we have Gans of Bismuth. Which single sphere of plasma in this case is bigger and which is smaller compared to the other?

K- It goes by the same rule. R: It's kind of a trick question because it forces you to answer in the physicality, but you want to answer it in terms of the fields. K- We are in the field dimension. It's like when you, I'm sure many of you have seen it, and we talked about it many times, when you put two Gans's, especially CO<sub>2</sub> or Zinc, next to each other, you see that the one gradually column goes up on one side. I don't know if you've seen it.

When you put two bottles or two Gans bottles of different material, one of them gets pulled up to the side and it goes up the glass, which is illogical in the world of physical dimension. But in fact as a... Pardon?

R: I was going to say, yes, we've seen that in the Keshe Plasma

Reactor Group a few times over the years.

K- Yes. So, you cannot speak about plasma and try to fit it into the ?? matter world. It doesn't work. You cannot be "camel bird," and call yourself ostrich. You have to decide. If you're talking about dimension of the bottle of a Gans of this, bottle of Gans of that, you have to find out what's the

interaction. So go and live in one and, or the other and compare what happens to me in this one, and what happens in this one.

(1:34). You, this is one of the biggest problems we have in Keshe Foundation. And, with many, many scientists I've been on the table. They try to fit a plasma, understanding of a plasma into the material state, and it doesn't work. This doesn't fit the law of physics, we understood, we've been taught. Yes, because you cannot mix oil and water together, how come you understand that? But you cannot understand you cannot mix plasma with the matter state, unless you bring the strength of the plasma down enough to manifest itself in the matter, then you can say what it is. It's exactly what happens in your blood. In your blood you have Iron, but it's not pieces of Iron coming from a nail. It is Iron in a plasmatic magnetic field of the vacuum of the body of the man in his own condition of the vacuum, and then when the man pulls it out now you're in a matter state. It's exactly what I told you when we send you to the Moon. When we send you to the Moon it's the reverse. You are inside (a dome in the) atmospheric condition of the Earth, outside atmospheric condition of the Moon. In this world, why all our sciences are "upside down," as we call it, we are outside and we go inside the body of the man, we take something from inside and now we want to fit it to us. It's not that. You go inside the blood, you see, if you see a single Iron atom flying. You see it as an energy, you see it as plasma. And this is where there is a huge problem in the world of

science today for people to understand the plasma technology. Plasma is a plasma, matter state is a matter state. What happen in the transition? But we take a blood out and we can count Irons in it, (1:36). and Calcium in it. Yes you can, because you change its environment. In this environment this is what it shows itself energy of Calcium, it was a Calcium in the matter state. So, we have no choice now, we open the space technology, gradually ?? we'll come to understand it. Which environment, what field strength, what gravitational magnetic field, what Inertia is involved in us manifesting the energy as a Gans, as a matter state? And if you don't get confused and understand this, then you start progressing forward. This is why 99% of you as Knowledge Seekers have got stuck with the MaGrav units and don't understand it. Even our own Knowledge Seekers have problem with this at the highest level. We took, I explained how a MaGrav system has to be made. We got our experts to make it. And they use old systems, which shows already reduction, but they did not do it the way we asked it to be done. We tested, doesn't work, zero. But when we looked at the structure of field flow, it was not the way it was told to be done. Our, another team has restructured it the way it was supposed to be done. Now we see MaGrav reduction, magnetic field increase and reduction in electricity bills. Because you have to follow everything as a plasma, not (only) when it suits (you). 99% of you which made the MaGrav and doesn't worked,

(1:38). you have not understood how you yourself have put a "spanner" (wrench) in your work. We have not understood even though it's in the drawing of the... it is in the drawing, but look at it the way is done and then you find out. How come some of you have a huge reduction and some of you, oh, it's all fake. The fakeness is in your knowledge, not in our technology. And this is one of the biggest problems. Because you try to fit a plasma technology, which is created by the matter, into the matter state which doesn't work and it doesn't exist. Any other question?

Q: ..About the first two people on the moon, will they be able to bring back evidence when they return back on Earth?

K- We hope so. They are a couple, a husband and wife, and we hope, yes. Don't forget we tested this in Knowledge Seekers. He could be listening himself. One of you Knowledge Seekers, when you came to Linz, he said he's in the Moon, he went to the Moon, and he could feel the stones. We put him back in the machine again. We said, okay, can you pick up the stones and put them outside? And we watched him. He was actually physically picking up the stones and putting them outside. And we asked him to drop it. We were not ready. Today we have the machine, we have this technology, we have developed it. That if he would have put his hand inside what we give him to drop it, you would have seen the Moon stones.

(1:40). Now we have the technology, we develop the technology for this purpose. So, .. now that we have the what we call, the tools of conversion,

because we dictate the whole understanding of Inertia. Yes, whatever they collect, we can manifest as a matter state when they land, when they come back. And basically, the biggest thing for us will be to send the people from excursions to the position and the place where Americans claim they landed in nineteen sixties. Would we see the remnants of the Apollo? Would we see the flags? Would we see the footprints by now as long gone, as the dust is covering them up? And what would the Americans claim? Oh, it was there, the Moon dust has taken it. Out of 2 or 3 landings, we should be able to see the truth. And that is in the next few months. And we hope, we hope we haven't (been) taken for a fool. And we hope it's they can stand it. So, we give a notice to the American NASA organization, (1:42). please come up straight, because soon, in next few months. There'll be two German and a Russian, checking out. And let's see if a lot of claims of "false flag," and really done, and it's all Hollywood scenery, and it's a reality with the sand and the stones, become a reality. As I said, when I was invited, I went to Iran years ago, I went to the building you see, the symbol of Iran, the Freedom Square. Underneath there, as a child of very, very young age, I went and I queued for hours to see a stone which the American gifted to the Iranians and was put there for display, to see. I wonder if I wasted hours of my life standing for a fake stone from Arizona desert, or was really truly a stone from the Moon? And our travelers in the next few months will tell us. It's as simple as that. We know

some people, what you call it, will claim that the Americans never been, some people say they've been, and all beings now become to being, as the new technology delivers. Any other question? (1:44).

Q: .. Thank you very much for your presence among us. Please correct me if I'm wrong. From what we learn from you, our planet does not provide all the energy that the beings that inhabit it need, because it was created with the wrong intention. The Creator of our planet and the other planets in the Solar System is the Sun. So did the Sun have the wrong intention in creating the Earth? What was wrong with the Sun's intention at the time of Earth's creation? If all creatures on Earth are created with the same wrong intention, and that wrong intention cannot be carried to other locations in the Universe, can we only leave here when the entire structure of the Earth is corrected? Thank you very much.

K- There are two questions to ask, and maybe this will answer it. There is something, because I have to tell you before we go. All you Brazilians have lost your Telegram chats due to the court order in Brazil, that none of you can use Telegram anymore. And you all migrated to Zoom for your common, what you call, connections and whatever, knowledge sharing. Those of you who come through Zoom, you may ?? have not noticed it from Brazil. This has happened, and it's a court order, nothing to do with us. The whole of Brazil has lost its Telegram by not following their, whatever you call it, court order, delivering their

IP, what you call it, private information of people, (1:46). or their communications to the government. So what we see, we might see reduction or total loss of the Brazilian, Brazilian outside Brazil communicate with the Brazilian channel, they all have migrated to the Zoom of the Keshe Foundation channel which is set up by Rafael. Answering your question. We need to understand the principle of the work. And we need to understand the interaction of the fields. Many of these questions is just a repeat, and repeat questions. And what we see, the Keshe Foundation knowledge has to be understood in its totality. Then many of these questions, what even you're asking, it's a third, fourth, fifth time you hear. You'll find it in the archives of the Keshe Foundation. Any other question? (1:48).

Q: .. Last week you said when the gravity of the planet is formed, the higher order absorbs the lower order or weaker strength fields and then mass is created. What does higher order mean? Because doesn't the stronger give to the weaker? But in this case you are saying the higher absorbs the weaker and creates plasmas.

K- The understanding is when we call it, the higher order. The higher order fields, stronger fields dictates the gravity, the level of the gravity. In order to create gravity, you need both field strength, magnetical and gravitational. And the highest order it's a field interaction. So anything when we say absorbs, it means below that strength is already covered within. So the highest order that

the Earth's gravitational field can absorb and we know as a data of material, let's say it's Plutonium, whatever we have up to now, few elements further up the, what you call it, in the table of the materials, in the Periodic Table. Wherever you look at, this is what we can. They tell you is so many percentage and the rest, we call it, exotic. So, anything below the last material we can physically, we have actually observed to be able to detect on this planet, is the highest order, strength field.

(1:50). And the other elements above this plasmatic field strength, that exist in other planetary system, in other part of the Universe, but Earth does not have within its strength to be able to interact with them to pull them in. Because collective fields of the Earth are not that strong to that strength to be able to absorb. The same is below sub-matter Hydrogen. There are fields which they can manifest themselves as a matter state below Hydrogen. But we do not have the field strength to absorb them. So, we don't see them as a matter state of subatomic structure. And when we say the highest order is not to give, is to include, to be able to absorb. If you are mono energetic, plasmatic field, you are like a star. When you are a composite, the highest field strength dictates the gravity, and the fields of the gravity and the strength of the gravity from fields of that planet. Because it cannot absorb. If your gravitational field does not go over the strength of the Copper, sorry, on that planet you won't see any Zinc. It does not have it to absorb it, to interact

with it, to create it. (It) does not possess it to create the Inertia for its manifestation in matter state. That's what it means. It's not that the higher gives to a lower, it's understanding the creation of fields, and their interaction and creation of what we call, the plasma. And at the same time for it to exist through interaction of the mass to what we call, the weight interaction or what we call, the weight interaction equal of Inertia allows the manifestation of matter state of that field.

(1:52). If you don't have the Inertia of a given material, you cannot manifest it as a matter. It does not matter, even if it exists in the dimension of plasma. This is why we see these creatures above the planet Earth, recorded by NASA, been spoke about it many times. Because Earth does not have the Inertia value of their field strength to convert it at that level to the matter state that we see them as a new animal, new structure. We create a plasmatic field, Inertia of them and they exist above. If you want to see them as a living things on Earth, we have not, we do not have the Inertia of field strength to extend that far, to allow them to convert in the manifestation of matter state. That's what it is. It's not that the highest give to lowest. And it's all through the common denominator field strength. There are matters we know... you've got to realize something very simple. Go through the human physiology. And whatever we have in Periodic table, which the gravitational magnetic field of the Earth has manifested to be seen as a matter state, you find it in the body of the man. One way or another, in somewhere and they can

measure it and they tell you, even it's Plutonium there is such amount of it in the body of the man somewhere. Because we create gravitational magnetic field, plasmatic field, that interacts with the Inertia magnetic field, the strength of the planet. So we, (1:54). in our body, we absorb it according to the ratio. And this is why I always say, if it is on this planet, as a matter state, you find it in the body of the man, somewhere the DNA and RNA have managed to use it to the advantage of the use, speeding of certain things, or interacting with some parts of the body of the man. There is no matter, which is not in the, which is in the Periodic table of the elements of this planet which does not exist in the body of the man. Impossibilities. We have to find it where it is, and how much it is, how minute it could be. So when you speak about the high order is what the field strength in interaction with magnetic gravitational field of the center Hydrogen, allows to be the highest order Inertia to be created with the gravitational field interaction to give the mass of the body of the entity. Any other question?

Q: .. With the new technologies that you are about to reveal in the near future, would it be possible to treat Alzheimer .. with a patient that has hip replacement?

K- Hip replacement we do not touch. We always said it and we are very clear about it the reason for it.

(1:56). Alzheimer's is handled by the doctors at the Keshe Foundation.

R: So even though they've had a hip replacement they can still treat the Alzheimer?

K- No, no, it cannot be done. Cannot be done. If you have any external motors, valves, hip replacement, because this is a plasmatic system, it covers everything. There are cases which have been tested. .. by some new cases, but at that time it looks perfect, I've got rid of everything else, but because you have started a (plasmatic) process, now, you, in the long term, you see the growth of the bones or hip bones. And then, because it's weeks and months later down, you got your memory back, but now the bone is growing and then you have another hip problem. Because you create... We know what is... At a time this is... This is clarity about the knowledge. This is not doing what the present pharmaceutical does. Present pharmaceutical, data research from Canadian government over 20 - 30 years, tells us clearly, people over 55 who go through chemotherapy, research papers published by the Canadian government, through the universities and research development centers, majority of the people, a very large percentage, die within 5 to 7 years after chemotherapy. And they studied this over 20-30 years. And then the pharmaceuticals never tell you this, because they cannot tell you, we're giving you death sentence 5 years, or 7 years. Chemotherapy is beautiful, yes, my ?? thing.

(1:58). But due to the process of the aging, reduction in the strength of the bone marrow and the rest, all these people die of a very simple cold. And they say, oh, he died of a cold, not from

chemo. But in fact, chemo caused blockages of the holes of the bone, which led to low immune system. In this technology we can't do this. We have to be transparent. There are knowledge which is there, there are technologies which is there, which in conjunction with us can create new conditions. And with the knowledge we have, we have to stop it. We are not there just to... We are a Stichting (Dutch word), we are a foundation. We work through the structure to bring benefits and understanding, not just getting things done. Even when tests done by our doctors or we've done things in the past, we inform fully what could be the consequences of it. Yes, you cannot use because long run with the plasmatic fields in the body of the man, the growth of the bone is a very high possibility, and then what happens with the extension of the hip you put in. If you haven't done a hip transplant, I know our doctors are busy with case like this. You see if the bone marrow can help with the cartilage to grow and you don't need to change the hip and the rest of it. Then yes. We can look at different things. But if you have Alzheimer's and hip replacement, sorry, the truth is, through our experience, bone will grow. Because now they found the fields of the strength within the system, that allows them to grow. Because they usually naturally grow. This is what happens when you're a baby. (2:00). You don't, you're not born out of the womb of the mother with 10 centimeter femur, and when you are 50 years old you still have 10 centimeter. Bones grow. So that's a habit of the structure.

What was cut off now they want to cover, and then they (bone growth from plasma) push the prosthesis or whatever, out. And then they create, they break the hip bone. So this is the reason we say, at the moment with the knowledge we have, no. And this is what I said to the officials from the government. With the new space technology which we bring in, if we bring you, as many of you been offered this, but you never understood what was on the table to you. This cover of the, what we call, the policy of the Keshe Foundation. If you go into prevention, so if you put, let's say, 1 million people on prevention today, 10% have cancer, 10% have a heart problem, 20% have Alzheimer's and the rest of it. Out of this, let's say 1 million people. Some of them are at the early age, they have none of it, but they go through the process of prevention. In 20 years time, those who came in at the beginning of the process, will die off. They are 50, 60, 100 years, 80 years old and they die. But those who join in at 15, 16 as part of the family, now they have no more diseases. Because they went through prevention twice a year. So, we'll see less diseases over 60, 70, 80 years old. They live a very perfect life. Living a sick life in a coming decades it'll be unheard of. Most of the diseases today we suffer for,

(2:02). with especially now what is coming in with the collaboration of the Keshe Foundation with the major governments around the world, we will see reduction in next 20 - 30 years of the number of the people being ill of the hospitals. Because the new generation has to go through prevention

regularly. Fix it before it becomes a problem. You don't have the problem in 20 - 30 years time. When you have a hip injury through a football game at age of 25, in the age of 30 - 35 40 it becomes a hip replacement. When you've gone through the process, you know you have a hip repair bone, and the prevention technology has been used to re-grow the cartilage, you don't need a hip replacement 30 years down the line. The world of pharmaceutical and medicine is going to be radically changed in the coming time. When you have a problem with your son, you cannot handle it, and then 40 years down the time it becomes a prostate cancer, when you go through a prevention, even you join (KF policy) in at the first year of your marriage, before you had the child. And then you had the child and you have a problem with it, it's already psychologically through the process has been ?? filled. So, reduction in the hospitals, reduction in health care, will become a thing of the past. In a way we reduce it so much, that it won't exist. People with Alzheimer's in the new generation of going through prevention, I think it will be very, very rare case. And even if it appears, technology there will handle it at the outset, not till, nothing can be seen. So, yes, if you didn't have a hip replacement and you have Alzheimer's, doctors can help you. (2:04). The new technology can do something for you. But if you had a transplant, if you had a, what you call it, any kind of surgery which physically something put in your body, we say, no, because we understand the problems it can create. Very

interesting point is that, in the coming months the wellness, welfare, the health of the Keshe Foundation will be handled by governments in a very big way. And I wonder how many Belgians will move out of Belgium to receive these cares, or try to use. We blocked all the Apps into Belgium. And they come out of Belgium, they change their passport to receive the wellness care of the Keshe Foundation. Knowing that the others have benefited by it. Our work, now, through a structure of its progress, has moved on to a very, very different way of processing with the doctors. And even our doctors are learning, because they were trained in the matter state, in the physical state. They never seen psychological pattern in most diseases. And how even you can use psychology to change physical damages. And this is a process which will take a long time to teach, and to learn and to be taught. As I said, past few weeks, the gentleman in the meeting says, the guy said, (2:06). this is against all the books written by Newton's law and Einstein. He said, we write the books for the others to learn from us, with the new technology. And we have started writing the new books. And most of you carry Book number 1, 2 and 3. The books you have, we call it, Book 1, 2 and 3, will become the basis of the new education in the world of science. Not because we wrote it, because it's what explains man will look at the plasma of the Creation. Any other question?

Q: .. Hello, Mr. Keshe, this is a big honor to hear you in this online session. I am very thankful to Pedram who introduced you to me and explained

about your precious activities. I am an Iranian woman who was diagnosed with breast cancer in 2017, but then it became metastases and spread to different parts of my body throughout the lymph nodes in 2021. For about 10 months it went from bad to worse, and although I'd been told that I am not curable anymore, then I started to research and I could stop and decrease the cancer in my body through natural ways. I am suffering a lot from side effects of the chemo medications.

(2:08). I would be grateful if I had any chance to hear from you regarding these matters.

K- Write to [health@spaceshipinstitute.org](mailto:health@spaceshipinstitute.org), you'll be passed on to the doctors responsible and they will decide in how and if there is possibility for them to support your health. Now... and this medical phase, doctors using the Keshe Foundation technology, will increase rapidly in the coming months. Then we can... The problem with chemotherapy is, it's not the chemotherapy itself, it's the side effects of the chemotherapy, which allows the cancer to spread. And you see the spread of it in different ways. If the chemotherapy understanding of its, what you call it, reduction or control of the cancer cell is, is interconnected with the knowledge of the plasma technology, there could be a lot of advantages, there could be a lot of things done with that. I'm a great believer in chemotherapy, but understanding its side effects and its problem to be brought under control of the, what you call it, cancer. It has a lot of problems. It's like the new vaccines which we see, and they say it has so many side effects for children.

(2:10). We have to find out where the side effects are and how we can eliminate it. Can we transfer it into energy that it is not there in the matter state? And what does it do? And how we can help? A lot of medicines do not do what they are supposed to do, they are just there to make money. A lot of things have a benefit, but because we don't know how to control, the other parts of it, gives us this massive problem. If chemotherapy used the right way, with, as an energy level, we can touch most of the cancers, without a doubt. But now, today the Keshe Foundation doctors are testing a new thing. We are testing a new... We will see in the next few weeks they'll report to us. They are working on it, they are testing on it. And we have introduced a new dimension into cancer process to Keshe Foundation, it's getting tested by the doctors. If we see, we think we will see a huge development to be reported by doctors. If we see that, then we immediately implement it, we announce it and bring it into public. We understand it, it's now I think the second week they are using it. Yes, the second week more or less. Now we need to wait for a data in another, most probably, 6 weeks, 8 weeks. And see the new technology developed and used by the doctors, gives us the result. And then we understand more and how we can even eradicate the side effects of the chemotherapy. This is now going on today with doctors at the, what you call it, Wellness Center at the Keshe Foundation.

(2:12). But we see, we understand it, we see it, and we have incorporated it in our systems and the

doctors are using it and we'll see what comes up. But get in touch to [health@spaceshipinstitute.org](mailto:health@spaceshipinstitute.org) and then the doctors will explain to you and we'll see what they decide. Any other question?

Q: .. If you wish, can you give us an update on Naomi's current position? We all love her so much.

K- Naomi's condition, I met her 2 years ago, in June. And there is a lot of... She is stagnated in a condition, where when I met her, I realized what is not accomplished completely by the process. And I explained that to Giovanni, what needs to be done. That we have brought Naomi out of the, what you call, field coma, but not out of the physical coma. And it needs to be done. Full instructions given to Giovanni what needs to be done. And then, due to process of the accident, there is some physical damage to her leg ligaments or that position. Otherwise she is good. She is living a normal life as possible. I know one of our Knowledge Seekers works very hard. She's trying to see how she can do.

(2:14). But essentially what we, with us being so busy with everything else with it, on my visit to Giovanni when I was in Italy, couple of years ago, when I saw them, I said, you haven't completed the job. I thought this should have been done. The physical coma is different than the neural system coma. And that has not been done, the process of... and Giovanni has to complete it. And she'll live a total normal life. This is what we call, the STM and STP and the physicality. When you don't complete a process, you do not open one of the gates, so it's there. But she lives, she lives a

normal life as anyone. She's active, she's home and very little communication. But she lives a normal life. But the physical coma has not been taken out. And there's a way to do it and they have the access to it. Any other question?

Q: .. Last week Mr. Keshe said that the Soul plans for physicality in any activity. So what is the reason for abnormal human behavior?

K- Maybe that abnormal human behavior is a Soul behavior. To us is abnormal. Abnormality is from the point of view of the observer.

(2:16). Otherwise to the one who does it, it's normal. It's very interesting when you speak to the hyperactive child, they never see themselves as hyperactive. When you speak to someone who's got Alzheimer's, they say, no, I remember everything. I say, do you remember this? No. Do you remember that? But I don't have Alzheimer's. It's a point of view. Any other question?

Q: .. Good morning Mr. Keshe, if our body is all Gans's and the food we ingest becomes Gans immediately, is there any importance to take sweets, for example, one hour before the main course or one hour after? Thanks a lot.

K- Depends on what. Some people do. In some countries, sweet comes first. They have the fruit first, and then they have the meal. In some countries we have the fruit and the dessert after. Or what we call it, fruits after. In the Iranian traditional family, you never eat watermelon after a food. You always eat watermelon before the food. Because the belief is that, we eat usually as our main diet rice, and then you put so much water

on the rice after you had the food, now it expands in the stomach. Now grains of the rice supposedly in the stomach being digested, but they expand. (2:18). So, you eat melon after the food, but you don't eat melon before the food. And when you go for a Chinese food the sweets is part of the main course. It's there, you want to help yourself, you start with a sweet, something. So, it's how we look at it. You can eat sweets before or after it's a sugar content which you absorb. Would it give it the energy or not? It's individually thought and decided and actually being a culture in a way. To the Western world, yes, we have what we call, dessert or sweet. Because why do we have, what's the reason that we introduced dessert? If you look at it, dessert is usually something sweet based or whatever, or fruit, it's because the food we eat, meat or whatever, takes longer time to digest, it takes a lot of energy, and during that time of shortness of energy to digest the food we ate, we are short, and so you go to sleep you're tired. So we take that dessert, that sugar, to cover that immediate shortfall

in the energy for digestion of what we ate. That's the reason dessert was created. Not to fall asleep after food. You still have enough energy that it's an supplement of the sugar content of the dessert will cover you enough till the time is needed for the energy of the main course pasta, whatever you ate, which is a longer time to digest. There's a reason, not everywhere around the world except in Western Europe or most of the European countries we have dessert.

(2:20). In the West we, in the other part of the world you have a fruit after the meal to do the same job. But we do it so naturally, has become part of our work that we don't notice it. Any other question?

Q: .. Can you explain how in the body is a vacuum and the body is not flat? I guess he means flat from the vacuum condition or something.

K- (laughs) This is a different vacuum, it's a plasmatic magnetic field vacuum, not extracted of content vacuum as we do in human, as they do it from any object. Vacuum condition means, magnetic field, gravitational field strength vacuum. It means it has a different Inertia position, which does not allow matter state to manifest itself, but in the plasma it does. When you work in laboratories with a high vacuum system, when we vacuum like space reactors, we don't see everything going out. We leave the vacuum machine running for an hour, two hours sometimes, to capture the last little atom it might be freed somewhere we haven't captured. Because that's a matter state capture. And on our meters we see, there's still matters going through the system, even though you're in -12, -13 operation.

(2:22). That vacuum is mean, extracting matter state out of a content, but the ball (reactor) is still in a field content, it still has fields. The vacuum to the man is not a matter state, it's a vacuum but created by the plasma of the Gans's of the matters in the body. It's a terminology used in respect to the field strength conversion to the outside. If it was vacuum the body will flatten. If you put a pipe

in your body and try to suck everything out, you'll be flat. It's like we say, space value vacuum is -12, 13 outside the Earth's gravitational. But it's full of cosmic dust and everything else. A meteorite is traveling in it. We talk about vacuum condition that matter can still exist, and fields can still exist, but matter can be part of its content. It's mixing of the terminology of two cycles of the knowledge matter state and field strength state.

R: So, Mr. Keshe, in, for example, in the ocean, would that also be essentially a vacuum condition for the field condition and so on? Or is it only inside of a living body?

K- The same. No, oceans are in a vacuum condition of their own. A field strength that allows them to exist in that condition. Even the stone?

R: Even a rock, I was going to say. Yes, exactly.

K- Yes, this is... Now we understand it's, what you call it, field strength dependent. So it can be. If you take a stone into space, another position, (2:24). it will become like a jelly. It will start moving, it has life. But on the Inertia gravitational field of this planet it's solid. It's like, you know, sugar candy. It's solid, you can't even chew it. You put it in the environment of the hot water, it just melts to nothing. You can't even see it. And if you look at the bottom of it, it's a beautiful thing. I sometimes, it just carries you out when you see. If you get the crystal sugar, we call it, and then put it in a hot water or tea and you see it melting, I mean disappearing off the wood, which is a wood stick, which is very .. if you go to the Iranian restaurants, they always give you tea with this, what you call

it, candy stick on it and they put it in the tea. And then it disappears from the stick. If you sip the top of the tea without shaking it, it has no sweetness. But at the bottom you see waves of different densities of fields, this is how it'll be in the space. You're solid in one position, but now you become a plasma field. It's just you see the wave of the sugar at the bottom. This is all it is. It's the same water, the same crystal. But if you let it, it goes cool, it doesn't become crystallized. It still sits there in that way. This is how we will, we are and we'll be in the space.

R: So is that vacuum condition that you speak of, is it a relative thing? (Mr. Keshe said -relative Inertia) Like for example, of the candy melting in the hot water, that's it went into the vacuum of, to it, it went into the vacuum of the hot water, and it expanded and dissolved its structure, but it was okay in the air. So, would the air be in a vacuum condition in that case or not?

(2:26). K- Yeah, but you see, if you put that same thing in the cold water, it might not happen, it stays there for longer. Once we create a partition, doesn't matter what it is, we create a new environment. And the wall of that containment and the content of that containment, dictates the new environment and condition of field. You see this with caustics, when you make Gans's. You don't use hot water, you just put the Gans's, you create a different field strength and you see how fat sits on top, how Gans's move inside. And if you understand this, that you can create different field strength, now you understand new construction

technologies which (will) come forth in the coming time using plasma. We see it, I say this, in next maybe 5 or 10 years now that we are moving into a new dimension of technology development. If you get a wall of let's say, you want a wall of 10 centimeter, you create a field of the strength of Copper on one side and create the field strength of Iron on the other side. Due .. and introduce a specific Inertia field in between the two, you'll create a new material dimension and a new manifestation of the fields. That from the one side it looks that the room it's made of iron plates, on the other side it looks as it's made by the copper plates.

(2:28). But in fact they are both in plasma condition. This is how the future constructions will be done. By changing plasma condition you create new Inertias and then you create the size fit, height fit. This technology is known to us, it's actually, if you go in the patents it's in there. So, we are about to introduce it into commercial application in the next few years. And what you decided between two fields, dictates that there will be isolation, no sounds, no heat, no radiation, no visual manifestation. Now if you understand how to... You can make a sphere of it, you can make a ball of it, you can make a straight wall of it. As I said, we've entered a new era of the technology development and research. And the new Keshe Foundation Institutes will be set up, we'll set up to research these things.

Any other question?

<< Dr. Farzam Bararpour speaks in Farsi >>

(2:30). K- Let me translate. This is the answer to the lady who says she's Iranian with a breast cancer. Dr. Bararpour is the medical spokesman of the Keshe Foundation. And he says that the lady was in touch with them or made an inquiry with them yesterday in the Persian teaching. And she's been asked to get in touch with, that we see how we can support her, but they haven't got in touch with. So if you're listening, please go back to the Iranian team with Dr. Bararpour, and then they know what to do and next step. Any other question?

Q: .. Thanks for what you're doing Mr. Keshe. How does the change will come? The establishment doesn't want this change. With sweet words?

K- Leave that to us. We've been well seasoned for these things, leave it to us. We will find a way. You see, the establishment, if you look at it, we never realized that the "establishment" was established within the Keshe Foundation to make sure nothing happens in Keshe Foundation.

(2:32). And we got rid of that "establishment." And now the changes and developments in the Keshe Foundation comes. That we got rid of one of the, we uprooted (that) "establishment" out of the Keshe Foundation, and now we are growing. Before the establishment we had the biggest spy sitting right in the center of the Keshe Foundation, and every development was scuffled directly from

inside. Now it's gone. And we've seen the progress and development. I'm sure most of you are familiar with the case and the situation. And you've seen how Keshe Foundation has grown in leaps and heights in the past 3 years especially. You cannot grow when people inside work against, because of the knowledge and the information they have in their ?? hands. We got rid of 2 or 3 people in the Keshe Foundation which a lot of you know. And with that we have changed the direction of Keshe Foundation. You don't see them around, they're long gone, and they used the Keshe Foundation work for other organizations to damage the Keshe Foundation for their own benefit. And it's long gone. Long gone. And we are moving on. Establishments work against themselves and sometimes things work different way than what they planned. Any other question?

Q: .. If you learn your lesson, (2:34). then do you still have to balance the fields in physicality? Or do you transcend the physical dimension?

R: We're not hearing you Mr. Keshe, I think your microphone's off there. K- Can you hear me now?

R: Yes, yes.

K- I said, sometimes what you think you learned is opposite to what you were supposed to learn with the teaching of your Soul. So your Soul puts you back on the test again to get it right. It's what we presume we learned from, and what we assumed we learned from. But it wasn't in reality what it was supposed to be learned from, or learned by it. And this is one of the things, we make the same

mistake again and again till we learn from it. If any of you in the session of tomorrow with addiction have a habit of going into the same kind of position and relationship again and again, we'll be interested to hear from you after the session.

It's a very intensive session tomorrow. And, it will be very interesting what habits we have. Why do we go from the same failure in relationship to another one that fails the same for the same reason? Are we addicted to it? Or are we challenging ourselves to it? This is a very, very interesting point and the condition.

(2:36). And we will handle this in the Addiction session tomorrow. Any other question?

Q: .. What are the meridians of our body, and how do they function in relation to the strength of the fields of the three layers of the skin in the plasma application?

K- Our skin dictates the meridians. Because that contains them. The field flow goes. If you break your leg and twist it slightly, or gets broken and gets twisted, and it changes the field flow in your body because of the way you walk. And this can go into the RNA of your body and the DNA. Due to change of the fields in the body and the whole structure of the meridians and the physicality, you'll find maybe your third generation, second generation, what you had the physical, what you call it, change, it'll become part of the structure of their life. Because the skin and the bone have registered that as normality. And if it's... if you... you'll find out, if you had a child at the age of 20 - 18 - 20, and then, which happens quite a lot, and

then you decide at age of 45 - 50 to have a child with the same partner.

(2:38). You will see all... And let's say you had an accident, deformity or something happened to you at age of 15 - 16. You didn't leave it to your first child at age of 18. But with a higher rate of chances, your child born after 45 - 50 you created, will carry possibility of that gene change in it. And she might not show you the ?? (change), but they might show it in the next generation. Even psychological conditions. We understand this and this comes because of the magnetic field within the body and what you call, meridians and the field flows of the flow of the body of man, will transfer that physical deformation into DNA and RNA. So, it has a direct effect. And our skin, how it's twisted, how it's turned, how it's got scarred, can manifest itself in that physical condition later on. It needs 20 - 25 years to be ingrained, or in a way remembered by the body or by the brain, to replace the same position, so it becomes natural process. We see this now, we understand technology quite a lot. And some people like to call it genetic defects, but now we find the effect of genetic, the reasons for it and we understand it more. Any other question? I would like to finish in next few minutes.

(2:40). Q: .. Thank you for all the love and knowledge you give us. Foreign language syndrome is suffered by some people who after an accident that hit their head, their brain when it suddenly recovers speaks in different languages.

This can help us understand that total knowledge is in our interior, in the STM?

K- This, this we saw in a couple of cases when they went through the system. They didn't need an accident. When we put people in the system. I think if we mentioned it before, people could not speak or communicate in English, they were fluent after they went through the system. And they said, oh, I didn't know, I said, you speak. It does not need a trauma. It's access to a knowledge we already have, of all languages. We will try this very soon, in a series of trials, of seeing how far we can transfer knowledge, language from one to another. And it is not a transfer, it's actually, it's a difference between speaking a language and speaking a language. Many people who learn English by the book and by English classes, or maybe live in English speaking country for a year or two, they speak English. But they don't actually speak English. Which means they don't understand the culture, they don't understand the emotion, they don't understand the essence of the words. (2:42). I'll explain to you something and then you understand. We had a case where, in English language it's very common to use the word of "bastard." It means a child from unknown father. And the lady was told, your child in the language, was a bastard. Which was just a commentary speaking. She said, no, he's not a bastard, I know the father. And everybody looked, you don't know what it means in English? It means he doesn't behave in the norm, he abuses the condition. And this is the difference with speaking language

through the Soul. You will understand the emotion of the language, you understand the terminology of the language, you just don't speak it. And this comes by the interaction of the Souls, which you have now access to. You don't necessarily means you have the access to the knowledge of that language, Chinese, English, whatever, in your brain. Through the connection of the Souls, you have access to somebody who speaks the English, with the full meaning of the English. That you, when you say a joke, you see with in English to some people who don't speak English, they laugh. But you see the laugh is just, they don't want to show that they didn't understand. Because if they're English people speaking it, they know this joke had a hidden meaning, a second meaning to it and they were talking that. And they laugh because of that.

(2:44). But the one who has just a smile is because just say, oh, I understood. This will not happen in the dimension of what you call, speaking language through the Soul. In a way, you have a server who has an emotional understanding. Could it be in your brain you can access to it? You bring it and you translate it to. And this understanding will come very much to you. You will understand. I don't know how I understood the emotion of it. How I could translate it. Then we learn the way you tap to the Soul to see your father who died years ago, and you tap to the Soul of somebody else you love, and they feel your love. Through the same process now we understand the Soul of the language. That we tap to somebody who's Chinese.

So, when even we speak the Chinese we might do, we hear the Chinese, we understand it, we understand the emotion of it, the essence behind it, the culture of it. And then the speaking language will change. It'll be the same when we travel the depth of the Universe. We don't understand the language, but we get the essence of the emotion from them and they get the essence of emotion from our Soul, that we understand each other. There is no language school at all, anywhere in the U. I haven't seen any. I don't think any of you will find English speaking language on planet Zeus. These are the things which we learn and it becomes part of us. We are part of the Universal Community with access to whole knowledge of the universe. Depends where we want to tap into it, and how we want to tap into it. It'll be very interesting. I explained this to a bunch of space scientists and sooner or later man will face this, (2:46). now that we have opened the space. In the coming time when we take you out of the colonies you go to the other side of the dome, and you live a life in the strength field of the time and place in space. What was not manifest to you inside the dome, could be the creatures of that planet. That to us, through the eye of the man in the dome, was invisible. The interesting thing will be, how you will communicate, how you will live amongst them, now you look amongst them. Look alike of them, understanding the culture, understanding their possibilities of life, becomes part of your life. You chose to cross the line. And as a man, we have to be prepared for that. We have looked for

centuries and thousands of years into the sky to see the Sun. We see nothing between us and the rays of the Sun except clouds. Now we have scientists who have taken pictures above us from creatures which live above us and we see them moving. So, what is the answer. We've been blind to their existence even though we see through them. And this is the norm in the coming time. Now that we open the plasma technology, not by rockets which has failed us, not by the spaceship UFOs, which take us to another capsule, but by transformation, transition, transmutation of the energy of the body of the man. These are the facts which we have to face in next year or two.

(2:48). It's not in 10 years down the line, it's not our grandchildren. We as a human race we develop them, we are facing it, we have to handle it, we have to know what we're going to face with. I'm sure when we land on the Moon and we go through the transmutation beyond the walls, through the energy of our body, we will see creatures which live on this planet, which are not visible to us today. The planet has a gravitational magnetic field. It has a construction, it has Inertia, that by law of existence has creatures of its own, which live within in its environment of zero atmosphere as you call it. We have to open our eyes to the reality of what is to come. Not ignore it to our peril and get damaged by it when we go and we expect. What are we going to see? How come you get on the plane in London, and you land in Beijing and you expect to see Chinese. Do you see that many Chinese in London? Everywhere around

you? My son said something very funny, when we used to live in China. Papa, all the foods here are Chinese? I said, yes, of course, my dear. We live in China. Now, we don't go to see another dimension of Chinese, or black or Indians. We are going in the environment of the field difference. What was not there to us visible from here to the other side is, is impossibility that there is no life on any planetary system in the Universe, even on the stars.

(2:50). If we accept this, if you understand this, we are ready to become the true travelers of the space. Otherwise now becomes them and us. Because now when you travel in the dimension of the Soul it's us, and us, and us and not them. With the knowledge that we

come from another source, but we are part of them. You don't need to go sign language, Souls have no sign language. Excuse me, doesn't exist. These are the realities we have to face. And it's not in the books, it's on the table, it's coming up, it's the next show. Musk failed going 200 meters up. Musk cannot even imagine such a thing exists, because otherwise he does not exist in the dream of his own capsule. But as Knowledge Seekers you've seen it, you come to us, you go to. You hear Dr. Bararpour just a few minutes ago, you come to the doctors of the Keshe Foundation to get rid of your Alzheimer's. How do we do that? How do the technology allows you to expand your Soul and deal with what you forgot? Now you remember and you see new things you have to remember in the Soul that when you come back, you attach it to

the STP. You go to the grandchildren says, I went to the Moon and there were creatures like this and that. Do they laugh at you? No, it's like you're going into back to London and say, oh, Chinese have this ..(they say) it doesn't exist. ?? who's seen ?? . Oh, what do you talk about chopsticks, it's only chopsticks, it's only steak fish, and chips, and forks and knives. This is a new extension to our knowledge, and we have to be open to it.

(2:52). Because it's us who fails us and nobody else. It's us who fails us and the reality of existence in the dimension of existence. Jump up, go up, pay Mr. Musk to take you to the space station and look at the window and see how many floating things you see, but why don't they create a cloud that we can't see this dust. The dimension of the field transfer creates a transparency that the light goes through it. Our lack of vision, our lack of knowledge, has made us ignorant to our own existence. And we can't do this anymore when we go into space. And it's not the next generation. As they say, the "last bell has rung," and man is on the way up. Shall we call it a day? And we come back next week. And we'll surely see you tomorrow, those of you who participate in the, what you call, the Addiction session. But remember you don't come for alcohol addiction and other addictions. That could be solved. But we are more interested in how we stop the addiction of killing and addiction of being attached to this planet. And then we'll see the progress of the man in the coming time.

R: Do you think you could give a quick answer to our last question here which is from someone called Rick.

K- Is that Rick Crammond?

R: No it's not me. It's in the Q&A. It's another Rick and says, I am new here I believe there are devices to help power a home, can I get an explanation for what is currently possible and is it cost-efficient? Thank you.

(2:54). K- Yes, .. there are systems which are at the Keshe Foundation and depends on what you want. It is a combination of gas and electric, which is coming in the second, third quarter, second quarter of this year, and many, many other new developments. Then, yes, you can now buy a system of what we call, Home Power Unit, which is a hybrid system, between the, what we call, electricity and plasma power production. And other systems which as you go to the sales pages of Keshe Foundation, you can find and choose. And the hybrid system will produce gas and electric and that way.

R: Okay, thank you Mr. Keshe. I know you need to go here, so... I'll put the store link in for Rick there and he can have a look at some of the different systems that are available.

K- Yep, see you tomorrow. And those of you who register for the addiction trial and those of you who want to join us on part of the 200, what we call, the space units, join us and we'll see the next step in the development of the technology in the coming time. We'll see where we can go. Thank

you very much Rick and thanks. We see you tomorrow and then next Thursday.

R: Excellent Thank You Mr. Keshe for another wonderful workshop here. This has been the 483rd Knowledge Seekers Workshop here...

K- We are about ten years, aren't we?

R: Yeah, it's been well,

(2:56). nine years of workshops with the Knowledge Seekers Workshop, but you've got to take into account you did workshops every month for a year before that as well with the private, or the public teaching workshop series. Which became the Knowledge Seekers Workshop. So, it's actually 10 years, yes.

K- Yes, well we are at it. Let's see if we can make it into a 500.

R: I was hoping for 500 to just keep pushing, just keep pushing. K- See you next time. Bye, bye.

R: ..Just thinking about it the other day.

K- We are about there, just about there, 3 more months.

R: Yes indeed.

K- ?? months and years, 500 sessions. The problem comes when you start counting 4,830.

R: Yeah, and we got to take into account there's already like 2,000, over 2,000 videos in the YouTube channel as well. Most of which you are a star in Mr. Keshe. Thank you for being our star for so many years.

K- We're just students learning. Thank you very much and see you next week. Thank you very much. See you tomorrow. Bye.
