

# **Important Teachings on Secrets and Information about the One Cup, Coronavirus, and the advancement of the KF, by M.T. Keshe**

Excerpt of 103 One Nation, One Planet .. February 4, 2020

(Summary in English; with Transcript in English)

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription after the post. (Summary by KF Brazil)

## **Summary:**

The spread of the Coronavirus will go across the world in a critical way if it takes hold. In the coming days, we know the Chinese government is going to lock down city after city and the movement of people has already been heavily restricted. People are not allowed to go out of their homes, if you want a bag of rice, you call a center, they come and put the bag outside your door. You can't open your door until the military officers have gone, to make sure that there is no interface between the people inside and outside. This is now up and running, and will become much more in the next 72 hours across China

If the situation carries on, one of the possible solutions we see as, are the creation of plasma domes over cities as a way to contain the virus and then work against it. If instead of creating military zones that the Chinese military forces are supposed make, to restrict motion and movement of people, instead we can make these domes in the cities that will work in the same way, as was done by Tom Salas on the Caribbean island during a hurricane. We can then, literally shut down the back fare of the microbes and viruses under these domes. We see it internationally as one of the solutions put forth by One Nation, One Planet, and the situation will take shape in the next 2 weeks.

There is a concern, that there is no immune system response in respect to this virus. As you know the Keshe Foundation (KF) is on the edge of work with a couple of nations on this front, and in the next 24 hours KF will release a new technology, which sterilizes the environment and at the same time creates water to drink, and disinfects water. We will, by early next week, release a new technology, as a water based feed program.

### **American solution**

What we see now is that the Americans have brought in injections in the past 2 days, but, which is not yet known to the public, and seems to be creating a bigger mess. The injections correct the fever in the patients and the temperature drops, but within 7 days

they all die because of suffocation from lack of oxygen in the blood according to reports I have had.

**Keshe Foundation Solution:**

As we see it, the Chinese are making the One Cup, One Life, and if we increase the number of One Cups, then we'll create that dome condition. It's important for Knowledge Seekers (KS) to understand, that if you live in major cities then you have to protect yourself in these conditions. The results we have, we know, we can use these dynamic systems to cover a vast area, but the proof of it is something we don't have, but it is, what I call, an imminent situation and solution. Hopefully, the KF will submit a European certified system to the Chinese nation, then it for the Chinese to take it up.

Discussions are under way for Iran to export this system as part of the solution for disinfecting ports, airports, cities and everywhere else. When you come off, or enter airplanes they will be fully sterilized. This is one of the only solutions left for the governments to make their cities safe again in a very rapid way. These systems can be rapidly deployed across the world and it will take approximately 2 to 3 weeks to secure most of the airports. It's a KF innovation and invention, and with it, we hope we can create a plasma dome effect. As a leading organization involved in overcoming this disease, we are trying to bring some security, but not a false hope. The problem at the moment is our factories in China, are in a locked down condition, and it is impossible to move the materials across the nation. This is supposed to go on until the 9th of February, when we hope to see some control over the virus. We'll use the public teachings as a platform, and also Thursdays, to release further technology to overcome this virus.

I am told that Chinese government officials are not happy with the way KF is openly discussing this, but it has to be discussed, as we are one family. Our announcement to the Chinese government officials is that, the fault is not theirs in what has happened, but there is a problem in securing nationals. We are monitoring different positions and are alarmed at what we see. Maybe in the next 2 weeks, I will release documents supporting what we have found concerning the possibility that this could be a tactical virus. It's not coincidental, this could be one of the first times we have seen a race, gender controlled virus. All of the victims are full Chinese and if non-Chinese get contaminated it only results in a normal flu. This is something we are carefully monitoring and it will be interesting if the KF groups can open a Chat, or we'll build the research teams as one of the G24 or whatever we have, to monitor this virus. It is very rare to see non-Chinese infected and if we do, we have to check their background for a Chinese genetic connection. The KF is concerned to stop genetic modification of the virus by race. To do this we will release a new system within the next 3 weeks that will overcome any genetic modification to the virus. It's important for KS to understand, because if today it is the Chinese, then tomorrow it will be the Arabs, then the British, and then the South Americans. And these people will take nation by nation, and race by race to ransom.

**The Rothschild's offer to KF:**

The Rothschild's group has made an offer of collaboration with the KF. The answer to your question of collaboration with the KF, is absolutely no. In response to the email you

have sent to the KF, we will not sell the human race. As head of the KF, cooperation with the Rothschild's family is totally and ultimately rejected. We stand as One Nation as a new race, in a new style of living, and my work, in conjunction with the KS, is to free man from these conditions.

We do not expect to overcome much, but at least we can create a condition for the Chinese and non-Chinese KS to live a safe and secure life. The knowledge about the virus modification has been passed on to the CPC and Chinese leadership yesterday, as we saw the pattern. It has to be very clear, that this race and genetic modification virus has no room and no position with the new technology and can be overcome. As we found a solution for reversing the genetic modification with Monsanto seeds, so too, do we have a technology for this virus. The technology has already been developed, as I thought this would happen 10 years ago. If we get further confirmation of genetic modification virus by race, the KF will release this new technology through the Iranian government across the world. Because if it is race by race, which race are they planning next. Is it going by the wealth of a nation, or do they leave the poor nations, that in time, every body will be poor.

One of the problems with the KF is that we are outspoken, because we have the technology and the knowledge to match, and because we share the knowledge so freely, we have become the pain in the back side of many world leaders. The ones who have created these problems now know there is a solution and they invested so much money for nothing. As I released the One Cup, One Life, we'll release "One Cup, Free Gender Cup," which means it doesn't matter what race, religion, or color you come from, the new modification virus will not be effective. First we have to settle a lot of things with the Chinese government before we can go to the next move. We were told that Chinese officials were online listening to Thursday's teaching, they did not like what I said, but they understood that what we said was correct and if I would have said something wrong, they would have shut all the QQ's down by now. At the same time we need to remain correct.

Last September, when the African Pig Flu began we saw that some pigs in China didn't ~~get the flu, and the ones that did, strangely enough, were mainly, the pigs that were not~~ imported from the US. It's very obvious that there is a pattern that is connected to the virus. Now again, we see a pattern with the new disease. It will be interesting for us to see who actually ordered the production of this material and in whose benefit. The situation in China clearly points the finger to ... but we'll leave that for the Chinese government to sort out. We have been asked if we can release the names we have in our possession. In due course, if need be, we can do.

As Knowledge Seekers, unless you have a Chinese descendent in your background you are safe, if you get the virus you'll only get a deep flu, but you'll recover. But the Chinese, because it's locked to their race and was modified with their pig flu, they are not immune to this virus. As a non-Chinese if you get the virus you'll go through, what I call, a deep

flu, but you'll recovery. This flu is very severe, it infects the lungs and it's heavy. We had such an infection about 2 months ago in Brazil, only the men in the KF team got infected, not the women. We kept an eye on this and I, in a joking way explained this in one of the teachings. This is when we became aware that some games were being played. Spread the One Cup as much as you can because you never know where your great, great grandfather was.

The KF is a point of communication with world governments and they listen to these teachings. Extracts from the teachings are being used in reports as a proof, for whatever they wanted to convey to the Chinese leadership. Chinese security and scientists are going through the KF teachings to use as quotations in preparing the government for its next move. The strange thing is they write to us, and tell us what they have taken for their scientists to study and understand.

What we see coming out of this mayhem is that the economical balance will shift from China, to other nations. If this economical situation carry's on we'll see the setting up of factories in other countries. A new industrial structure will develop so nations don't become totally dependent on a single nation for their production. But the shifting of the balance will take another 2 years. To this effect, the KF is rapidly moving part of their operations out of China into the Middle East to Iran, Arizona, and a combination of European countries, and we'll start rapidly increasing our independence from China. With this virus, the Chinese with will loose their dominance in many sections in which they were mostly an exclusive supplier. China also controls 90% of the world's rare earth materials. However, with the new plasma Enhancement Unit we can produce any rare earth materials, and what we call, the exclusivity of China in this field is more or less over.

We'll hear more in the next 24 hours. The cities and states will be shut down until they can control the virus, which they could be within 2 to 3 weeks. During these shut downs whoever is going to die in that state, will die. The ones who come out and have gone through the flu, are the survivors. This is the final plan as we see it. This can toll to millions of people, if that way is done. They will loose half of their specialized work force, that in itself will bring a dimension to the Chinese export market and the economical situation. I explained this in the past 24 hours, clearly to the Chinese leadership and to the leadership of 2 other nations, they know exactly what we are talking about, and they consider it as a viable position. But how it is going to be done? This comes back to the work of the KF Knowledge Seekers and how you can spread the work of the Gans of the plasma to secure your own lives and help others.

### **3 Key Points: Drink, Breath, and Wash:**

There are 3 things you need to do to overcome this disease, you have drink, breath and wash. These are the 3 key points, you have to wash your body, face, hands, with this Gans material. Secondly, is to breath, through masks or towels soaked in Gans Water. Those of you who have a breathing problem, can breath through what we call, hubbub. He describes how to make one. Because this virus is emotional and it is lung infection connected, you have to kill the infection within the lung and strengthen the lung against

the virus. By international law, anyone who makes something in their homes can use and consume it. As you are making the Cup of Life and the Gans material yourself, you are free to do so. The Chinese authorities have just realized what is in their hands. We know in the next day or two, the Chinese government will promote the One Cup, One Life, in a different way, so as to be a Chinese invention, but it doesn't matter as long as it is saving lives. We have seen Chinese stealing technology, but still, it serves its purpose. Remember that you have to wash, breath, and drink, the 3 parts go hand in hand. For those who have a respiratory problem, breathing is much more important than drinking. If you already have a flu, this is the only way you will be able to overcome it. The ratios of the Gans are set according to the emotions of the producer, and will fit their lung. The Cup of Life is a life system and interacts with the soul of the producer. This is not an ordinary cup and if you follow it the way I set it, you will understand exactly how and why it was set this way. Maybe in another few hundred years man will understand what is in this Cup, even though you may think because you made it, you have understood all of it.

### **MaGrav Technology in Cup:**

This Cup has exactly the same MaGrav technology inside it. If you look carefully it's made with both the solid plate and the spring coils. It carries the energy of the soul and life within it. Those who deviate and make a different version of the Cup for themselves, Let it be, you are on your own. We set this up exactly in the same way set the MaGrav units up, but there is a twist to it. In the future when people replicate it and do analysis on it, they will probably say they know, but I know what I have created and what I have given you, follow it as I made it, no other way. However, you can do it with or without a battery, it doesn't make any difference. If you do it without a battery, connect the two outside wires together (Cu and Zn electrodes), and then take a piece of wire and connect it to the middle one (Nano coil). Basically you are replacing the battery with a piece of wire. You cannot connect all the 3 wires together. The little piece of wire makes a lot of difference in operation of the energy and plasma production. Please do not drink any of the Gans material. If the situation becomes critical we'll tell you later on, how and what to do with what you have. We'll continue teaching at this level until we get through this crisis.

### **A Case of Genocide:**

If you hear any non-Chinese who have died of this virus inform the KF, because we are gathering data and want to know why. This is very important, because from the data we have gathered it looks to be a certain way. When we find the developers and the spreaders of this virus, as we know who they are anyway, they'll be committed for genocide. They invaded Iraq under the false pretenses of what they are doing today, officially in China. It's very strange how they think they have released themselves of a lot of problems.

### **Letter from Rothschild's Foundation:**

These things are not coincidental, and you have to understand the totality of the work and that nothing comes coincidental or accidentally to the KF. Mr. Keshe reads the letter received from the Rothschild's Foundation. We'll not read the names. It says, "US ..

global ... Italian project sponsored by Rothschild's Foundation." (We clearly do not work with the Rothschild's Foundation or organization.) It says, "they are working on a global situation pathway to help humanity to achieve a green resource and a merit based economy in a world without poverty, borders, or war." (Note that they say, "merit based economy".) Then they are trying to say that they know us and have been around us. It says, "as we get through this epidemic, I may be able to help the KF with funding through the Rothschild's Foundation. We can discuss that in the future."

The KF will never discuss any economical situation with the Rothschild's family, organization, or foundation. We have answered you in public. To the Rothschild's organization, we do not accept. The KF is solid and doesn't need a handout from the Rothschild's organization. But we invite the Rothschild's organization to join us to change their own ways and habits. If you notice, it says, "I may be able to help the KF with funding, through Rothschild's organization." We don't need the Rothschild's Foundation to put humanity through more pain and suffering. This is my answer to the head of Rothschild's organization. You have to understand that when you are independent and strong you don't need to sell your soul. This is not coincidental that they send us such a message, at such a time, when they know we can curtail their strength.

#### **The talk opens for questions.**

Q: Can you use different sources of flames like a gas cooker, to Nano coat?

K- As long as you can make the copper to go red, what we call fluid red, you'll have your Gans production. It's not just a matter of making it black, but understanding how the Nano coating is made. You can even use a cigarette lighter if you can reach that point. When you use fire, it is important that it goes through what we call, the melting phase separation point. The top layer will go through that separation. Be aware that if you rapidly quench it in cold water, all the Nano layers will rapidly fall off. There are other ways to Nano coat, by putting it in the caustic, or how the research labs make it through plasma systems, or even remote plasma production.

#### **Breathairean Institute:**

The head of the Breathairean Institute comes on and tells extraordinary things about himself and his organization and that the founder has stayed in the "world above this one" to oversee the project Mr. Keshe is working on and that the KF is perfect harmony with what he called the new world, which was born on December 21, 2012. He goes on to say, that he applied to be a student at the KF, but feels there might be a problem because his name is a title of nobility, and that he has indigenous rights on the land as a missionary, and he has noticed some inconsistencies in the KF. Mr. Keshe says, what are you talking about, have you been rejected? No, but I wired the money 2 weeks ago. K- You can pay as much as you like, until you don't pass a security check, which might take time however long. Then there is an Internet connection problem for some time. .. The man says, this is not surprising, this is what I expected as soon as our foundations came together. After the connection is restored, Mr. Keshe says, there are a lot of things going on right now and it may take some time. Then the man started to tell about the Institute that he runs; a 100% accurate divining method; I actually found my higher self; I have taught on the national stage here for the past 2 years; it's unanimous amongst the

participants that this is a unique method of divining; we have found that everything has an energy that will either pull one up or pull one down, known in the world as the Christ energy pulls up and the Antichrist is the energy that pulls down, and between those 2 poles we get the tension that creates the physical life. At this point Mr. Keshe stops him, "what a nonsense you are talking here, sorry about my language, so anybody who is non-Christian is Antichrist and energy is down." The man interrupts defensively, "No, that is not what I mean." Mr. Keshe continues, "you had better phrase it the way I understand it, and many people would look at it." "Let me explain the position from a scientific and physics point of view, maybe as a scientist. It is you who decides what is for you, what elevates you and it's for you to decide what lets you down, or brings you down. And it is you who can change one to the other. It doesn't need any other thing, except self-consciousness at all times." The man asks, are you saying that we can take anything and turn it into anything? K- Of course, I can show it to you. You give me copper and I'll give you gold. I have done that. You give me water and I'll change it to blood. I have done that. It's what you have knowledge of and what you can elevate to. These things that you were talking about, was the nonsense of the past. The reality now is, that we are all educated.

Q: I am trying to use a language.

K- Yes, a language is, let me explain to you, I have become very sharp in the past 3 or 4 days because I am watching many people die and I don't understand the reasons why these world leaders are allowing this to happen. This afternoon, while I was talking to KF leading teams, I said, I need a break, it got to a point because of the information we were receiving. I looked at it and I walked away. I said, 'if I let this nonsense of the world leaders bring us to this point, there is something wrong with me, that I have not managed to strengthen my soul to be able to handle a higher level.' Within 5 minutes I went back on our communication lines and I explained to the team what I was working on. All of us in the group understood, that it is up to us, because they were going through the same thing. Because you don't see what we see coming out of China, America, from other Knowledge Seekers worldwide, it depresses you.

Are they anti-energy, or is it me who has to give more to bring them to the higher level? I came to this life to understand the pitfalls of physicality. So, what you call "Anti" and all that, is just in you, in respect to where you see yourself, and what you expect from that point. Nothing can be "Anti", and the "Anti" can be the key to the success of becoming. When you know your weakness, you are strong. When you cover your weakness, it's because you are really weak. You don't need to put it into any other way, "Christ and Antichrist", or "Moslems or Anti-Moslems," it is us.

I was asked in a live interview with Iranian television last week, can you explain to us about your background, your path of belief? I said, when you sit in my chair, there is no path of belief, except believing in the Creator and yourself and the position you choose in respect to what you call, your creator.

### **Secrets in Cup of Life, Elevates your Soul:**

When you hold a Cup of Life, don't look at the water of it, look at how, as I explained last week, it's a dynamic situation, and part of the KF teaching. Mr. Keshe teaches in detail

some secrets in the One Cup One Life, or as he also calls it, the Cup of Life (CL). In the Cup of Life you have a cycle of life, he draws some Infinity Loops in the center of the CL. And the cup next to it is the Gans water obtained from the CL, which is like your body and has a soul in the center of it. If you have understood the totality, the soul which sits here in the CL has a connection with the soul that sits there in the cup of Gans water. The water here is not just ordinary water. This CL elevates the Soul of the Man (STM). That's why I said, One Cup, One Life. I told you there are a lot of secrets in this technology. If you are down or low, the energy created in the CL, (and it creates a soul between the different parts of itself), it expands to you and elevates your soul, because it's at a higher strength than your soul, because it receives from it. I don't teach everything, because mankind is not ready to understand the totality. That's why I said, this is unique. If you hold the CL in front of you for a few minute and don't drink from it, it has already fed your soul. If you listen to the tape, in a very discreet way, I said, a Cup of Life, because I feed the soul with it, not the physicality, but you are interested in the water. In the teaching last week, I said, look at what I have drawn, I told you, this has a soul. If it has a soul and you understood it, and you have a soul, then where do you think the plasma sitting in it will interact? In the sky? There are a lot of secrets in the CL I didn't have you make it with straight wires, they are twisted, except for the flat piece of zinc, but you can still twist it. This flat piece of zinc is a reference point for the other 2, in respect to the soul and matter state. This system is unique. You try to show the freedom and elevation of the soul. This is such a simple system that elevates your soul, it doesn't matter in what shape or form you try to cover it, because if you have understood the teaching, you have already received the knowledge through your soul.

This is the first time ever, that I have released these kinds of technologies in a hidden way. I told you I am a master of magicians, because I know how to work with the STM and the body of the man.

Look at the Nano coil, every level of every twist creates a different soul strength, and if you interact with the soul level at, say the lowest strength, which is at the bottom of Nano coil, then as you consume it, it increases the level of the soul. You interact with each one in totality, so there is no way that a man will come away from this Cup untouched. I have taken the man's soul, a prisoner to itself, to elevate itself. I could have called it a "Cup of Soul" but nobody would have understood. Maybe now you see the truth.

You decide what you want to do and where you want to enter, at the bottom level, or at the top, or is your soul already at this level in the middle and it needs to elevate itself higher. When the soul is expanded and has reached a higher level, it covers the entire body anyway. One of the reasons this Cup and water from it works so effectively for viruses, is because the energy given to the soul is so rapid that the body becomes .. essentially, it surrenders to it.

I am spending a lot of time in different groups with specific sections of the KF, increasing the level of the soul of the Knowledge Seekers in a very rapid way. Then you'll understand what I am talking about, when I say that we have come to the point of governing, We are not here to be governed anymore. And we have gone through the

STM, by the man himself, not by prophets nor Messiah's, nor all that rubbish which was put through in the past. (Dog interrupts, K- he has been a KS since the beginning). If we understand, that with this Cup, not only will you elevate your physicality, but also your soul, and that, by the strength of the soul, it covers and strengthens the physicality.

This is the first time I have put such a knowledge out. I have gone to strengthen the soul and not the physicality, but you are human beings, you always look at, 'what's in it for me.' If your intention is to receive what is there, do not deviate from the way I made the Cup. In due course, there are additions that will come up, then you'll understand. Then do I need you to teach me, or do I need to make a Cup and let me, take what I need, when I need from it, and elevate the soul according to what I need. Because if my soul is not ready to move one step higher, there is no way my physicality will follow. It doesn't matter what I want to do. The soul has to attain this higher state, higher level that the physicality can convey and go with it.

Referring the Breathairian man, so do you want me to come to your international teaching, or do you want me to give you a "Cup of soul," that you don't become the next prophet. Man stays independent according to his own intelligence.

He says, my question really was regarding the salt, because one of the things I have found, is that when I find through divining a salt that is already in harmony with the soul, that it works different and because I used your salt, I used the salt that was sent in the mail through the KF and then beside it, I had a salt that I divined to be in harmony with the soul, and I found completely different results. Are you saying that when I get to the level where you are, there are no different results? Results in regard to the soul?

K- Have you seen God making different salts for Himself? The true meaning of the use of salt in the body of the man is the conversion of its energy to the physical condition. That's all it is. If you call it, the soul of the salt, and it allows you to interact with your soul in a physical dimension, then that is your dilemma, not mine. This is a very straight forward understanding.

Gives further teachings on the salinity of the cells which he gave in 313 KSW.

He draws the 3 layers of the skin each layer contains cells which he numbers starting with 1. Each individual cell in the different layers has a different field strength, they're not all the same. For example, cell #1 uses a specific combination of salts that is precisely unique to it. If cell #1 gets wiped out, say you burn your skin, the cell that comes to replace #1 will have exactly the same strength as before. There is no difference, that's why it can occupy the same position. The only difference between cell #1 and #2, is a small exchange difference in the salt content, which is registered in the brain as a field, not as matter. The brain is very clever, if I send information to it as a soul strength, then the Soul of the Physicality (STP) sends its information to the physical soul matter Inertia, and it makes the replacement cell, and even the replacement one is kept as part of its work in the memory of the soul in the brain. If you look at it, the STM and the STP share the brain in operation memory, for maintaining the physical organization of the man.

Every one of the trillions of cells that make up your body are continuously changing, and it's all due to a slight change in salinity and a mixture of different salts, because, salts tell you to create Inertia. When you have salts, you create a condition of Inertia, which gives it physicality. That's all the salts do.

**Salt Manifests Physicality:**

Back to the question. So if you call it, the salt of the soul, it means you have found yourself a salt, a power, a MG field which can allow your soul to manifest itself in a physical dimension, which you think you can do, now you have given it a dimension of physicality. So there is no such a thing as, a salt of the soul. Because salt has no dimension in physicality. And if you bring it to the dimension of physicality, it becomes a physical soul, which is the body of the man, with the heartbeat and the rest of it. As I said, the time for talking magic is over, understanding the truth is a different thing. Now we understand the science, and this is why nobody like you, or anybody else in the space can come and say, "I can show you the salt of your soul."

Come here I will show you the salt of love. The salt of love is so easy to make, because it's emotion, and if it's emotion and I can feel it physically, my heartbeat goes up, my eyes drop, and I want to give whatever the other side wants, then we have connected the physical condition, it has a salt. It has been given a dimension of physicality. With this knowledge, no man should allow no one, to take no being, to ransom for magic work. Because you have to analyze the magic, then it becomes "no magic." Houdini got trapped in boxes he could never open, but he was lucky someone from outside undid the lock.

**Questions continued:**

Q: How to understand M fields mathematically. I think the interaction between the matter fields of the Cu and the matter fields of the Zn that would create a strength of Magnetic, am I right? Yes, partially. Q: I tried to understand and do them mathematical, to understand how you achieved this field of M but I could not?

K- Work on it, you did something very big. For now let me keep some of the magic.

When you understand the totality of the construction of the materials, you will understand, that this CL has a magic factor to it. You have to look at it 3 dimensionally, and to see these as boxes of energy, and take the conditions box by box. You have to understand what each box does and what are the interactions between these boxes.

Some of you say my Cup doesn't give what it shows. Check it. Some of you have connected the bottom of the Nano (N) wire to the top, so the energy is going in the opposite direction. The number of strands that are in this N coil may be different then in the copper coil because when you burned it, some got broken and are hanging out. This structure is very much like the brain, it has different emotions in the life. Make sure the N coil and the bare Cu coils don't touch each other, because you have to keep a separation between the soul and the physicality. There are a lot of little tricks in this CL. Some of you are producing the Gans fast, others very slow, and some of you are producing cupfuls, and some, when you put your Zn plate in do not get the same effect.

### **Cup of Life = MaGrav System:**

He draws some analogies. You have the Cu which is the STM, the N coated coil which is the physicality, And the Zn plate, in respect to the matter state of the man. If you turn this Cup upside down, what do you really have? It's very simple, another MaGrav system.

The Zn plate at the bottom is the earth, next you have the N coil which is the soul of Physicality (STP), and on top the Cu coil which has a soul of totality because it's a higher order soul. What I have done is to force conditions, the Zn plate stays as the earth or matter state. So when I turned it sideways it became magic to you. But isn't this the shape of the man? He draws a figure of the man, in his head is the soul, in his heart is the STP, and he standing on the earth. Because once I put in this N coated material in the middle, I dictate a new environment in this jar. It's not earth's gravitational field anymore, it's mine, I dictate. That's why I can produce what I like, and earth has no say in it. Now I created the earth position myself with matter state.

Q: A Chinese man from Indonesia says that he has contacted his friends in Beijing and they feel the government has so much confidence that they can overcome the virus and have started giving injections from the US. He feels that the governments of this world will never understand the plasma technology. Mr. Keshe responds, the problem is not anymore for the government to understand, but that you understand how to save your life when the time comes.

### **Corruption of World Leaders:**

Mr. Keshe has found that when working with the governments he is working with people who put their own self interests first. He gave the example of the Ghanaian president who has stolen more from his nation then it can ever afford to pay for in the next 20 years. And the Europeans and the Americans are watching him do it, because they know that now they'll bring the richest nation in Africa to slavery because of one man. After dealing with leaders for many years he realized more and more, that the world leaders are given a private bank account from the day they take office, with the implication, "You can do what you like, this is the commission for what you take." It goes all the way through the hierarchy. We see it in Europe, Asia, Africa, South America, and right across the planet.

### **New Way to Choose Our Leaders:**

The human race has to find a new way to choose its leaders. Do we choose by soul or by the ballot box, which as we all know, is touched and fabricated to go the way that has been planned, as has become especially clear with Trump. If we open the school of thoughts which we see running some of the nations, you'll be shocked. The same president has both parties in his pocket. The hypocrisy of the democratic world has literally come to the bottom, so don't expect much from the governments of your state. When the governments stand without a border and are elected through the soul to serve the people who called them, then we have a government. This is why we have established the Universal Council with members whose sole aim is to serve the people. None of the members have a vote to block, instead they have a vote to elevate and a vote to support. They have no vote and no way to take the KF as a structure to ransom, either in its operations, ruling, or in anything else. I have become very hard, but very tough and there is a reason for it, because during this time of transition it needs a very strong hand not to

allow any games of the past to be played, at least for the next 12 to 18 months. It's very important, for both the KF, the people who run the Universal Council, and the souls which have volunteered to serve humanity beyond the borders of this planet. There is no school of diplomacy for the STM to survive the life outside this planet. We cannot train diplomatic souls. The reality is, in the past we could not see in the night, and now we have a night vision glasses to be able see in the night. So too, when our knowledge reaches to be able to understand the strength of our soul, beyond the stupidity of Einstein when he said the speed of light was the ultimate speed, when you see that point, then we'll have the vision to understand what is moving ahead of us, and what is the intention of the soul. We'll have a soul detector, or visualization of it, and then we'll be able to see which part of the soul is responsible for positioning itself. As it is said, "I made man in the image of myself," so we'll transfer that to the physicality part of the body of the man.

We should not be questioned in our variety, but in our oneness and understanding the totality, and we all want to learn more. Rick says, we missed the last sentence there. K- It means God didn't want you to understand, as usual when He cuts it out, it means man is not ready for it.

### **The Question about the Soul to KF Family:**

We have put our trust in the world leaders, and in leading us they have brought us to the point where peace and prosperity have diminished. It means, it's time for the man to lead himself with his own soul. The way to do this, if you understand, is that you become the leader of your own physicality. In this regards I put a question today to the worldwide KF Family. A lot of people didn't understand it, but one or two did. Many of you should have asked yourself this question without reading it. The question was very simple and the explanation was simple, but the KS are so entangled in the dimension of the physicality of their own lives, that they'll never find time to elevate their own souls, in the easy way to go. I didn't put it to one section of the KF, I put it to the whole KF worldwide family, to see if those who have elevated their own souls, would come and share their elevation with the others, not by talking, but through their souls. I started in a very simple way, this is part of the structure that I am trying to bring to you, to start thinking and understanding. I sent the question at about 1 AM this morning, this shows I have no sleep.

*"One question for all of Keshe family," that's how it starts. "What would be the first thing you would say to your soul, when you realize that you have managed to be able to communicate with it. In man's dimension of understanding of his existence. " (somebody said, I would say hello, it was very nice.) "Would you expect to hear its voice, or to expect to feel its emotion, and convert it back to man's physical understanding of its meaning, through your physical emotion or its emotion, that no language is needed. Then you ask yourself, is this not the way I used to talk to my soul when I was in the womb of my mother. That's a seed for thought because if you can mature enough, then, now knowing this, what would change in your life, that you can accommodate both your soul and the soul of your physicality to live in harmony in their own, both dimensions. If and when you manage to do this, then you have entered the dimension of universal*

*communication with your own soul and the soul of all those who live across the universe."*

I saw a lot of translations, so I added, "*I put in there, in the world of universal language there are no "Yandex" translators as we have here in this Chat. It means the universal language is understood by all souls."*

When it comes to the point of maturity, as part of it, we have to understand what we are made of, and to what level do we understand the true understanding of the existence in the dimension of the universe? Maybe one day, mankind will understand the truth about himself. Did we create the soul, or did we come with the soul, and we choose to ignore it, because it was easier for us to live. Try to understand what is going on. I will start teaching more and more in a few dimensions, so that as you elevate in knowledge, you can see the other dimensions, you can see the truth about your own existence. All these teachings are not for you to watch the others. All my teachings are in elevating your own soul to understand its workings. If I wouldn't have shown you how to make the Gans's, so that you could see how it creates energy, and then you got to see how the hollow center was formed in the center of the ball, how, then, could I have explained the soul?

A couple of days ago, Caroline said to me, "do you know what they are doing in the KFSSI, they are talking about a hollow earth, how is it possible?" I said, this is the truth, it is there. She said, but the Gans ... I said, no, this is what it is. The earth is hollow, but read the first book, and even read the forth book, the "Creation of the Solar System," where I say, there is plasma which is hollow, and there could be some N materials, and some matter states, because if you don't accept and understand this, we are back in the position of Stephen Hawkins -- ignorance due to lack of knowledge of understanding of the totality work of the universe.

#### **Elevation of the Soul through the CL:**

The teachings will become more and more in the dimension of the structure of the soul. Before, you needed a dynamic reactor to understand and to see the hollow center. Now for the first time in a Cup of Life, I'll show you a soul without the dimension of rotation. The soul in the rotating ball, is in the dimension of the work of the universal objects. The soul in the Cup is the same as the physical structure of the man, which has no rotation, except the rotation of the fields, which we call it blood.

That's why it is called the CL, it's not that it gives you life. It is a life. A cup, which within it, is life. The humans say, "I use this cup to save my life." I gave you in the true essence, in the true essence, I gave you your twin soul, at least in a dimension that you could bring it, that it could elevate you. It's the first time I put out a system that elevates the STM in conjunction with the STP. I told you, that you have not even understood what I have given you.

#### **AA on Top is Feeding the Soul:**

Interestingly, a lot of you are making complaints about the Cup, you say, there is something wrong, I don't create enough Amino Acid (AA) on the top. Have you asked yourself, why you are not producing enough AA on the top? Because this AA, itself,

through the creation of the soul of the system, is using itself. I explained many times, it's like a leaf on a tree, the AA is sitting there and it's feeding it, because it was created to absorb the energy for its feeding. In the Cup if you don't see AA, it's because the soul of the creator is being elevated. You are feeding the energy of the AA to elevate the soul. That's why you don't see it. Those who see a lot of fat (.. break in connection ..) I gave you a twin soul to elevate your own soul, but it doesn't get energy from nowhere. It needs the universal energy, which comes in the form of the fat. The fat on the top of the Cup is the same as the fat on the leaf, which is absorbed by the interaction of the fields. According to its N material, it absorbs its energy as a protein, as the AA. Isn't this the same situation, but he (Cup) has a passage here, to come in. You are so short sighted, you don't even understand how I am elevating your soul without you understanding it. It the lack of AA on top, that shows how much you yourself need.

When you go back to the very first reactors that I built, in which the Belgium's opened up and saw the magnet, this is how it was designed. The STM, and the physicality of the man, and all the parts of the man, that what needs to be repaired or elevated, was done in conjunction with the two souls at the point of physicality. One day when these Cups are opened and understood, you'll understand the urgency and the thought that I used, which caused me to do what I did to save one life. I left it for the soul to accept. If your soul is not accepting, if the STP is not accepting, then you'll see very strange behavior on the top of the Cup. The energy for the soul doesn't fall from the sky, you have to bring it in and be able to transfer it. It is a Cup of Life, because it gives you life, and you don't need to drink it, I already made the transformation for it. I made a toy, you just need to play.

#### **Using a Plastic cup:**

Q: Can people use a plastic container, instead of a glass cup? ..? K- You see, when you use a plastic container you bring a dimension of weakness, and that weakness will reflect in the STM, and the physicality of the man. The C and H bond of the plastic fixes you to the dimension of the physicality of the man in the matter state.

#### **Ceramics in Structure of Universe:**

Ceramics are very much in the condition of the structure of the universe, in the dimension of what we call, the diamond structure of the matter state. It's what we call ceramics. Mankind has not yet understood the work of the ceramics and when we make flight systems using ceramics, you will have truly progressed. It's very important that's why, when we negotiated with the Chinese officials to build the first factories in China we wanted them setup where the first potteries and chinaware's came into the world. I have taken the knowledge to the origin of the base, the village at the beginning of the Silk Road.

#### **Water coming from Hands:**

A KS asks, when I holds the One Cup for one minute or more I start to seeing water dropping from my hands, and it's a lot of water? K- Is it because you are shaking, that you might meet your soul? I always said that what you wish through your soul you can create in the palm of your hands. If you wish gold you can create gold. Is water something which you are worried about, or something you see as, a water of life, and you

convert that into essence, and then you will see it as water, because you are holding a cup and you expect life, and man connects life with water. KS: I always wished to create a beautiful life, so maybe this is, water of life. K- This should be called, the "Cup of Soul," and now you understand why. Let's see what changes come in the next 48 hours, and how our world leaders have planned to join humanity to another lower level or higher level. It's very interesting, how and where the humanity will go from here on.

### **Iranian KS bringing New Vision:**

The Iranian KS are working on visualization of the plasma and measurement of it. Maybe in the next few weeks we'll have a system available, then we'll be able to see which line of M field is in the pole, or the pole of the core, or in a reactor, or magnet, and at the field strength of which planet, plant, or soul. The Iranian scientists are bringing totally new scientific dimensions, in a very rapid way into the KF. They are joining the management development and systems control at every level in the background. We are recruiting more and more of them because they are bringing totally new understanding, in how they understand and work with the plasma, and it's just a hidden gem which we have opened a Pandora's Box. The essence of many aspects of the technology will rise quite rapidly in the next few weeks and months. Currently the KS are locked into Gans's and plasmas, but the Iranian scientists are bringing a new dimension into the total structure of the understanding and application of the technology, how they see it and want to add to it, and how it is going to be done. I am sure that very many of us will elevate by this new knowledge and cycle which has come across the KF. The whole structure of working with new understandings comes with new systems, so a lot of you will start thinking in new ways and bring new knowledge and add new things to it. I have seen, what I call, the old leg of the KF is still struggling to keep their foot in the door, "because the way we did it, that is the way it has to be". We need to allow the younger generation to come in very fast so they can bring us, the "old guard", back to our strength to understand more.

I told the head of the KF recently, that by the time you get to be about 40 to 45 years old, step down, because then you become a block for the KF to move fast. Find someone who was young like you were in the beginning, that can take you that way. When we appointed Ella as that head of KF some 2 - 3 years ago, the old guard, and still some of them today, have a big problem handling a woman, but she is a gorgeous woman and at a young age, and she knows she is taking the KF through. It's a big challenge for those who think that things have to stay like before.

It has to be this way with all of us and the next generation, knowing that if our existence stops the progress of man, then is the time to step down. This is the maturity of the man and not his weakness. It has to be that way. We are here to "be" and not to "have." This in itself needs a lot of detachment and understanding at the level of the STM.

Thank you very much.

End of Summary

>>>

## **English Transcription:** (Mr. Keshe starts 3 pages down)

(:12). We are going to use the One Nation platform for people to ask questions about the One Cup One Life if they still have some. I just reposted a link with my One Cup, and how to separate the Gans from the AA. There is a link in Wiki which I circulated out. A lot of people don't know how to harvest their Gans's or to wash them or apply the whole process. I urge you to post your cups out, how you processed it and how it started with pictures, after days and weeks, with pictures. If they are sidelined, as one of the people was creating rust, a reddish in the Cup and they realized that they had used galvanized zinc, so there was Fe in it. So they are creating a new Cup. These are tips to share, .. Does anyone have more questions about the One Cup? (:14). Q: Instructions how to open a battery to get the Zinc. ...

Asking people to bring materials to make One Cup to Mexico conference. ...

(:16).

(:18).

Q: What role does the battery play to accelerating the Gans production? R-

When the battery is too much it can wear the Nano plate off. The One Cup is for emergency situation ..

(:20). Q: Is that volts or amps?

can short the battery out to deplete it.

(:22).

(:24). Use less than half of voltage .. down to a small amount, should not be heating up the battery. Good to short out the battery with wire across the terminals, carefully. a quarter volt. (:26).

(:30). Keep it simple ..

If you have time you can do it like a standard CO2 kit.

(:32). R- says can't connect wires directly without diode or battery. Can use a lighter to N coat if no torch. Q: Can you use this prophylactically if you don't have the virus? Mr. K recommends washing the face with the Gans water if you don't have virus. It's the main recommendation is to wash face and hands with water for any virus, spray the mask with water. .. (:34).

C- you don't need to use if you're not in danger.

It's mainly for those traveling.

(:36). C- He is teaching we are short of souls on this planet, we can use at least a minimum of another 25 billion. Do you recollect that teaching. Shows One Cup of K teaching. He has explained the positioning .. the red in the middle, that is the position of the new soul which you have created. It has connected you to better understanding of what your MaGrav systems are for. .. go to 313 KSW 2:37:34, explains how you create the soul in One Cup, (:38). thousands of people are creating One Cup, some many Cups. ... 1 new soul has been created by you yourself, ... you have increased the population of souls on this planet, it was created to give and to protect, that soul is as pure as can be, and it's has a joy to serve. .. each time a One Cup is made it creates a new serving soul, at the same time you have become a giver, so all these Cups are glowing like lights in each house as a beauty. At the same time K is multiplying the souls on this

planet to strengthen the field strength of giving souls that are needed. If you realize you are a creator, (:40). and have created a Cup

(:42). ...

Q: Can the Gans water be stored, is there no time limit on it? C- Yes, because you are going to add your AA to it. My batter is flat enough, because the bubbling is coming very slowly .. Carolina shows her reactor. Q: How are the AA mixed in, when you take off the (:44). fluid from the Cup? What I usually do is scoop the top layer as it is getting produced with a plastic spoons, slowly and gently, and put them in a separate glass, I keep on harvesting them from my container. I don't wash the AA, they are too sensitive, the minute they come in contact with normal water they dissolve very easily. When I harvest the Gans from the bottom with a syringe, and take my time to wash it, 3 or 4 times. When the Gans is washed, then I insert the AA in the Gans, I shake it, and leave. From there on the AA will integrate into your Gans. In this way you have added them in your Gans water. The first times you drink it the water will taste a little salty because the AA carry a little of the salt. I just made them for veterinary to be given tomorrow. ' you have to refresh your Gans with some extra AA.' If you already have you Gans's separate, washed and ready. Ready made Gans' in clean water, I just squirt the AA in it, (:46). and I shake it, and they mix. that is how simple it is. ... the more AA you can harvest the better. Any more question. Q; Can you explain the dilution process. After you get the cloudy greenish white material on the bottom, how do you get the Gans water form that? ... you have to let it settle to the bottom, and you have the saltwater on top. How do you get it out? C- I usually put it into glass bottles .. (:48). I use glass. I suck the Gans up with the Syringe then put them in the clean water in bottle. Let them settled some hours. .. save the saltwater ... I taste a little when the salt level is gone or ok I stop washing. then I squirt the AA in it, shake it very good and let it settle down. ... (:50). Then use and keep refilling, keep a minimum of half liter in jar. As your Cup is producing more, go through the same process of washing it again, and then if it is ok washed, when you have emptied your Gans water down to a half liter, then you add the fresh Gans that you have made and washed, to the already existing Gans. So you can keep on adding to your original Gans water bottle. Because the more you add to it, it keeps the Gans very fresh, and you an keep on adding your AA to it. Until you decide to make a 2nd or 3rd One Cup, so it is a never ending process. You keep using the first bottle you ever made because you keep on refreshing with newly harvested Gans .. (:52). .

(:54).

.. reads K questions to the KS ..

reads again ..

(1:00).

(1:06). C- When there is water underneath the battery. K says you should put the battery higher than the water level and this will not happen. The water goes through the cover of the wire like a hose, and the plastic tube of the wires should not touch the water.

(1:08).

(1:12). it all depends on

solid Cu wire will be slower than stranded. Within some hours you should get some Gans... C- I might not ever turned blue, it doesn't mean that it is failed. It might have a completely white color. .. You are in relation with that Cup of Life you are creating, a new soul, it's in interaction with you yourself so it will produce most likely the field strength you need the most. If it is more white, then it means it will balance you in that field strength because that is what the Cup is giving you, what you need. You all are using the same settings of the Cup, but that is not what is interacting in Cup, ok you bring everything in the matter state together to produce .. but what the Cup is producing is in tune exactly what you need. (1:14). Give to your Cup from your soul, from the start, even if you are giving it away give it the intent to serve that family or where it is going, that it will create the field strength to where it's going. ...

if you are a naughty guy you are going to create a naughty MaGrav ..

it doesn't need to be told what to produce, it will produce what you need, that's why they are different colors. .. (1:16). Q: Why use the tap water rather than distilled? .... the tap water perhaps already has all the elements and minerals and materials that were made to the local area. .. it would be using the water from the local environment, to create the balance. Potters can put the Gans water in their clay and it will take the field strength wherever. That's why we use clay from local area. R- Great idea for products ... (1:18).

.. Nothing goes out in Blueprint Days that are not safe. We have to be clear that it is not the Gans to be ingested, (1:24). use only the water on top of the Gans. ...

For every step of the process go to KF Wiki, it's all there.

.. Go back to 313 KSW start 2:00 you'll find all the answers about why he is not making CuO (alone). because it's a virus it's emotional based . (1:36). Why each plate is positioned and combined.

.. when you are under stress, you are consuming so much energy that you are inviting microbes in,

(1:38).

C- CO<sub>2</sub> is a pain killer, Zn is to balance emotions, CuO is disinfectant, CH<sub>3</sub> food container, Mg is connector between all of them. a quick version ..

(1:44).

(1:50).

(2:16). go back to the Blueprint day with Dr. Rodrigo ?? Cancer ??

(2:19). Talks about getting virus in Brazil. One person welcomed us who had a very bad flu. We went down, K, me, son, Ella, Stanly, Rafael, Estella, that was within 3 days, very fast working virus. .. (2:20). (she's implying that they had this Coronavirus in Brazil in December before Christmas). They were trying to keep in quiet that nobody would panic.

(2:36). About using the Gans in rotating reactors rather than drinking or pouring in

(2:38).

English Transcription:

### **Mr. Keshe teaches for 2 hours 20 minutes:**

.. Something which we think will become handy very soon. (2:43). in the coming days, we know the Chinese government is going to lock down city after city. We know that the movement of people has been heavily restricted. This will go in a very critical way across the world if it takes hold. If by next Monday we'll see the restrictions, then what comes very interesting, if instead of creating military zones that the Chinese military forces are supposed to restrict motion and movement of people in cities and areas, is that if we can make these domes, the same as was done on the Caribbean island during the hurricane, in these cities. We can literally shut down the back fare of the microbes and viruses under these domes. This is a big possibility, if this situation carries on, we'll see it internationally as one of the solutions to create these domes as part of One Nation, One Planet, and the situation will take shape in the next 2 weeks. What we see now, even with these injections which the Americans have brought in, we see in the past 2 days since they started to using it, has created a bigger mess, but it is not (known) in public yet. Is that (it) correct(s) the temperature of the patients (and it) drops, but within 7 days they all die because of suffocation, from lack of oxygen in the blood. (2:46). We have had this report since the beginning, that they have had these lung problems as part of this disease, but these injections are not helping either, by the look of it. There is a concern, that there is no immune system (?response) in respect to this virus. As you know the KF is on the edge of work with a couple of nations on this front, and the only way we see, is the creation of domes over cities, in a way to contain the viruses and then, what we call, to work against them. The KF in the next 24 hours will release a new T, which sterilizes the environment and at the same time creates water to drink, and infected water, we will, by early next week, release a new T as a water based feed program. Which means when you place military forces, if you want a bag of rice, you can't go out of your house. You call a center, they come and put the bag outside your door, you can't open your door, until the military officers have gone, to make sure that there is no interface between the people inside and outside. (2:48). This is now up and running, and will become much more in the next 72 hours across China.

What has become permanently as we see, as the Chinese are making these One Cup, One Life, if we increase the number of One Cups then we'll create that dome condition. It's important for KS to understand, that if you live in major cities you have to protect yourself in these conditions. The results we have, we know, we can use these dynamic systems to cover a vast area, but the proof of it is something we don't have, but it is, what I call, imminent situations and solutions. What is interesting is, hopefully KF will submit a European certified system to the Chinese nation. It is for the Chinese to take it up. It will be discussed in Tehran in the next few days and Iran will export this system as part of the solution in ports, airports and everywhere else. We are in discussion, and if solutions, can be diplomatically and politically found, all the airports, ports and cities can be made safe in a very rapid way. (2:50). We are waiting for our team to do the

certification today, maybe complete it by tomorrow and it will be offered to governments. It's for when you come off, or enter the plane, the planes will be fully sterilized. This is one of the only solutions left for the governments. We are discussing this with the Iranian national government officials in less than 24 hours, hopefully in Tehran. We'll launch it as, what we call, securing the ports and airports and making travel again (virus) free and it doesn't matter where you come from, and even if you are contaminated, you'll be decontaminated (by this system). These systems can be rapidly deployed across the world, it will take maybe 2 to 3 weeks to secure most of the airports. It's a KF innovation and invention, and with it, we hope we can create this dome effect. We are trying as a leading organization involved in over coming this disease to bring some security, but not a false hope. The problem at the moment is, even in China, the KF systems are in the operation factories, but it is impossible to move the material across the nation. We know there are hundreds of people needing it, but as it is not known to the outside world, the bigger states in China are locked down. They're totally locked down, it means nothing is moving and highways are empty. (2:52). This is supposed to go until the 9th, I am hoping we'll see some control over it, but as this is a public teaching we'll this platform, and again on Thursday, to release further T to overcome this virus. We are monitoring a lot of things on this pattern.

I am told that Chinese government officials are not happy the way KF is openly discussing this, but it has to be discussed as we are one family, we can't hide something under the carpet because another part of the family is in problem. We see a 'hot line' position by the Chinese government officials, because they have lost control. We'll see, and this is our announcement to the Chinese government officials, that they understand that there is no fault in what has happened, but there is a problem in securing nationals. We are monitoring different positions, and it is alarming in what we see. I will release documents to support it, in maybe the next 2 weeks, that this virus could be a tactical virus, it's not coincidental, and what I explained, more or less, 2 days ago, to the Chinese community in a public teaching to Chinese KF supporters, this could be one of the first times, (2:54). that we have seen a race, gender controlled virus. This is something we are carefully monitoring and it will be interesting if the KF groups can open a Chat, or we'll build the research team as one of the G24 or whatever we have, to monitor this virus. What we see is that all of the victims are full Chinese, we see non-Chinese contaminated, but it is a normal flu. But up to now we don't see, or it is very rare, (to see non-Chinese infected), but to connect the background to it. There is a genetic connection. This is one of the main concerns of the KF. To stop genetic modification of the virus by race, the KF will release a new system within the next 3 weeks, to overcome any genetic modification to the virus. This is important for KS to understand, because if today it is the Chinese, then tomorrow it will be the Arabs, then the British, and then the South Americans. And these people will take nation by nation, race by race to ransom. The Rothschild's family is aware of our work, and the my response to the latest communication to the Rothschild's group is, the answer to your question of collaboration with the KF, is absolutely no. We will not sell the human race and in response to the email you have sent to the KF, (2:56). my response as head of the KF, cooperation with the Rothschild's family is totally and ultimately rejected. We stand as One Nation as a new race in a new style of living and my work, in conjunction with the KS, is to free man these conditions. We do not expect to

overcome much, but at least we can create a condition for the Chinese and non-Chinese KF to live a safe and secure life. The position about the race infection by virus, has been passed to the CPC and Chinese leadership yesterday, as we saw the pattern. It has to be very clear, that this race, genetic modification virus, with the new T and what we understand has no room and no position, and can be overcome. We have to understand how to do it, and as we found a solution for reversing the genetic modification with Monsanto seeds, now we have the T and have had it for a long time, because I thought this might happen about 10 years ago, and I developed a T for it. If we get further confirmation of genetic modification virus by race, the KF will release this, through the Iranian government across the world. (2:58). Because if it is race by race, which races do they have planned in their book. Is it going by the wealth of a nation, or do they leave the poor nations, that in time, every body will be poor.

One of the problems with the KF is that we are outspoken, because we have the T and the knowledge to be able to match, and because we share the knowledge so freely we have become the pain in the back side of many world leaders. But what is very easy is that those who create these problems, now they know there is a solution and they invested so much money on nothing. In the Thursday teaching, as I explained on Monday to the Chinese community, race, gender virus modification, has no room in the new present knowledge space T. As I released the Cup of life, or One Cup, One Life, we'll release One Cup, Free Gender Cup, which means it doesn't matter what race, religion, or color you come from, the new modification virus will not be effective. But we have to settle a lot of things first, with the Chinese government, before we go into the next move and I know the Chinese security and other people listen on our line in a different way, as I told them live on the teaching of Thursday, as we were told that officials from the CPC will be online listening. They did not like what I said, but they understood that we were correct in what we said. (3:00). As one of the security people told us, if you would have said something wrong, they would have shut all the Q, Q down by now. We have to understand that we are correct, and at the same time we need to stay correct. Try to spread One Cup ... whatever you want to call it. because the next Cup of Life will eliminate the new style of genetic modifications by viruses.

We saw this initially last September in the pig flu's, because some pigs in China don't get the flu, and certain pigs do. Strange enough, mainly, (it attacks) the pigs which are not imported from the US. It's very obvious there is some pattern, connection to the virus and now we see it with the new disease. The interesting point for us, will be to see who has actually ordered the production of this material, and in whose benefit. The situation in China clearly points the finger to .. in some directions and some ways, but that is for the Chinese government to sort out. We have been asked if we can release the name. These kinds of things are in the hands of the KF security team, (3:02). and in due course, there will, if need be, a release of the names of people, we have in our possession.

The only thing you have to do as KS, as we see it, no non-Chinese people up to this minute, unless somewhere in the background we see your ancestors have a Chinese descendent in it, otherwise you are safe. You'll get the flu or go through, what I call, a deep flu, but you'll recovery. But the Chinese, because it's locked to their race and was

modified with their pig flu, they are not immune to this. In other words, in speaking with the Chinese government in the coming days this will be on top of our agenda. If we notice any infection by non-Chinese, but, that also cannot establish a link by having Chinese descendents, it will be very interesting for us to know. In all the cases coming from China of infected, unless they are Chinese descent, they just go through the flu session, very heavy and they come out. This flu is very severe. If you are not used to it, and you pick it up, it infects the lungs, it's heavy. We had such an infection about 2 months ago in Brazil, only men in the KF team got infected, not the women. (3:04). This we kept an eye on and I, in a joking way, in one of the teachings I explained this, but we became aware of some games that were being played, and it is, there is possibility for KF KS to spread these Cups as much as you can, because somewhere down the line you never know where your great, great grandfather was.

These are the things we have to watch, we take the KF KS as a point of communication with world governments, and they sit on these teachings, and they listen, even we heard this afternoon, to write to another report for the Chinese government from KF, they went on one of the teachings, in the past 3 weeks to take an extract out of it, to be able to put as a proof for whatever they wanted to convey to the leadership. The Chinese security and scientists are going through the KF KS teachings and others which I teach, to use as quotations for the governments movement in the next step. The strange thing is they write to us that, we have done this or taken that for our scientists to understand.

It's taking shape, but the shape it's taking is not, but maybe it is the way it should be and what will come out of this mayhem we'll see, (3:06). more or less, economical balance onto other nations than China. If this economical situation carry's on, as no one will be able to travel to extend the work, or export from China, gradually in the next 2 to 3 months, as world citizens learn and get accustomed to other things, we'll see the setting up of factories, which up to now China had control of. A new industrial structure will take up, that nations don't become dependent of one nation in total. To that effect, the KF is rapidly moving part of their operations out of china into the Middle East to the nation of Iran and into AZ, that we'll start rapidly increasing our independence from China. This is part of our work and we have to. As I speak to people and see what is going on, a number of major corporation's in the past 2 to 3 days have started looking, on the possibility or Red Circle in China, and what happened. How we can keep the market and how fast we can replace. There are 2 nations left, we can match even to replace the machines, which Chinese cannot produce, and those 2 nations, are industrial revolution, end up somewhere which is India possibly in a small way, partially we'll go to Iran because the industrial revolution in Iran is very strong, and then partially we might end up in a combination of European nations. With this virus we might see an economical balance back, (3:08). on to the scene, but it will take another 2 years.

The Chinese with this virus will loose their dominance in many sections which they were more or less an exclusive supplier. At the same time, as China controls 90% of the world's rare earth materials, with the new T, plasma Enhancement System (EU) we can produce any rare earth materials, what we call exclusivity of China in this field, is more or less over, with the new T. We tried to find different ways to work within China, but

they are now in a lock down condition. We'll hear more in the next 24 hours. Cities and states will be shut down until they can control it, they say within 2 to 3 weeks and in these shut downs, whoever is going to die in that state will die. The ones who come out, have gone through the flu, are the survivors. This is the final plan as we see it. This can toll to millions of people, if that way is done, or if we find the dilution of a number of citizens in an area, which are expert in (a field) these or one, they will lose half of their specialized work force. That in itself will bring a dimension to the Chinese export market and the economical situation. There is a possibility of airport bans, then ship bans, then a lot of other things will come into freeze, not only with China, but with all the nations, in respect to each other, (3:10). If we see any development of these kind of flu's in any western nation, we'll find borders back again in line and across the Europe. But at the moment that is a distant possibility, that the nations will secure their borders. It will come line by line, and then we'll see anarchies which comes with it, and controls which come back, and again division of nations, which we don't see to happen but. I explained this in the past 24 hours, clearly to the Chinese leadership and clearly to 2 other nation's leadership, they know exactly what we are talking about, and they consider it as a viable position. But how it is going to be done, comes back to the work of the KF KS, how you can spread the work of the Gans of the PI and how you can secure your own lives, and live a safe life.

Make sure that 3 things, as I said in the teaching ... to overcome this disease you have drink, breath and wash. These are the 3 key points, you have to wash your body, face, hands, with this Gans material. Secondly, is to breath, as Rick was saying, through breathing masks, which are soaked in, or through towels which you create. (3:12). Those of you who have a breathing problem, can breath through what we call, hubbub or shisha, or whatever you call it. It is very easy to make, make a hole on top of a jam jar, put 1 straw to the water and 1 to the back of the top, seal them and you have your system, just put a Gans water in it and breath. Try to use a plastic cap when you use these, use a glue and seal one pipe that has to sit in the water and the other pipe as high as possible near the cap. You can just open, fill it up, and then empty it, and breath it. Because this virus is emotional and it is lung infection connected. So you have to kill the infection within the lung and strengthen the lung against the virus, then the Gans water, which you create yourself. By international law, anyone who makes something in their homes, he can use and consume it. So as you are making the Gans material, yourself, the Cup of Life, you are free to do so, and this is what the Chinese authorities have just realized, what is in their hand. We know in the next day or two, the Chinese government will promote the Cup, One Life, in a different way, as to be a Chinese invention. We are aware of it. We have been told there is a possibility that the KF invention will come out as a Chinese delivery of T. But it doesn't matter if it does, .. we have seen Chinese stealing T, but still this is saving life, it is still good. It still serves its purpose. (3:14). But if you use the Cup of Life (CL) now that you have produced your materials in the past few days, you have to understand, that you have to wash, breath, and drink, the 3 goes hand in hand. Breathing is much more important than drinking, for those who have a respiratory problem. If you already have a flu, this is the only way you will be able to overcome. The ratios are, as the Cup produces according to the emotion of the producer, will fit the lung. This is what I told you the CL, One Cup, One Life is a life system and interacts with the soul of the

producer. You will understand more and more. This is not an ordinary cup and if you follow it the way I set it, you will understand exactly how and why it was set. Maybe in another few hundred years man will ever understand what is in that cup, the way you do it and you think you understand all of it.

If you look, in the way I taught you, with the spring coils on both, and the solid, if you look at it, it is part construction of the MaGrav. There is no difference to it, but you never understood the work of the MaGrav, so you don't understand the beauty of this system which is given to you. It's exactly MaGrav T inside it. You will understand that it carries the energy of the soul and life within it. (3:16). Those who deviate and make a different version of theirs (for themselves). Let be it. But the way we set it up, as I said, it's exactly like how we set the MaGrav units. But there is a twist into this, and the twist, sometime in the future when people replicate it, and put it on computer analysis and everything else on it, they will probably say they know. But I know what I have created and what I have given you, follow it, as I made it. No other way. If you want to follow the ways you want to, you can do it with or without the battery, it doesn't make any difference, but the connections have to be separated and then added. If you use it without a battery, the two outside (Cu and Zn electrodes) you connect together, and take a piece of wire and then connect it to the one in the middle (Nano coil). You are replacing the battery with a piece of wire. You cannot connect all the 3 wires together, the function is not and will not be that way. It's a little piece of wire but it makes a lot of difference in operation of the energy and plasma production. Stay, that you understand and follow the pattern of the work, and understand that, please do not drink any of the Gans material. We'll tell you later on, if it comes critical, how and what to do with what you have, in so many different aspects. As I said, the teaching at this level, we'll come to join what we call, the Tuesday and Thursday teaching as part of the work of the KF until we get through this crisis. (3:18). Until we see that this crisis is solved. If there is anything new in any of the 2 teachings, we'll teach and refer people back on Thursday's to Tuesday's, or Tues to Weds. But it will be interesting that, if you hear any non-Chinese who have died of this virus, inform the KF, we are gathering data, we want to know why. This is very important because, if, as we know, we have data, and it looks to be. When we find the developers and the spreaders of this virus, which we know who they are anyway, they'll be committed for genocide. They invaded Iraq under false pretenses of what they are doing officially in China today. It's very strange how they think they have released themselves of a lot of problems. Can I have my phone, .. the things are not coincidental. It's very interesting because I have a reason that, (3:20). I'll read this because we have to understand the response. These things you have to understand, nothing comes coincidental or accidentally to KF. .. We need to be aware of the totality of the totality of the work and I have to read this for the KF to understand, we don't read the name. Says US .. global >>> Italian project sponsored by Rothschild's Foundation. We do not clearly work with the Rothschild's Foundation or organization. It says, they are working on a global situation pathway to help humanity to achieve a green resource and a merit by, based economy in a world without poverty, borders, or war. you have to see, "merit based economy". Then they are trying to say they know us, have been around us. It says, as we get through this epidemic, I may be able to help the KF with funding through the Rothschild's Foundation. We can discuss that in the future. (3:22). The KF will never

discuss any economical situation with the Rothschild's family, or organization, or foundation. We have answered you in public. To the Rothschild's organization, we do not accept. The KF is solid it doesn't need a handout from the Rothschild's organization. We invite the Rothschild's organization to join us, to change their ways and their habits. If you notice, it says, "I may be able to help the KF with funding, through Rothschild's organization." We may tell you we don't need the Rothschild's Foundation to put humanity through more pain and suffering. My answer to the head of Rothschild's organization. You have to understand that when you are independent and strong you don't need to sell your soul. This is not coincidental that they send such a message, at such a time, when they know we can curtail their strength.

Any questions? (3:24).

Q: For the Cup of Life when you use the flame can you use a different flame like a gas cooker, to Nano coat. K- As long as you can turn the Cu to go red, what we call fluid red, you'll have your Gans production. You can still do the old caustic way by putting it in the caustic, no problem. If you have advanced enough to create N coating through plasma system, no problem. If you have advanced like the ones in KF KS research labs, to go to remote plasma production, still it is good. It has to reach a point, not just making it black, but understanding how it is made. The whole thing is to produce the N coating in a correct way. You can even use a cigarette lighter and if you can build it to that point it is good enough. (3:26). But it has to go through the phase of, when you do the fire, it is important, that it goes through what we call melting phase separation. That top layer will go through that separation, if you rapidly quench it in cold water you'll see the layers will rapidly jump off.

Q: from Breathairean Institute, Brandon Dui, the institute was formed by Mr. Wiley Brookes, I met him when I was 4 years old in 1981 when he came on national TV and lifted 10 times his weight after fasting, he claimed to be from a world above this one, part of humanity that stayed in a world above this to oversee the project that Mr. Keshe is working on, basically. Before he left his body his final piece of advice was to closely watch the KF, (3:28). because they were in perfect harmony with what he called the new world, which was born on December 21, 2012. I say all of this to say, I did apply for studentship to the institute, because of my nationality status, the last name (day) Dui, is actually a title of nobility, so I have taken this path and left the US and I have indigenous rights on the land as a missionary. So that may complicate my joining the institute. I have some information, I have noticed some consistencies .. K- What are you talking about?

Q: The Keshe .. K- No, can I ask you why, when did you apply and have you been rejected? Q: I have not been rejected, a little over 2 weeks ago I wired the money. K- You have paid ... It doesn't matter .. (3:30). ( internet problem ...) The request was ... you have to realize that you have to pass a security check when you apply, you can pay as much as you like, until you don't pass a security check, it might take 3 weeks .. etc or 5 months.. . (3:32). Q: can anybody hear me? yes, this is not surprising, this is what I expected as soon as our foundations came together, can I ask you guys the students a question ..

K- The KF at this moment is going through a rapid works, until you don't pass the security, it doesn't matter how much you pay, you will not get access to the teachings. This is how it has been from the beginning, we don't give access unless, (3:34). there are some emergency cases that is considered, and at the moment the KF team is spending all

its efforts on the education side and ... we a lot of ?? but you have to wait. a lot of people would like to join these new research groups now that it has become more research. ...

(3:36) . you can start breathing. Q: .. One of the things contained within the Institute that I run is a 100% accurate divining method. I actually found my higher self, the physical body, non-physical body of my higher self through. My teacher basically left this method of divining and I have taught on the national stage here for the past 2 years and getting ready to teach for the third year. It's unanimous amongst the participants that this is a unique method of divining. One of the things we found that is within the Breathairean Institute is that everything has an energy that will either pull one up or pull one down. Basically it would be known in the world as the Christ energy pulls up and the Antichrist is the energy that pulls down, and between those 2 poles we get the tension that creates the physical life.

K- Let me explain to you what a nonsense you are talking there. Sorry about my language. So anybody who is non-Christian is Antichrist and energy is down. Q: (interrupts defensively) No that is not what I mean, that's not what I am talking about. K- You had better phrase it the way I understand it, and many people would look at it. You better phrase it in a correct way. The position.. (3:38). let me explain from a scientific and physics point of view, maybe as a scientist. (Q: yes..) It is you who decides what is for you, what elevates you and for you to decide what lets you down, or brings you down. And it is you who can change one to the other. It doesn't need any other thing, except self-consciousness at all times. (Q: So are you saying..) ?? ... lower strength. Q; Are you saying that we can take anything and turn it into anything?

K- Of course, I can show it to you. You give me Cu I'll give you gold, I have done that. You give me water, I'll change it to blood, I have done that. It's what you have knowledge of, and what you can elevate to. These what you were talking, was the nonsense of the past. The reality is, now we are all educated. Q: I am trying to use a language. K- Yes, a language is, let me explain to you. I have become very sharp in the past 3 or 4 days, because I am watching many people die and I don't understand the reasons why these world leaders allow this to happen. This afternoon I was talking to some of the leaders of the KF leading teams and I said, I need a break, because it got to the point, what we received information's. I see a lot of information's that's ?? and I looked at it, and I walked away, and I said, if I let this nonsense of the world leaders bring us to this point, there is something wrong with me, that I have not managed to strengthen my soul to be able to handle a higher level. Within 5 minutes I went back on our communication line, (3:40). and I explained that to the team I was working with, and we understood very simply, it is us, it's them (the group), because they were going through the same thing, because you don't see what we see on our communication lines. What is coming out of China, America, from other KF KS worldwide, depresses you. Are they anti-energy or is it me who has to give more, to bring them to the higher level. This is the consequence of it. This is what I say, I came to this life to understand the pitfalls of physicality. So what you call, is "Anti" and all that, it is just you, in respect to where you see yourself. Q: yes. K- and what you expect from that point, so nothing can be "Anti", the "Anti" can be the key to the success of becoming. When you know your weakness, you are strong. When

you cover your weakness, it's because you are really weak. (Q: Yes). You don't need to put it into any other way, "Christ and Antichrist", or "Moslems or Anti-Moslems," it is us. I was asked in a live interview with Iranian television last week, that, can you explain to us about your background, your path of belief? I said, when you sit in my chair, there is no path of belief, except believing in the Creator and yourself and the position you choose in respect to what you call, your creator. So with this Cup of Life, which we put out, is to give that to people. When you hold a Cup of Life, (3:42). don't look at the water of it, look at how, I explained last week in the teaching that how, because it's a dynamic situation, it's part of the KF teaching.

I'll try to annotate on this one, the Cup is here, the Cup of Life (CL) is on the screen. You have, in a way, a cycle of life here (reactor cup) (draws some Infinity Loops). And this here (cup with Gans water) is your body, which has a the soul (dot in center of cup). In so many ways, if you understood the totality, the soul which sits here (reactor Cup) has a connection with the soul here (Gans water cup), this CL is not just a water. This CL elevates the STM. That's why I said, One Cup, One Life. I told you there are a lot of secrets in this T. So if you are down, if you are low, the energy created in here (reactor), in so many ways, if you understood, and it creates a soul between different parts of it, it expands to you, to elevate your soul, at a higher strength than your soul, because it receives from it. I don't teach everything, because mankind is not ready to understand the totality, that's why I said, this is unique. You hold the CL in front of you for a few minute, don't drink from it, it already has fed your soul. I said, if you listen to the tape, in a very discreet way, I call it, a Cup of Life, because I feed the soul with it, not the physicality, but you are interested in the water. I said, in the teaching last week, look at what I drew, I told you, this has a soul. (3:44). If it has a soul and you understood it, and you have a soul, then where do you think the plasma ?? sitting here will interact? In the sky. There are a lot of secrets in this. I did not give you a CL with straight wires, I gave you a CL with a twist (coiling). The one that is a flat piece (Zn) you can still twist it. But this flat piece is a reference point for the other 2, in respect to the soul and matter state. This system is unique. You try to show the freedom of the soul and elevation of the soul, you have such a simple system that elevates your soul, it doesn't matter in what shape or form you try to cover it, because if you have understood the teaching, you already have already received the knowledge through your soul. This is the first time ever, that I have released these kinds of technologies in a hidden way. I told you I am a master of magicians, because I know how to work with the STM and the body of the man. If you look at every level of every twist, creates as I explained, different soul strength, and if you interact with the soul level at, say this strength, which is the lowest (bottom of Nano coil), at this level, as you consume it, it increases the level of the soul. (3:46). Then with each one in totality, you interact with, there is no way that a man will come away from this Cup untouched. I have taken the mans soul, a prisoner to itself, to elevate itself. I could have called it a "Cup of Soul" but nobody would have understood. Maybe now you see the truth. So you decide, what you want to do, where do you want to enter, at that level (bottom), or do you want to enter at this level (top), or is your soul already at this level (middle), it needs to elevate itself higher. When the soul is expanded, and it has reached a higher, it covers the body anyway. One of the reasons this Cup works and this water works so effectively for viruses, is because the energy given to the soul is so rapid

that the body becomes, ?? virtually it surrenders to it. I explained this in the past 48 hours in one of the teachings, Friday night in the Portuguese teaching. I am spending a lot of time in different groups with specific sections of the KF, increasing the level of the soul of the Knowledge Seekers in a very rapid way. Then you'll understand what I am talking about, we have come to the governing point, we are not there to be governed anymore. And we have gone through the STM by the man himself, no prophet, no Messiah, no all the rubbish which has been put through. (3:48). .. dog wants something, .. sorry about that, he is a KS too, he has been in it from the beginning. So if we understand it, with this Cup, not only will you elevate your physicality, but you elevate your soul, by the strength of the soul, covers and strengthens the physicality. It's the first time I have put such a knowledge out, that I have gone to strengthen the soul and not the physicality, but you are human beings, you always look at, 'what's in it for me.' Do not deviate from the way I made the Cup, if your intention is to receive what is there, and then there are additions, when in due course, which will come up, then you'll understand. Do I need you to teach me, or do I need to make a Cup and let me, take what I need, when I need, and elevate it according to what I need. Because if my soul is not ready to move one step higher, there is no way my physicality will follow. It doesn't matter what I want to do. The soul has to attain this higher state, (3:50). higher level that the physicality can convey and go with it. So do you want me to come to your international teaching, or do you want, that I give a Cup of soul, that you don't become the next prophet. Man stays independent according to his own intelligence.

Q: Yes, my question was really, regarding the salt, because one of the things I have found, that when I find through divining a salt that is already in harmony with the soul, that it works different and because I used your salt, I used the salt that was sent in the mail through the KF and then beside it, I use a salt that I divined to be in harmony with the soul, and I found completely different results. Are you saying that when I get to the level where you are there are no different results? Results in regard to the soul?

K- Have you seen God making different salts for Himself and His ?? The salt, if you understand, if you understand the true meaning of the use of the salt in the body of the man. You understand, that it is the conversion of its energy to physical condition. That's all it is. If you call it, the soul of the salt, and (it) allows you to interact with your soul in a physical dimension, then that is your dilemma, not mine. This is a very straight forward understanding. Let's go and understand in the teaching. Can I have a whiteboard please. (3:52). This I was teaching, I think in the Iranian or Brazilian teaching (313 KSW), you see, when you have the skin of the man. .. If this is your skin, the 3 layers of it, (1, 2, 3), then in each one you have a cell, and each cell has a different field strength, they're not all the same. The same is here with the next layer and on the bottom layer, whatever matter you want to do it. This is your atmospheric condition and this is the meat or flesh of the man which connects to muscle. You call this (the cells) 1, 2, 3, (next layer) 4, 5, 6, (next layer) 7, 8, 9, or whatever you want to call it. Number 1 (cell) uses precisely a different kind of the combination of the salts to be number 1. If number 1 gets wiped out, you burn your skin or whatever, (3:54). the next skin, which comes in position of number 1, will have exactly the same strength as the number 1, which was there before. No difference, that's why it can occupy the same position. Number 2, has a different salt composition,

the only difference between 1 and 2, is a small exchange difference in the salt content. And this salt content is registered in the brain as a field, not as matter. The brain is very clever if, I sends the information as a soul strength to here, and then the STP sends its information at the physical soul matter Inertia, and it makes this one (the replacement cell), and even this one is kept part of its work in the memory of the soul of the brain of the man. If you look at it, the STM and the STP share the brain in operation memory, according, keeping for physical organization of the man. So every cell and there are trillions of them making your body, and they continuously change, it's due to a slight change in salinity and a mixture of different salts, because, salt, it tells you, create Inertia. And salt, when you have salts, (3:56). you create a condition of Inertia, which gives it physicality. That's all the salts do. So if you call it, the salt of the soul, so you have found yourself a salt, a power, a MG field which can allow your soul to manifest itself in a physical dimension, which you think you can ??do, now you have given it a dimension of physicality. So there is no such a thing as called, salt of the soul. Because salt has no dimension in physicality. And if you bring it to the dimension of physicality, it becomes a physical soul, which is the body of the man with the heartbeat and the rest of it. As I said, the time for talking magic is over, understanding the truth is a different thing. Now we understand the science, and this is why nobody like you, or anybody else in the space can come and say, I can show you the salt of your soul. Come here I will show you the salt of love. The salt of love is so easy to make, because it's emotion, and if it's emotion and I can feel it physically, our heartbeat goes up, our eyes drop, and we want to give whatever the other side wants, then we have connected the physical condition, it has a salt. It has given a dimension of physicality. (3:58). With this knowledge, no man should allow no one, to take no being, to ransom for magic work. Because you have to analyze the magic, then it becomes no magic. Houdini got trapped in boxes he could never open, but he was lucky someone from outside undid the lock.

Next question.

Q: .. I listened to the last Portuguese teaching and you spoke about one of the secrets of the CL, and it was (4:00). I think the interaction between the matter fields of the Cu and the matter fields of the Zn that would create a strength of Magnetic, am I right? Yes, partially. Q: I tried to understand and do them mathematical, to understand how you achieved this field of M but I could not .. ?

K- Work on it, you did something very big. K- Let me keep some of the magic, at least, maybe in a few decades somebody will understand. But that is what it produces. I'll tell you what you missed, maybe. .. (4:02). When you understood the totality of the construction of the materials, you will understand, that this CL has a magic factor to it. If you look at the same cup, as we wanted to be known, you have to look at it 3 dimensional, which means you have to take, in so many ways, boxes of energy. You have to take conditions box by box. You have to understand what each box does, and what is the interaction between these boxes, because what I gave you is this, (4:04). and what I gave you was this. I know many of you are going to try, and you will see it. Some of you say, my Cup doesn't give what it shows. Check it, awhile. Some of you have connected this end (bottom of the N wire) to the top, so you are not going in this direction, you are going in that direction (opposite spin). Then you'll understand, how many strands are used in this (N coil), and how many strands are used in this (Cu coil) is very different, because when you took the Cu and you rolled it as a spring, you didn't loose anything.

But listen, it's very tricky when I burn it, in burning you see the strands hanging out, because the wires are burnt. So in fact, there is no way that your N coating on both are the same, and the Cu which is not N coated. It's very much like the brain, it has different emotions in the life. When I saw my teaching in the video, make sure these don't touch (the N coated and bare Cu coils), or press them together. Because you keep a separation between the soul and the physicality. There are a lot of little tricks when I make these things. (4:06). Some of you are producing fast, and some of you very slow materials, and you don't understand, and some of you producing cups. And some of you when you look at it, when you put your plate in, do not get the same effect. You have the STM (Cu), the physicality of the man (N coated), in respect to the matter state of the man (Zn). If you turn this Cup upside down what do you really have, is very simple, it's another MaGrav system. You have the earth, I have given you in a very simple way, 1 coil, another coil and this has a soul of physicality (N coil), this (Cu) has a soul of totality because it's a higher order soul, in respect, I have forced conditions, and this stays the earth (Zn plate), matter state. But when I turned sideways to you, it's magic. Isn't this the shape of the man? (4:08). his soul (head) and his STP (heart), and the earth he stands on? Because once I put in this N coated material in the middle, I dictate a new environment in this box (jar), it's not earth's gravitational field anymore. It's mine, I dictate. That's why I can produce what I like, and earth has no say in it. Now I created the earth position (Zn plate) myself, with matter state.

Any other question.

Q: .. (4:10). I live in Indonesia. I sent ?? to Carolina. .. connection with Beijing. ??? I sent a message with them some information, I was very disappointed with the government, my friend said the government was importing some vaccine from the US to overcome the virus I don't know if it is true or not. ... they said the government has so much confidence that in the next 2 weeks to 1 month that they can overcome the virus because they have certain medicines ?? My conclusion is the governments of this world will never understand the plasma world because they seem to me. (4:12).

I still think they will never understand this T.

K- The problem is not anymore that the government to understand, the problem is that you understand how to save your life when it comes to it. Q: yes. K- This is the whole structure of the KF. When working with the government, it is working with people who have their own self interest. I was talking to a foreign secretary very recently, over diner and I raised the situation with the Ghanaian president, he said, this guy, we thought Africans up to now, we saw the "Thieves of Baghdad" we could not imagine that somebody could be worse than we could ever imagine, and has become the head of Ghana. He is stealing more from his nation, than his nation can ever afford to pay for the next 20 years. And the Europeans and the Americans are watching him doing it, because they know now, that they'll bring the richest nation in Africa to slavery because of one man. And Ghana went to bankruptcy, the richest nation in less than 4 years in Africa. Sitting in different offices I have met them, and they are literally ?? scraping the nation. How come a Ghanaian child in 50 years still has to pay for the stealing by the head of his nation. These heads of nations, presidents or whatever, (4:14). look after their own private (welfare), the nation doesn't count, don't be puzzled when I meet with these people on a regular basis. I more and more realized that the world leaders are given a private bank account from the day they take position. "You can do what you like, this is

the commission for what you take," and it goes down the hierarchy, all the way through. We see it in Europe, Asia, Africa, South America, and right across the planet. The human race has to find a new way to choose, (4:15). those who lead them. Do we choose by soul or by the ballot box, which is, what we call, touched and fabricated to the way, what is planned. As we see now, it has become very clear with Trump, he tried to pressurize the Japanese Prime Minister to get a Noble prize, to be supported to get it, and he blew his cover. He tried to bribe the Ukrainian president to get arms if he needs, if he can open in the hand of his opposition. Now he is in for impeachment. We have seen other world leaders in the same shoe. We see what we call, Brexit is not a Brexit, it was something which was set up, (4:16). to deliver at any cost that Britain is out. If there is a clear indication that it was never counted the way people voted. It's very interesting. Are we going to rely on computers and ballot boxes, or are we going to allow a structure like U Council to rise, by those who can rise, can serve their nation or their group through their soul, then they deserve to be there. Would they run for financial gain? We saw originally some of the people who became U Council, they thought that by being there they could advertise and promote their companies, and when they found out they were not getting much from it, they resigned. But they come with their own sense of ideas. The ballot box to the STM, will become the next step, and not the present presidents who are there. If we open some of the school of thoughts which we see running some of the nations, you'll be shocked. And you see very clearly when they pass their time of 6 or 8 years or 10 years, they want to stay there, primarily most of them who fight to stay there, for extension, is that they have done so much crime, that when they come out they, they'll be captured by it, so they extend and extend, (4:18). that they have enough time to correct what they have done wrong. What we see with extension presidency's is corruption at the root of the presidency. It doesn't come out of strength, and then they become dictatorships. We have seen it in Africa with Mugabe, and others around the world, and this new, what we call the hypocrisy of the democratic world, has literally come to the bottom. The same presidents sits with two parties, but parties sit in his pocket. So don't expect much from your governments of your states. When the governments stand without a border and are elected through the soul, by the election of the soul, that they serve the people who call them to serve, then we have a government. The present governments are absolutely corrupt in every shape or form. I know of 80 billion Euro in one account, that one president over 8 years of presidency has stolen from his nation ... 80 billion. That is part of it, and not the whole lot, and his children are trying to get their hands on it. But he has and European nations have blocked the account. But when he was in power they did everything he wanted. (4:20). It's very interesting, if you look at the present world leaders, there aren't any, which are not there with, what I call, corrupted intentions. And most of them have passed a law ... You'll understand very soon why we have established the U Council, and none of them have a vote to block. They have a vote to elevate, a vote to support, but they have no vote, in a way, no hand in taking KF as a structure to ransom, in operating and ruling and everything else. I have become very hard, but very tough and there is a reason for it, because this is a time of transition, and it needs a strong hand, very strong hand, not to allow any games to be played, for the next 12 to 18 months it's very important, for both the KF, the people who run the U Council, and the souls which have volunteered to serve humanity beyond the borders of this planet. (4:22). As I said to a diplomat very recently, there is no school of diplomacy for the STM to survive

the life outside this planet. We cannot train diplomatic souls. The reality is, if you understand, as I said before, we could not see in the night, and now we have a night vision glasses to see in the night. When our knowledge reaches to understand the strength of our soul, beyond the stupidity of Einstein when he said the speed of light was the ultimate speed, when you see that point, then we have the vision to understand what is moving and what is the intention of the soul, what I said before, a soul detector, or visualization of it, then we see, which part of the soul is responsible for positioning it, as it says, I made man in the image of myself, so we transfer that to the physicality part of the body of the man. We should not be questioned in our variety, but in our oneness and understanding the totality, and we all want to learn more. .. R- we missed the last sentence there. It means God didn't want you to understand. (4:24). As usual when He cuts it out, it means man is not ready for it.

Any other question?

We put that trust in world leaders in leading through the man to the point of .. peace and prosperity has diminished. It means the man has to do that with his own soul. The way you become the leader of your own physicality if you understand .. a question to the KF family today. A lot of people didn't understand it, and one or two answered it. Many of you should have asked yourself that question without reading it. The question was very simple, and the explanation was simple, and KS are so entangled in the dimension of the physicality of their own lives, that they'll never find time to elevate their own souls, in the easy way to go. I didn't put it to one section of the KF, I put it to the KF worldwide family, (4:26). to see if those who have elevated their own souls, to understand it, will come to share their elevation by their soul to the others and not by talking. It's very interesting what came up, and just a couple of people could answer it, or decided they might want to answer it. I'll read it to you if you haven't been or are not part of the KF one world family. I started in a very simple way. This is part of the structure I am trying to bring you. To start thinking, and to start to understand. I put it in about 1 AM this morning, this shows I have no sleep.

*"One question for all of Keshe family," that's how it started. "What would be the first thing you would say to your soul, when you realize that you have managed to be able to communicate with it. In man's dimension of understanding of his existence. " (somebody said, I would say hello, it was very nice.) "Would you expect to hear its voice, or to expect to feel its emotion, and convert it back to man's physical understanding of its meaning, (4:28). through your physical emotion or its emotion, that no language is needed. Then you ask yourself, is this not the way I used to talk to my soul when I was in the womb of my mother. That's a seed for thought because if you can mature enough, then, now knowing this, what would change in your life, that you can accommodate both your soul and the soul of your physicality to live in harmony in their own, both dimensions. If and when you manage to do this, then you have entered the dimension of universal communication with your own soul and the soul of all those who live across the U."*

I saw a lot of translations, if you have been on the Keshe One World Family. It gets translated into about 6 or 7 languages. I put in there, in the world of universal language there are no "Yandex" translators as we have here in this Chat. It means the universal language is understood by all souls. When it comes to the point of maturity we

understand, as part of it, what we are made of. (4:30). We have to understand, to what level do we understand, the true understanding of the existence in the dimension of the U? Maybe mankind, one day, will understand the truth about himself. Did we create the soul, or did we come with the soul? And we choose to ignore it, because it was easy to live for us. Try to understand, what is going on, and I start teaching more and more in a few dimensions, that as you elevate in knowledge, you can see the other dimensions, you can see the truth about your own existence. All these teachings are not for you to watch the others. All my teachings are in elevating your (own) soul to understand its workings. If I wouldn't have shown you how to make Gans's, so that you could see how it creates energy, and then you have the hollow center (in the ball), how could I have explained a soul? (4:32). Caroline said a couple of days ago, do you know what they are doing in the KFSSI, they are talking about a hollow earth, how is it possible? I said, this is the truth, it is there. She said, but the Gans .. I said, no, this is what it is. The earth is hollow, but read the first book, and even read the forth book, the "Creation of the Solar System," where I say, there is plasma which is hollow, and there could be some N materials, and some matter states, because if you don't accept and understand this, we are back in the position of Stephen Hawkins, ignorance due to lack of knowledge of understanding of the totality work of the U. The teachings will become more and more in the dimension of the structure of the soul, and if before, you needed a dynamic (reactor) to understand, and to see the hollow (center), for the first time in a CL, I'll show you a soul without the dimension of rotation. The one in the ball which rotates, is in the dimension of the work of the universal objects. The one in the Cup is the physical structure of the man, which has no rotation, except the rotation of the fields, we call it blood. That's why it is called the CL, it's not that it gives you life. It is a life. A cup, which within it, is life. (4:34). And the humans say, I use this cup and I save my life. I gave you in the true essence, in the true essence, I gave you your twin soul, at least in a dimension that you could bring it, that it could elevate you. It's the first time I put a system out that elevates the STM in conjunction with the STP. I told you, that you have not even understood what I have given you. What is interesting, a lot of you are making complaints about, you something, there is something wrong, I don't create enough AA on the top. Why you are not producing enough AA on the top? Have you asked yourself why? Because this AA itself, through the creation of the soul of the system, is using (itself), it's like a leaf, how many times I explain, on the leaf of a tree, the AA is sitting ?? in there and it's feeding it, it's not that it is just there, because it is created to absorb the energy for its feeding. This you don't see AA, it's because the soul of the creator is being elevated, you are feeding the energy of the AA to elevate the soul. That's why you don't see it. Those who see a lot of fat ?? (4:36). it's a .. (.. break ..) I gave you a twin soul to elevate your soul, but this doesn't get energy from nowhere, it needs the universal energy, which comes in the form of the fat. This fat on the top (of the Cup) is the (same as the ) fat as on the leaf, which is absorbed by the interaction of the fields. The ?? plans according to its N material, it takes what it absorbs its energy as a protein, as the AA. Isn't this the same situation, but he has a passage here, to come in. You are so short sighted, you don't even understand how I am elevating your soul without you understanding it. It (the lack of AA on top) shows how much you need.

When you go to the very first reactors I built, in which the Belgium's opened up and saw the magnet. This is how it was designed, the STM, and the physicality of the man, and all the parts of the man, that what is needed to repair or elevate, was done in conjunction with the two souls in the point of physicality. (4:38). One day when these Cups are opened and understood, you'll understand the urgency and the thought which caused me to do, saving one life. I left it to the soul to accept. If your soul is not accepting, if the STP is not accepting, then you'll see very strange behavior on the top. The energy for the soul doesn't fall from the sky, you have to bring it in, to be able to transfer it. It is a Cup of Life, because it gives you life, you don't need to drink it, I already made the transformation for it. I made a toy, you just need to play.

Any other questions?

Q: Can people use a plastic container, instead of a glass cup? R- I was suggesting that they stay with the glass cup because that was suggested as part of this particular..? K- You see, when you use a plastic container you bring a dimension of weakness, and that weakness will reflect in the STM, (4:40). and the physicality of the man. R- Weakness in terms of the C or the CH? K- yes, C and H bond of the plastic. You fix it, and you fix to the dimension of the physicality of the man in the matter state. It's very important, that's why, when we negotiated with the Chinese officials, I always told them I wanted the "Jen Zang ?? which is the center of the China ceramic world, which was the beginning of the silk road. The big factory which has been set up in China, " Jen Zang" , is where the first potteries came in the world, the first chinaware's came from. I have taken the knowledge to the origin of the base, the village of the Silk Road, because the ceramics are very much the condition of the structure of the U in the dimension of the, what we call the diamond structure of the matter state, we call ceramic. Mankind has not even understood the work of the ceramics. When we make flight systems using ceramics, you will truly progress ??.. . (4:42). (you are breaking up ..) .. Because I go quiet. ... .. the Zoom bandwidth cuts into ... Jalal- God didn't want you to hear that. K- Exactly, ... (4:44). can we close the Zoom. .. 44 .. It means God doesn't want you to understand visually what is happening. Any other question?

Q: When you hold the One Cup for one minute or more, you see water dropping from your hands, and it's a lot of water? K- Is it because you are shaking, that you might meet your soul? ... the palms are sweating. .. maybe there is a hole or something. K- No, if you go back to some of the teaching, I always said, maybe, (4:46). you can understand something different, I said in many teachings before, that what you wish through your soul you can create in the palm of your hands. If you wish gold you can create gold. Is water something which you are worried about, or something you see as a water of life, and you convert that into essence, and then you will see it as water, because you are holding a cup and you expect life, and man connects life with water. Is this the first time you have managed to do that? Q: actually yes in this position. K- So it goes back to what I said years ago, hold your hand out and wish for gold and gold shall appear in your hand. Now maybe you are the first one to reach that point. Q: I always wished to create a beautiful life, so maybe this is, water of life.

We are running very late now, nearly 5 hours, I think we need a break. The management of the KF put a maximum of 4 hours limit on teachings, but this is a public teaching it has no limit. The imprint of soul is very easy, now that you understand. (4:48). As I said in the teaching on Friday, this should be called the "Cup of Soul," and now you understand

why. Let's see what changes come in the next 48 hours, and how our world leaders have planned to join humanity to another lower level or higher level. It's very interesting, how and where the humanity will go from here on.

Q: the differences in the atomic weight in the material .. (4:50). how can we predict the results by calculating the difference between them. ... I was watching the 21st KSW if we create a field of 18 we can make our reactors drop waters. I would like to understand more because I have been watching a lot of teachings ... I still can't understand very well how can we use the atomic weight differences to predict what we are creating? ...

K- It's a rule of thumb it's between 10 to 20% difference in atomic weight when you look at the plasmatic conditions, strength. It depends, if the element is interconnected with the others, or is individually as a single element itself. It's a rule of thumb, there is no mathematical solution or answer for it.

The Iranian KS are working on visualization of the PI and (4:52). measurement of it. Maybe in the next few weeks we'll have the system available, then you can see, literally, the future versions of it, is that we'll see which line of M field in the pole or pole of the core, or a reactor, or magnet, at the strength of which planet, of plant, or which soul. There is a lot of knowledge to come, for man to learn and we are breathing new life into the ... We have to understand, with what I see, mainly that's been the reason we never opened the knowledge, that I am doing to the Iranian KS and scientists, and now we have. You'll see an evolution and revolution in the world of KF technological development. Because the Iranian scientists are bringing totally new scientific dimension, in a very rapid way into the KF. (4:54). They are joining the management development, and systems control of the KF in very level, in the background. We are recruiting more and more of them because they are bringing totally new understanding, in how they understand and work and it's just a hidden gem which we have opened the Pandora's Box of. We'll see many KS will learn and will go, and as you have seen many of the are participating in the KF family. The Internet and the new levels of understanding of PI T, the essence of many aspects of T will rise quite rapidly in the next few weeks and months. Because you will, we need that change of course and that comes through the addition of knowledge, and I am sure once we open that Pandora's Box, other P Boxes on different levels and a different understanding will open up. The KF KS are locked into Gans's and plasmas, but the Iranian scientists are bring a new dimension into the total structure of the understanding and application of the T in how they see it and want to add to it, and how it is going to be done. (4:56). I am sure that very many of us will elevate by this new knowledge and cycle which has come across the KF. The whole structure of working with new understandings comes with new systems, so a lot of you will start thinking in new ways and bring new knowledge and add new things to it. Then interestingly, then how much you as KS will elevate and go forward with it. I have seen a lot of new ways and new thinking and I have seen, what I call, the old leg of the KF is still struggling to keep their foot in, "because the way we did it, that is the way it has to be". As I said, to the head of KF and to what I call, the old leg of the KF is, 'we have to bring space for the new to come in,' and new is between 18 & 20 & 10 to the age of 50 and 60. We need to allow the new, the younger generation to come in very fast to bring us, what I call, the old guard back to our strength to understand more. We'll see in the next few weeks a new cycle of, (4:58). generation, we'll see a massive, new faces across

the KF. And it is growing rapidly around the world, but a new structure has to come on to the KF to spread the knowledge and T in millions, we'll see it in the coming days and weeks. Now we ?? put the whole thing back into its origin, to elevate as many people as possible to know about the knowledge. This has been made available by the new team from Tehran, which we brought in, and that is their job, to spread the KF across this planet through what we call, mass media. They have the expertise, and we shall use it, and this is in the hands of the KF top management to bring this in. We'll see many new faces, new knowledge and intellect coming in, and a lot of emotion, and a lot of soul, with not much attachment to physicality. We have entered to a new generation, and we'll bring that new generation, new school of thoughts, by the new ways. I think, as I said, if we are not prepared to put man ahead of ourselves, we have failed to serve our purpose. It doesn't matter where we stand, we have to allow the new generation, new thoughts, and new elevations to come in, (5:00). that they open our eyes to the new dimension of the U Community. It's very much like when you get old and you drive very expensive cars, the most power under the bonnet, but you can't go more than 100, because you used to go 200 KMH, but it wasn't enough, it's blocking the road, you have the best car, but you don't have the best, audacity, and you see the little boy in a little Mini sitting and pressing. He can't pass you, but he still wants to take a chance to show you, that you don't know what you are doing. And I think we have to give that to the KF team, to step down, to allow the new to pass. And they can be proud of what they achieved, as we were there, who laid the roads, that we can ride on. I see a lot of opposition and resistance from the "old guard", that it has to be ?? this way. It means that it is time to step down and allow the youngsters with their 4 wheelers with a ?? on it, to go, because they bring the new cycle of life with them. That has to be the same, I told the head of the KF recently, I said, the time you get about 40 to 45 years old, step down, because then you become a block for the KF to move fast. Find someone who was young like you were, that can take you that way. When we appointed Ella as that head of KF some 2 - 3 years ago, the old guard of the KF, and still some of them, have a big problem handling a woman, (5:02). but she is a gorgeous woman, young ?? and at a young age and she knows she is taking the KF through, but excepting that, there is a big challenge for those who think, it has to stay like before. And it has to be with all of us and the next generation, knowing that if our existence stops the progress of man, then is the time to step down. It's the maturity of the man and not his weakness. It has to be that way. We are there to be, but not to have, and it's ours and it's got to be. That itself needs a lot of understanding of the level of the STM, detachment. ...

I am running out of fuel.

Thank you very much for today.

C- Thank you and we are present in your wish Mr. Keshe. (5:04). K- I am present in my own wish don't worry about yours, I hope it will come true. C- We actually are participating in your wish, very nice directing, it's very nice to hop onto your wish, because then we can follow through the teachings, where your wish is going to lead us.

...

(5:08).

(This is part of a Coronavirus series started on 312, 313, 314 KSW; 102 One Nation; Portuguese Public Teachings 2020 01 31, and 2020 02 07; )
