

Coronavirus, the Truth, Uncensored: KF Plasma Science through KF TV

Excerpt from Opening of KF TV Channel 3/21/ 2021

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

Summary

Now with the opening of the KF TV channel the truth about science can be told in more detail and clarity without fear of being taken down. Mr. Keshe began by removing all the Knowledge Seekers (KS) fears about Coronavirus and all viruses in the future for mankind. As we are about to become space travelers we need to understand that all viruses are energy packs and through the technology we can deplete these energy packs in a very simple and easy way.

Mr. Keshe started out, good morning and welcome to the first live KF international television broadcast. Today we'll only broadcast for couple of hours, but we'll go through the whole understanding and purpose of the KF. One of the most important things today for all of us across this planet is the situation with the Coronavirus and how to handle it. The KF has found a solution to eradicate the menace of this virus from this planet, or at least bring life back to normal as much as possible. It can be done. As you know KF has been involved in the development of space technology (T), and when it is accepted by society, it will be a solution for man in the space when he comes in contact with any virus.

In the present world of medicine viruses are considered as RNA connected, there are some fields, which we don't understand, but then they show themselves as proteins, amino acids (AA), and the rest of it. In the real world of existence, viruses are in fact, only a bunch of magnetic (M) fields as a plasma, very much the same as what we produce in CERN, or what we produce in many of our reactors. The M fields have no identity.

When these packages of plasma, energies, interact with the cell of the body of the man, or that of an animal, or any living entity, they can regenerate themselves. The interaction of their fields with a cell of the body creates a residue material, that manifests itself as what they call, a virus. It gives the appearance or the shape of a virus. (Is this what they see in the microscope?)

This is why we see Corona as an energy effect when it attaches itself to the cell of the body of the man, the interaction between the two creates the shape of it. This is what the world of science has not understood, that viruses are nothing but energy packs. They are packages of M fields of a given strength, and they can replicate themselves by absorbing energy from their environment to make more of the same packages. This is why up to today, the world of science has had no cure for viruses, because viruses are not antibiotic based, viruses are not based on anything else, but energy.

When they give you some pharmaceuticals, which are chemicals, but they are also energy packs, and sometimes they can have an effect, because by being in touch with the cell, they can deplete their energy. But it is a hit and run (job, it doesn't work most of the time.) That's why when you go to a doctor, they tell you, you have a flu, or a virus, and that you have to cope with it, because they don't have any medicine for it. Antibiotics don't work on viruses, why? Because the doctors have not understood, that the virus is energy. So when it's in your body it replicates itself to a certain limit, and it cannot expand beyond that limit. When it uses up its energy, then it disappears. That's why every winter you suffer with flu or whatever viruses, because they are energy packs that manifest themselves in a given temperature and environment. They replicate up to their limit, and then disappear when they can't expand anymore.

Some 30 or 40 years ago we realized at KF, that our space technology had to find the best solution for viruses, which meant that first we had to find out what they actually are, and then what do these energy packs do with the body of the man, and with the cell of the man.

In the depth of the space we do not have amino acids (AA). AA is a characteristic of the structure of a cell on this planet. It is due to its own MG field strength, and to the impact of the fields from the Sun when they reach and interact with the fields of the earth. Both the MG of the Earth, and those of the Sun, in rubbing against each other create packages of plasma in the upper atmosphere. When the G field of the Earth interacts with these plasmas, they pull them to the surface of the Earth. In this process, as they interact with the Inertia of the gases, and the Inertia of the solid material of the earth, and the MG fields of the earth, and they find themselves in a matter state characteristic, what we know as AA.

You can see this for yourself by going on the KF website and learning how to make CO2 Gans. After you pour the saltwater in the CO2 Gans box you notice a layer of fat on the top. This is the AA. And in essence, this is the same way that the Earth produces it. We all can see and experience this directly.

In this respect, the viruses do not find a matching Inertia strength to their own, in the atmosphere or in the environment that they are in, (this is why they remain as packages of energy.) However, when they find a matching Inertia strength, such as when they come in touch with the cell of the body of the man, or of an animal, or any living thing, (then they can manifest themselves in matter state.) But they need to find a common denominator in the interaction of their fields with the cell of that body. This could be a Carbon, Hydrogen, or a Nitrogen of the AA, or it could even be a combination of the other materials that are connected to the AA, like Ca or whatever. When they reach to that point of Inertia, then they manifest themselves, and this is what we see as the physical shape of the crown of the Corona, or any other disease.

So what we have is a cell on its own with its own structure in matter state, and then we have the plasma of the body of the virus, but it does not have a matter structure, it only has a field structure. Therefore, it cannot confirm of its existence in the matter state. When the two come together and amalgamate a shell gets created over the cell. At the same time, the interaction of the fields of the virus, in interaction with the Inertia field strength of the cell, creates new features on the top. This leads to where the cell is in the center, and you have some shape of a state, which we see as a crown, and then we have an atmosphere energy pack around this totality.

The reason the antibiotics of today do not work is because, this atmosphere around the cell does not allow them to enter in or to reach it. Therefore they have no effect. As long as this atmosphere around the cell, whether we call it a Corona or anything else, exists, the cell of the body of the man cannot be protected. In the process of transferring the energy of the cell, to become the body of the physical manifestation, of the Inertia, of the energy of the plasma of the virus, the body's own cells get depleted of their energy. This depletion leads to injury of the cells, and if it becomes extensive and spreads to many cells, it starts to destroy the cell structure.

We have seen this in Corona where it attacks the lungs. We also know that the AA in the lungs of the man, is connected to the Ca link of the protein. By using the KF technology, we now understand that, if we can penetrate this atmosphere around the cell, which has manifested itself as the crown of the virus, or the Corona, and deplete its energy to zero, then the M field effect of the virus will loosen, or get depleted to the point where it cannot effect the cell. When this happens we'll see the virus disappearing.

English Transcription:

(:02). K- Good Morning. Welcome to the first KF broadcast on the TV on a live basis. Today we run for couple of hours and we go through the whole understanding of the purpose of the KF. One of the most important things today for all of us across this planet is the situation with Corona. How do we handle Corona, and how we come to find another solution, another way for the menace of this virus to be eradicated from this planet. It can be done, or at least bring life normal as much as possible. As you know KF has been involved in the development of the T that can be accepted and can be a solution for man in the space. In the present world of medicine we consider viruses as RNA connected, there are fields and we don't understand, and then they show themselves as protein, amino acid (AA), and the rest of it. In the real world of existence, viruses are in fact, only a bunch of M fields as a plasma, very much the same as what we produce in CERN, very much in what we produce in many of our reactors, that they have no identity, (:04). When these packages of plasma, energies, interact with the cell of the body of the man, or animal, or any entity which is live, and it can regenerate itself, the interaction of their fields, and the cell of the body, creates residue material, that manifests itself as what they call, the virus, appearance or the shape of it. This is why we see Corona as an energy effect when it attaches itself to the cell of the body of the man, the interaction of the, between the two, creates the shape of it. This is what the world of science has not understood, that viruses are nothing but energy packs, they are packages of M fields, of the given strength, and they can replicate themselves by absorbing energy from their environment to make the same packages. This is why up to today the world of science has had no cure for viruses, because viruses are not antibiotic based, viruses are not anything else based, but energy based. And sometimes with hit and run, when they produce some chemicals, which are energy packs, in effecting and being in touch with the cell, they deplete their energy. You go to a doctor, they tell you, you have a flu, a virus, you have to cope with it, we have no medicine. There is no antibiotic, why? Because the doctors have not understood, that the virus is energy. So when it's in your body it replicates itself to a limit, it cannot expand, (:06). then it gives its energy up, and then it disappears. That's why you suffer with flu, whatever viruses, every winter because these are the energy packs, that in a given temperature, environment, they manifest themselves, replicate, but they can't expand anymore.

In the space T of the KF, we realized this some 30 - 40 years ago, that the best solution is to find out what the viruses are, what do these energy packs do with the body of the man, with the cell of the man. In the depth of the space we do not have AA. AA is a characteristic of the structure of a cell on this planet, due to its MG field strength, due to its impact of the fields from the Sun, when they reach and they interact with the fields of the earth, that is both G and M fields of the Earth, and they, the MG of the Sun, in rubbing against each other, they create packages of plasma in the upper atmosphere, and once the G field of the Earth interacts with these, pulling them to the surface of the Earth, in interaction with the Inertia of the gases, and the Inertia of the solid material of the earth, and MG field of the earth, they find themselves in a matter state characteristics, as we know as AA. We know this, that if you go on the KF website, learn how to make CO2 Gans, or any others, you see a layer of fat on the top, AA. This is how the earth produces. Now we know how to do it. So in that respect, (:08). the viruses do not have a matching Inertia strength, on their own, in the atmosphere they are, in the environment they are.

But they find a matching Inertia when they come in touch with the cell of the body of the man, or animal, or any living thing. So in the interaction of their fields with the cell of the body of the man, in finding a common denominator, it could be a C, could be the H of the AA, could be the N of the AA, or a combination of the other materials which are connected to the AA, like Ca or whatever, they reach to that point of Inertia, and manifest themselves, as what we see, the physical shape of the crown, of the Corona, or any other diseases. So in fact, the cell on its own, has its own structure, the plasma of the body of the virus has its own field structure, but no matter structure, no where we can confirm of its existence in the matter state. And when they come together, the amalgamation of the two creates a shell over the cell. At the same time, the interaction of the fields of the virus in interaction with the Inertia field strength of the cell, creates a new features on the top, and this leads, where the cell is in the center, you have some shape of, state, as we see like a crown, and then we have an atmosphere energy pack around this totality. The reason the antibodies of today do not work, (:10). is because this atmosphere around the cell of the body of the man, does not allow them to enter to reach the cell, to become effective to do something with it. So this, as long as this atmosphere around the cell, we call it a Corona, we call it anything else, exists, the cell of the body of the man cannot be protected. And in that process as the energy of the cell is transferring to become the body of the physical what, manifestation, Inertia of the energy of the plasma of the virus. The virus depletes the energy of the cell, so the cell gets injured, and this injury if it is extensive goes to so many cells, destroys the cell structure. And in Corona we have seen, we know that in the lung of the man, this Corona, AA is connected to the Ca link of the protein, AA of what we call the lung of the man. In this process, now we understand if we can penetrate and deplete the energy around the cell, and what has manifested itself as the crown of the virus, we can deplete this to zero, where the M field effect of the virus loosens, or depletes in a way that it cannot effect the cell, we see the virus disappearing.
