

Inertia 4th State - In-Depth ... and much more

Excerpt from North American C T (NACT) 2020 12 06 at time mark 1:46:30.

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post.

This is a continuation of the Summary: The Next Step - Surviving in Space through the Soul; Excerpt from 357 KSW at 2:32. (Summary by KF Brazil)

Summary:

Last week's 357 KSW was so deep that they were playing parts of it in Sunday's North American teaching. A Knowledge Seeker (KS) asked them to stop the recording and he asked Mr. Keshe, why did you call it a 4th state of Inertia? Mr. Keshe replied enthusiastically. "Yes, somebody listened at last." The KS said, why did you describe it in that way?

Mr. Keshe went on to enlighten us. What I call the 4th state of Inertia is the interaction of the Soul of the Man (STM) with the Soul of the Physicality (STP), which with the interaction of the state of Inertia field forces, leads to the physical manifestation of the man. That's what it means. You cannot have a manifestation without the Inertia. It does not exist. You cannot have. So when you have the STM, and the STP, when you have the dimension of physicality, you need an Inertia field force to allow the manifestation of it. It has a strength of its own. It's not like the Inertia of the Earth, because it's the structure within itself. The body of the man is a cluster of itself, and to exist, it doesn't depend on the Earth's Inertia, it depends on its own internal Inertia. The same is true, say for

example, the liver. For it to exist, it depends on its own internal Inertia, and not the Earth's Inertia.

When I teach, you have to go into the depths of all the teachings, not just what you hear at that moment in time. When we say the body of the man is a sealed envelope, it's an entity on its own. The Inertia of the body creates your kidney, not the Inertia of the Earth matter state. So you need that 4th state of Inertia, which is the Inertia of internal structure of the body of the man, which comes from the interaction of the physical dimension of the physicality, and the STM. The physical physicality of the soul. It's very simple. You just look at the Inertia of the Earth to convert the energy into matter, but you need the Inertia inside the body itself to lead to the creation of the physicality of the man. We call it the 4th state of the Inertia, which is the Inertia of the body itself. Every entity, every single entity has its own Inertia, the moon has one, Saturn, Earth, Sun all have one, so why can't the body of the man have one too. Or is it just because you never consider it. That's what it is called, the 4th state of Inertia of the body of the man, to itself. It's an impossibility to have a physical body without confirmation of its Inertia in respect to its environment. It's there from the beginning. Every entity to manifest itself needs to have this Inertia of its time and space. It's in all of the teachings.

A KS asked, so if our body wanted to manifest itself, let's say the kidney, we need to understand the Inertia value of the kidney, which means we need to understand the matter that created, and built up that kidney, so we have to create the Inertia of that particular elements which makes up the kidney. Is my understanding correct?

K- What do you mean?

Q: If I want to create a kidney, the body is missing a kidney and as you said the body is a sealed entity, based on the Inertia, so how else are we going to find the value of Inertia of a particular cell or organ in our body?

K- No, the Inertia of the body of the man is created by the interaction of the fields of the STM and STP, in respect to the STP dimension of its existence in the matter state of the Earth.

Q: How can you tell a particular Inertia if it is such a general value.

K- No, you see, the Inertia in the body of the man is a dynamic Inertia. It's a totally different than the matter state, because the Gans Inertia is very much different than a matter state Inertia.

Q: It's too deep for me.

K- No, it's too simple. It's the simplicity of it, you cannot .. You see the Inertia of the body is a complex Inertia, because Earth's Inertia is not that complex, It's got an Inertia of the liquid, the solid, and a gas. The Inertia of the body of the man has the Inertia of a plasma plus a solid state. But it uses its solid state to sustain only the bones. The composite of the other side, is a plasmatic condition, that's why we see muscles, tissues, blood, and whatever.

Q: . if we wanted to create the Inertia, say of the muscle, do we have to create the field strength of the same value as the muscle?

K- Yes, but it is a composite .

Q: And how are we going to achieve that?

K- Talk to your soul, that's what the soul's physicality does. It's a collective .. if you really look at it, the STP, is in a way, the field spectrum of the full strength of all the

matter, which is created by the Inertia of the physicality. The only difference we have, as I said, you got to understand, each environment has got its own composite Inertia. The MaGrav is not a composite, it's accumulative. The Inertia is a composite of fields, that's where the difference is. When you have gravity the fields build up on top of each other collectively to create a bigger strength. When you have Inertia, it's what you call, it's per individual structure. It's a composite, MaGravs are accumulative, they add on top of each other, that's why they can span the Universe.

Q: I will soon be joining the private teaching.

K- I think you need time with Jalal, you'll soon get there.

Q: He is too hard to get a hold of, I would love to get into private teaching.

K- The thing is, the KS, have to understand, the totality of the teaching. This is the problem.

Q: .. can you say that there is intermediary Inertia, and matter state Inertia, those are 2 different things?

K- Pardon?

Q: When you described Inertia.. you drew $G + M$, as the field state, then $G + M + I$ as the intermediary, and then at the bottom you put the I for the Inertia. So there is actually an intermediary Inertia that is different than a matter state Inertia.

K- Yes, it's the Inertia of the plasma. The Inertia of the plasma is the Inertia of the Universe. The Inertia of matter is the Inertia of Earth, matter state. Plasma has a different Inertia, different composition of Inertia.

Q: .. there is not a law, there is a condition that exists that differentiates the 2. when you said the 4th state, it threw me for a loop.

K- Yes, because it is a 4th state. The Soul is the first, STP is the second, the physicality is third, and then you have the Inertia, a 4th state fields which leads to the creation of the physicality.

Q: .. the soul interacting with the earth, makes the physical soul, and what does the soul make when it interacts with the space, is it connected to the question you put out to the KS?

K- No, in the space .. doesn't matter Earth is the point of space, it's no different. It's just that you lot, as KS are fixed to where you are born, and you cannot see a bigger picture, and this is what we are trying to push, for you to see a bigger picture, to come out of the village of Earth and look beyond. You have different conditions, and positions, .. you see the Inertia of the plasma which comes from interaction of the plasma of the soul, and the plasma of the STP, which is a totality of it, is different in every position of the Universe, according to interaction of the STM with the Soul of the Planet, or the environment, that's where it is dictated. If you go into the teaching, I explained, that each neutron in each Universe has different amount of energy or a M field, or a plasma, or interaction with the fields of it, which is that denominator of it. In this Universe, a neutron on Earth, and a neutron in the center of the galaxy, have exactly the same energy field inside it, but it is not same in the other universes.

Q: Do the entities in the Universe, do they lack the ability to create the Inertia that provides for the manifestation, not all the entities, but is that where we are going to go, where we exchange those 2 knowledge's?

K- Yes, but where everybody will have it. It will come with the new growth. Yeah, you see, we have to understand how our understanding of the totality of the creation is. You've got to remember everything at the same time. In the design of the new systems, which is going to be used in the EU and for the flight, it's an accumulation of the totality of the knowledge. This knowledge is literally spread across all the patents, books and the teachings. Very, very fine points are put in the teachings, in positions, but nobody takes notice that they are the cornerstone of flight and the creation of life. This is what I say, you have to listen, not only listen, but when you make and do things, you have to reach to a working system, something which you can see, or at least deliver something you were expecting.

Q: ... the soul and the STP, how did the soul manifest the physicality, is it a thought, or an intention, or is it in the collective consciousness?

K- No, it's an interaction, initially it's an interaction within the womb of the mother, which itself is an intermediary between the soul of the child, her soul, and the soul of the planet. In fact, if you take a bigger picture of the whole thing, what we call MaGrav is the soul, it's a reflection and an interaction of the soul of the planet, with whatever is on its ?? span, interacts with.

Q: So what happens then when the interactions are, let's take the example of it being a CD ROM when that CD is filled up, do you just change the ..

K- It never fills up. because you have to understand the way the plasma works, plasma is a 3-dimensional, and it is forever expanding inwards as much as outwards.

Q: So if we interacted with a MaGrav, so if our soul interacts with the MaGrav, can it materialize everything then?

K- Depends what you use as a MaGrav, what condition it creates. Earth is a MaGrav.

Q: Earth is a MaGrav. So you can do substitute the blue MaGrav with the MaGrav of the Earth?

K- Yes

Q: When you create the entity, where is the permission, that you get from the ... to interact with the soul., is it because earth is the soul ..

K- I have a permission to interact with any soul. (sorry about that) That's the wrong question to ask.

Q: Okay then, for us to create the entity on this planet, or if you created the entity on this planet, and you were trying to work backwards to understand how it was possible, how others did it, are there souls that are waiting to be created?

K- ?? no, ?? souls are the interaction of the time and space. What happens in that time and that space, if the condition is right for a certain type of soul to be created, it will be created. It's like the womb of the mother, you can't put the egg and sperm on the table, and the wait for them to create a child.

Q: But you still rely on the soul of the egg, and the soul of the sperm. but before that occurred where did the soul of the soul emanate, from the Soul of the Creator?

K- Yes

Q: So how do we put ourselves in a position .. oh boy I don't want to ask that question now.

K- Go on ask the question.

Q: .. so by me connecting with the Creator I was able to get the permission to create the soul in this ..

K- You don't get a permission , if it is available, it is their right. That's a very big difference. You see, I always say, and many people don't listen. If you ask and you are given, you don't need to think, "is this right or wrong." If you don't ask and just take, then you put yourself in the position of compromise. You do not know if you are stealing, or if they are stealing from you, or whether you are not stealing from someone else. When you ask a women to marry you, and she consents to the marriage, you have the right as a partner. But if she puts condition on it, "if my father and mother say yes, or my grandpa says, yes," then you have to get that permission. In the end, if you don't get that permission, then you have to stand the point of compromise, to hide from the father and mother, and the rest of. This is what I say, if you ask and are given, you do not commit a crime, you do not take anything. If you ask and are given, but then later find out that the one who gave, has stolen it from somebody else, it is their problem, you are not part of it. And this is the same, if you have access to the soul, and you are given that permission, then that's your right. It's a very clear.

Q: And if you are given and you didn't ask?

K- That's your right, too. That's the best way, but it doesn't mean, just because you are given, that you have to take it.

Q: If you are given a life, aren't you given a responsibility too, to take care of it?

K- What .. if you accept it. That's why we accept our children, and we take all the things with it, because we accepted to create them, we accepted to nourish them.

In the coming time, in a very short coming time, I will teach the mothers how to elevate the soul of their children in the womb, that you do not even need to go through physical birth, if you understand it. It's the way that it is done in the Universe. We plan the soul, and with it the physicality appears. In the life of the man we first put the physicality, and the soul appears. It's a big difference. Even though they both lead to creation of life. This is part of the work which is going on at the moment.

Q: the interaction of 2 plasmas, STM, STP it creates a field. Now the interaction of 3 plasmas, STM, STP and then the thought, like a mental picture of an apple or an orange, it manifests the matter which is the apple. My question becomes what are the fundamentals of plasma directions, is there like an intensity of concentration, or how do we know that we put in that field?

K- We are preset for it. In a physical dimension we are preset. It's totally different then going and looking for it. The body of the man on Earth is already preset for certain (field) strength you cannot go above or below it. Our body, due to its genetic structure is preset, how much plasma it can hold or give.

Q: It's like a metric for every entity, like a common metrics for human being, trees, plants, animals, is it like this?

K- Yes it is preset.

Q: .. it's from Divine metrics, for everything.

K- No, it's a condition over millions of years, which allows life to exist, to multiply, and manipulate certain conditions

Q: Do you believe in the law of evolution, Darwinism?

K- We always are part of the universal Darwinism, not just Darwin as human race. We progress, not the way, (as he said), that we came from monkeys to something else. We progress according to our environment. It's 2 different things. Darwinism the way Darwin explained is very much, far from reality, but in essence of understanding, yes.

Q: It's like a process of evolution, but not like Darwin?

K- Yes, in a way, it's a process of evolution, but now we understand that evolution is dependent on many factors. It's not something, in a way, ... it's interaction of the fields of the point of existence or manifestation.

Q: What is the role of DNA on this process?

K- Nothing, it is just a memory bank. It's just a floppy disk.

K- The beauty of it is, would the mankind in the time to come, through the interaction of the STM will lead to creation of a new life. And the answer is yes, but man has to learn. Now we (will) plan the soul, and then we create the physicality. As I said, before now man creates the physicality, and then from it creates the soul, which leads to manifestation of a physical life. Very different. The motion for this change has already been set, in time I will explain.

Q: could you repeat?

K- The process for mankind to be able to create life through the essence of the soul, which leads to physicality had already started. We are doing a lot of things in the background to prepare humanity for what is to come. But it is so in front of you, that you don't see it.

Q: I think we saw it just now.

K- You're welcome, I hope so.

Q: Good Morning - Jalal.

Warning about luminous sportswear coming into market

Mr. Keshe said he puts little warnings out to KS about different things over the years that might save a life or someone pain. Like when he taught us how to use cheese so we didn't have to go to a dentist, or how the ladies can use Ca at the time of menstruation so that they don't loose the bone from the hip. So now there is something to do with sportswear that young people use and those who are athletic. The problem is with the luminous tops, or shinning, or fluorescent tops, like the green and pink ones athletes wear. It's been reported in the scientific world, for the people who develop these materials, that they have a health hazards, but is has never been shared by or to the public. It's very important, it's crucial that KS be aware, that some of these what we call, shinning tops, or

running, or jogging suits, whatever, can create a long term effect in the third or inner layer of the skin of the man, which can lead to further complications. Chemicals or whatever they use to embed in the plastics, polypropylene or nylon. It's a fact, when it is used in certain ways can lead to all sorts of diseases. We ask the KS be careful what they buy, or use as a sportswear, especially these which are luminous, and the ones which are coming into the market very rapidly in past few year now. We see children with many new diseases we didn't know before. So if you are a father, mother, or whatever, a runner, be careful in why and how you buy these products to use. It's a general warning because we can't go anymore into detail. Try to use natural substances.

Q: And the clothes of the KF are of Gans, they do the opposite then?

K- These are built for the energy way, they are built in a chemical way. It's totally different. Gans's are energy balanced systems. These are matter state chemicals.

Q: What type of material is that ?

K- You see sports runners wear, bright colors and all sorts. But you have to be careful, we are seeing more and more people are running into problems in those ways.

Q: Are you referring to joggers who are running on the roadways, and sometimes they have a reflective strips on their clothes.

K- We are not talking about that, we are talking about those that are actually woven. These are totally 2 different things.

I have to go, thank you very much.

English Transcription:

(1:46:30)

Q: So that was the point, you said the 4th state of Inertia.

K- Yes, somebody listened at last.

Q: Why did you describe it that way?

K- What I call the 4th state of Inertia, is interaction of the Soul of the Man (STM) with the Soul of the Physicality (STP), which with the interaction of the state of Inertia field forces, leads to the physical manifestation of the man. That's what it means. You cannot have a manifestation without the Inertia. It does not exist. You cannot have. So when you have the STM, and the STP, when you have the dimension of physicality, you need an Inertia field force to allow the manifestation of it. It has a strength of its own. It's not like the Inertia of the Earth, because it's the structure within itself. The body of the man is a cluster of itself, (1:48). and to exist, for the liver to exist it doesn't depend on the Earth Inertia, it depends on its own internal Inertia. When I teach you have to go into the depths of all the teachings, not just what you hear at that moment of time. When we say the body of the man is a sealed envelope, it's a ?? entity on its own. Inertia of the body creates your kidney, not Inertia of the Earth matter state. So you need that 4th state of Inertia, which is the Inertia of internal structure of the body of the man, which comes from the interaction of the physical dimension of the physicality and the STM. The physical physicality of the soul. It's very simple. You look at the Inertia just for Earth to convert the energy into matter, you need the Inertia inside the body of its own, to lead to creation of the physicality of the man. You call it the 4th state of the Inertia, which is the Inertia of the

body itself. Every entity, every ?? single entity has its own Inertia, the moon has one, Saturn, Earth, Sun has one, so why can't the body of the man has one, just because you never consider it. That's what it is called, (1:50). the 4th state of Inertia of the body of the man, to itself. It's impossibility to have a physical body without confirmation of its Inertia in respect to its environment. It's there from the beginning. Every entity to manifest itself needs to have this Inertia of its time and space. It's in all of the teaching.

Q: .. so if our body wanted to manifest itself, let's say the kidney, we need to understand the Inertia value of the kidney, which means we need to understand the matter that created, and built up that kidney, so we have to create the Inertia of that particular elements which makes up the kidney. Is that my understanding?

K- What do you mean.

Q: If I want to create a kidney, the body is missing a kidney and as you said the body is a sealed entity, based on the Inertia. (1:52). so how else are we going to find the value of Inertia of a particular cell or organ in our body?

K- No, the Inertia of the body of the man is created by the interaction of the fields of the STM and STP, in respect to the STP dimension of its existence in the matter state of the Earth.

Q: How can you tell a particular Inertia if it is such a general value.

K- No, you see, the Inertia in the body of the man is a dynamic Inertia. It's a totally different than the matter state, because the Gans Inertia is very much different than a matter state Inertia.

Q: To deep.

K- No, too simple. It's the simplicity of it, you cannot. You see the Inertia of the body is a complex Inertia because, Earth Inertia is not that complex, It's got an Inertia of the liquid, the solid, and a gas. The Inertia of the body of the man has the Inertia of a plasma plus a solid state. But it uses its solid state to sustain only bones. The composite of the other side is a plasmatic condition, that's why we see muscles, tissues, (1:54). blood whatever.

Q: . if we wanted to create the Inertia, say the muscle, we have to create the field strength of the same value as the muscle?

K- Yes, but it is a composite .

Q: And how are we going to achieve that?

K- Talk to your soul, that's what the soul's physicality does. It's a collective .. if you really look at it the STP, is in a way, the field spectrum of the full strength of all the matter which are created by the Inertia of the physicality. The only difference we have, as I said, you got to understand, each environment has got its own composite Inertia. The MaGrav is not composite, it's accumulative. The Inertia is a composite fields, that's where the difference is. When you have gravity the fields build on top of each other collectively to create a bigger strength. When you have Inertia, it's what you call, it's per individual structure. It's a composite, MaGravs are accumulative, they add on top of each other, that's why they can span the U. (1:56).

Q: I will soon be joining the private teaching.

K- I think you need time with Jalal, you'll soon get there.

Q: He is too hard to get a hold of, I would love to get into private teaching.

K- The thing is, the KS, have to understand, the totality of the teaching. This is the problem.

Q: .. can you say that there is intermediary Inertia, and matter state Inertia, those are 2 different things?

K- Pardon?

Q: When you described Inertia.. you drew G + M, as the field state, then G + M + I as the intermediary, and then at the bottom you put, the I for the Inertia. So there is actually an intermediary Inertia that is different than a matter state Inertia.

K- Yes, it's the Inertia of the plasma. The Inertia of the plasma is the Inertia of the Universe. The Inertia of matter is the Inertia of Earth, matter state. Plasma has a different Inertia, different composition of Inertia.

Q: .. there is not a law, there is a condition that exists that differentiates the 2. when you said the 4th state, it threw me for a loop.

K- Yes, because it is a 4th state. Soul is one. STP is 2, the physicality is 3rd, and then you have the Inertia, a 4th state fields which leads to the creation of the physicality.

Q: .. the soul interacting with the earth, makes the physical soul, and what the soul make when it interact with the space , is it connected to the question you put out to the KS?

K- No, in the space .. doesn't matter Earth is the point of space, it's no different. It's just do you lot as a KS, are fixed to where you are born, and you cannot see a bigger picture and this is what we are trying to push. See a bigger picture. Come out of the village of earth and look beyond. (2:00). You have different conditions, and positions, .. you see the Inertia of the plasma which comes from interaction of the plasma of the soul and plasma of the STP, which is a totality of it, is different in every position of the U, according to interaction of the STM with the Soul of the Planet, or the environment, that's where it is dictated, this is how if you go into the teaching I explained each neutron in each U has different amount of energy or a M field, or a plasma, or interaction with the fields of it, which is that denominator of it, a neutron on Earth and a neutron in the center of the galaxy, is exactly the same energy field inside, in this Universe, not in the other universes.

Q: Do the entities in the U, do they lack the ability to create the Inertia that provides for the manifestation, not all, but is that where we are going to go, where we exchange those 2 knowledge's?

K- Yes, where but everybody will have .. it will come with the new growth. Yeah. (2:02). (one second please ...) You see we have to understand how our totality of understanding of the creation is. You've got to remember everything at the same time. In the design of the new systems, which is going to be used in the EU and the flight it's an accumulation of the totality of the knowledge, which is literally spread across all the patents, books and the teachings, very, very fine points are put in position, that is in the teaching, but nobody takes notice. That they are the cornerstone of flight (2:04). or creation of life. This is what I say, you have to listen, not only listen, when you make things, when you do things you reach to a working system, something which you can see, at least deliver something you were expecting.

Q: ... the soul and the STP, how did the soul manifest the physicality, is it a thought, intention, is it in the collective consciousness.

K- No, it's an interaction, initially it's an interaction within the womb of the mother, (2:06). which itself is an intermediary between the soul of the child, her soul, and the soul of the planet. In fact, if you take a bigger picture of the whole thing, what we call MaGrav is the soul, it's a reflection and an interaction of the soul of the planet with whatever is on its ?? span, interacts with.

Q: So what happens then when the interactions are, let's take the example of it being a CD ROM when that CD is full up, do you just change the ..

K- It never fills up. because you have to understand the way the plasma works, plasma is a 3-dimensional, and it is forever expanding inwards as much as outwards.

Q: So if we interacted with a MaGrav, so if our soul interacts with the MaGrav, can materialize everything then?

K- Depends what you use as a MaGrav, what condition it creates. Earth is a MaGrav.

Q: Earth is a MaGrav. So you can do substitute the blue MaGrav with the MaGrav of the Earth?

K- Yes

Q: When you create the entity, where is the permission, (2:08). that you get from the, to interact with the soul., is it because earth is the soul ..

K- I have a permission to interact with any soul. (sorry about that) That's the wrong question to ask.

Q: For us to create the entity on this planet, or if you created the entity on this planet and you were trying to work backwards to understand how that was possible, that others did. Are there souls that are waiting to be created ?

K- ?? no, ?? souls are the interaction of the time and space. What happens in that time and that space, if the condition is right for a certain type of soul to be created, it will be created. It's like the womb of the mother, you can't put the egg and sperm on the table and wait for them to be created a child.

Q: But you still rely on the soul of the egg, and the soul of the sperm. but before that occurred where did the soul of the soul emanate, from the Soul of the Creator?

K- Yes

Q: So how do we put ourselves in a position .. oh boy I don't want to ask that question now.

K- Go on ask the question.

Q: .. so by me connecting with the Creator I was able to get the permission to create the soul in this ..

K- You don't get a permission , if it is available it is their right. That's a very big difference. (2:10). You see I always say, and many people don't listen. If you ask and you are given, you don't need to think, is right or wrong. If you don't ask and take, then you put yourself in the position of compromise. You do not know if you are stealing, or they are stealing from you, or you are not stealing from someone else. When you ask a women to marry you, and she consents to the marriage, you have the right as a partner. If she puts condition on it, if my father and mother says yes, my grandpa says, yes, then you have to get that permission. But at the end, if you don't, then you have to stand the point of compromise, to hide from the father and mother, and the rest of. This is what I say, if you ask and are given, you do not commit a crime, you do not take anything. If you ask and you are given, and then the one who gave, has stolen from somebody else, it is their

problem you are not part of it. And this is the same, if you have access to the soul and you are given that permission, (2:12). that's your right. It's a very clear.

Q: And if you are given and you didn't ask.

K- That's your right too. That's the best way, but it doesn't mean, just because you are given you got to take it.

Q: If you are given a life, aren't you given a responsibility too. to take care of it.

K- What .. if you accept it. That's why we accept our children, and we take all the things with it, because we accepted to create them, we accepted to nourish them. In the coming time, in a very short coming time, I will teach the mothers how to elevate the soul of their children in the womb, that you do not even need to go through physical birth, if you understand it. It's a way which is done in the U. We plan the soul, and with it the physicality appears. In the life of the man we put the physicality, and the soul appears. (2:14). Big difference. Even though they both lead to creation of life. This is part of the work which is going on at the moment.

Q: the interaction of 2 plasmas, STM, STP it creates a field. Now the interaction of 3 plasmas, STM, STP and then the thought, like a mental picture of an apple or an orange it manifests the matter which is the apple. My question becomes what are the fundamentals of plasma directions, is there like an intensity of concentration or how do we know that we put in that field. ?

K- We are preset for it. (2:16). In a physical dimension we are preset. It's totally different then going and looking for it. The body of the man on Earth is already preset for certain strength you cannot go above or below it. Our body due to its genetic structure is preset, how much plasma it can hold or give.

Q: It's like a metric for every entity, like a common metrics for human being, tress, plants, animals, it's like this?

K- Yes it is preset.

Q: .. it's from Divine metrics, for everything.

K- No, it's a condition over millions of years, which allows life to exist to multiply and manipulate certain conditions

Q: Do you believe in the law of evolution, Darwinism? (2:18).

K- We always are part of the universal Darwinism, not just Darwin as human race. We progress, not the way we came from monkeys to something else. We progress according to our environment. It's 2 different things. Darwinism the way Darwin explained is very much, far from reality, but in essence of understanding, yes.

Q: It's like a process of evolution, but not like Darwin?

K- Yes, in a way, it's a process of evolution, but now we understand that evolution is dependent on many factors. It's not something, in a way, it's interaction of the fields of the point of existence or manifestation.

Q: What is the role of DNA on this process?

K- Nothing, it is just a memory bank. It's just a floppy disk.

Q: or say the point of manifestation at the point of need.

K- The beauty of it is, would the mankind in the time to come through the interaction of the STM will lead to creation of a new life. (2:20). And the answer is yes, but man has to learn. Now we plan the soul and then we create the physicality. As I said, before now man creates the physicality and then from it creates the soul, which leads to manifestation

of a physical life. Very different. The motion for this change has already set, in time I will explain.

Q: could you repeat

K- The process for mankind to be able to create life through the essence of the soul, which leads to physicality is already has started. We are doing a lot of things in the background to prepare for humanity for what is to come. But it is so in front of you that you don't see it.

Q: I think we saw it just now.

K- You're welcome, I hope so.

Q: Good Morning - Jalal.

K- See we were discussing, we usually divert from some subjects into other things because it is coming up. In some of the teachings, which is not relevant, (2:22). to part of the teaching, but I put little warnings out to , for different things for over time over years for people to understand and somewhere down the line, might save a life or a pain. It's very much like when we taught you how to use cheese, not to go to a dentist, and how to use Ca for the ladies in time of menstruation that they don't loose the bone from the hip. Something which is now in front of us and which is important for many of us, especially the young group, people who are work of athletes, is many of these shining tops, fluorescent tops, luminous tops they wear to be green or pink, and athletes wear. It's in the report of the scientific world for the people who develop these materials, that they have the health hazards. But is has never been shared by or to the public. It's very important, it's crucial that KS are aware, that some of these what we call, shinning tops, or running. or jogging suits, whatever, can create a long term effect in the third or inner layer of the skin of the man, which can lead to further complications, chemicals they use to embed in plastics or polypropylene or nylon, (2:24). or whatever they use. It's a fact, when it is used in certain ways can lead to all sorts of diseases. And this is what we say to KS be careful what you buy, or use as a sportswear, especially these which are luminous, and the ones which are coming into the market very rapidly in past few year now. We see children with many new diseases we didn't know before. So if you are a father, mother, or whatever, a runner, be careful in why and how you buy these products to use. It's a general warning because we can't go anymore into detail. Try to use natural substances.

Q: And the clothes of the KF are of Gans, they do the opposite then.

K- These are built for the energy way, they are built in a chemical way. It's totally different. Gans's are energy balanced systems. These are matter state chemicals.

Q: What type of material is that ?

K- You see sports runners wear, bright colors and all sorts. But you have to be careful, we are seeing more and more people are running into problems in those ways.

Q: Are you referring to joggers who are running on the roadways, (2:26). and sometimes they have a reflective strip on their clothes.

K- We are not talking about that, we are talking about those that are actually woven. These are totally 2 different things.

I have to go.
