

Summary of the 314th Knowledge Seekers Workshop

February 6, 2020

Note: Summary has not been checked by KF. Please listen to original recording and read English Transcription. (Summary by KF Brazil)

Summary:

The next stage in our understanding is how zero-time communication and transportation happens in creation and in plasma (PI) technology (T), Everybody is afraid of this virus but what if it opens us up to deep space, Mankind has been in a closed jam jar and now that jar is being opened up to both the freedom and dangers of space, therefore he needs to understand the totality of the process of how plasmas transfer energies and communicates between one another be it information, communication, transportation, viruses, or be it anything else, When we understand that this process is the same throughout creation then we'll be able to handle any situation that arises, viruses or anything, By accepting the ignorance of Einstein it has made it more difficult for the true science to be understood.

When anything or any plasma move, then all the other plasmas in the Unicosse have to adjust themselves to that movement. This is done instantaneously and simultaneously. In this simple fact, he explains how we are already using zero-time communication, transportation and transmutation by our own existence in positioning ourselves amongst the other field forces of our own existence without our knowing it. He uses the example of how when the earth moves slightly, then instantaneously, all the other field forces such as moons, planets, suns, galaxies also move to accommodate that movement.

The Sun Vibrates to keep Balance like the Emotions:

Furthermore, the sun is vibrating continuously to accommodate these changes in field forces, like a gymnast balancing on a tight rope, the sun is not stationary but has a vibration bandwidth in millions of kilometers. He compares the sun's "dancing on the rope" to us, and what keeps us in balance is our emotions. 'Emotions are built into the body of the man to be able to keep it in balance without falling off the rope, when you feel happy you go a little this way, when sad a little that way, but you still stay alive and on the rope. If you fall off the rope you call it a dead body. Death is the collection of the balance of the emotions of the man in transferring the energy of the Soul of the Physicality (STP) to the Soul of the Man (STM). Then we understand why infants at the point of birth, die, and why some of us live hundreds of years and still survive and live.'

Balance through Emotions:

The universe is nothing but a bunch of acrobats, and their balancing comes through the emotions. It comes through the understanding of how I want to live and how I interact instantaneously and in that position, so too are the fields of the body and the STM in respect to the souls of every other thing, and in respect to the soul of the planet, the universe and the rest of it. He draws a series of circles next to each other in a line and says we are a bunch of acrobats on a bigger size scale of the field strength, starting from man, going to the planet, stars, galaxy, universe and to the Creator. Even He has to play acrobat to keep you in your position. If you understand this, we are already in possession of zero-time communication and transportation with every other structure in the process of the creation, even to the Creator. Then it is up to the man if he wants to use these fields by first finding out which field comes from the STM and connects to the thing he is interested in. We even have a direct access to the soul of our Creator, but first we have to find the fields of it, and the strength of it. Then, without any systems or machines, we'll be able to create the conditions to transport our emotion, our energy, or to communicate anywhere across the world of creation. This brings us to another point of understanding, and that is, that we have understood none of it.

One Cell is Controller for Entity:

Many people who could understand the science have been eliminated by those who want to control man through science, but in the end, it is us who allows these incompetent people to dictate and condition our understanding of the world of the creation. There is no difference between the totality of the work of a magnet and that of the STM. One is the dimension of M fields in the matter state and the other is in the PI condition of Inertia. He shows how the work of a magnet, the STM, and the brain are the same. This is very important that for every creature and everything that exists in the universe there is 1 Cell

that is responsible for its totality, and how this Cell responds to another soul, will cause all the other cells in its unit to adopt and adjust itself, (even to the feeding of the Creator), {there was a break in connection ... ?? pain and the Creator}, "In that respect, to adjust to that pain, mankind has been gifted, a new message, and when the man understands this, the humanity, the soul of humanity will move, by moving one of these cells to a new position will bring comfort and the opening of that jam jar. (Question: are the Messengers trying to move that 1 Cell to move all the others?).

From now until the Tehran conference and the coming of the totality of the knowledge to mankind, he has 2 choices, war or understanding the new knowledge of the plasma of the creation of the Creator. In building the new flight systems those nations on the path of peace will achieve flight because the soul of the plasma of the system understands their true purpose, while at the same time has access to the hidden agendas of others. Fear is the weakness and reduction in strength of comprehension and we see this in the human race especially in past few days. The development of the plasma technology will not allow those who put their own self interests above the totality. Man speaks different through the words of his mouth then the action of his soul. Man will not take into space nor enter into the Universal Community until the totality of the souls of all beings on this planet agree on peace and collectively working together. Man collectively put all his energy to create a nuclear bomb to kill others, now he can do the same with the dividend of the peace and can achieve this in no time. You started with the Gans's and the balls and progressed to the point where now, but you have to understand which Gans and which field takes you where, and the operation and strength of each Gans in the environment which it works. This understanding allows you to reach to the Creator, or the sun, or create energy, or zero-time understanding of another soul in the dimension of physicality. (Instantaneous education of the full knowledge of the universe in the position and the direction which the man needs),.

Incompetence of Chinese Leadership:

In trying to control a simple virus the Chinese leadership has become a shambles, with incompetence in management showing itself across the nation. If the leadership would have understood what we have been telling them, they would have prevented this mayhem instantaneously, but man is in the grip of pride and possession, and until he discovers that he will continue that way,

Bill Gates' Agenda:

Mr. Gates has put a hundred million dollars to support the virus in China, where he earns billions on spreading the same virus. By being aware of the STM we cannot be lied to anymore. If you understand how to lock into the soul and the line of emotion, people like Gates, will not exist in the stage and the development of what they have created for physicality. Maybe the man has a hidden agenda, but not his soul.

How the Universal Council (UC) Governs:

The English spoken language member of the UC is responsible for Trump who is English speaking. If you have not reached him, it means you have not understood. Other people can reach him by strengthening the soul of that UC member, because as the points of the

universe you are all connected. This is how you'll change the world leaders in the future, not by elections, but by clarity and understanding of the totality of the collective consciousness, because you are all part of the same brain structure which has to work through one. Collectively it creates a bigger mass of the fields which then has the power to remove. If I wished the removal of president Trump it will be done by tonight, but we have to have him where we want him and the way we want him to achieve world peace. In this way we worked through the outside connection, but we'll leave the man himself, to learn how to work through the inside connection. This is an example of the acrobat balancing on the rope, you are like the earth when it moves a little, it causes the sun to move, for you to be able to keep your position. In the same way we made a move from the outside, causing him (Trump) to vibrate into the position we want him to be in.

The teaching of the KF is a collective teaching and it brings everything together in all directions, step by step, then you understand that life is simple and it is the man who has not understood the totality by not questioning himself. The missing link is mankind, his own understanding of his own creation in all dimensions. It is up to you where you would like to be, in line with your Creator, or the UC, or with your family. Then it comes to something very important, what is your role, the role of your soul in the structure of the creation. Do you need to cling on to the intermediaries of prophets, mullahs, priests and the rest, or have you matured enough to find the line of distinction and the path of knowledge? We saw another magician jump up (man from Breathairn Institute) in Tuesday's teaching (103 One Nation OP), would we call him a new prophet, or has his prophecy become profitable overnight. I promise you that what he learned in that teaching will become part of his teaching, because now he thinks he has learned a little bit more, and he can create more magic with it,

Some Questions:

It was asked if we have to take the "jam jar" top off ourselves, or will it be taken off automatically? He said, do you still need to have a magician? Another question was if I understand the plasma technology then I should be able to do the zero time communication, transportation, and all that right now, yes? He replied, this is still in the dimension of physicality and you want to see it to believe it, but shut your physicality down and see what your soul is up to. You are already doing it.

Q: Is everybody going to open up at the same time or are we all going to be on different pages or strengths? K- it's the freedom of the choice of the fields, you choose according to what interests you and what is beneficial to your soul. If there wasn't such a choice, there wouldn't be any differentiation, it would have been only one Creator on his own.

Q: In this process how can people who understand help others? K- Each person has to reach that point by his own soul. As it says in the writings, 'independent investigation of the truth', otherwise, because your father was a Moslem you become a Moslem, and it continues on this way. If you are not allowed to do your own investigation and to find your own understanding step by step, then what, does a man stay Moslem for the rest of the life of this planet and the universe?

Religious leadership resisting:

He elaborates further, we put this idea to the world religious leaders, but according to them, nothing can change, because if it changes then they have no power. But if they accept that the time for the maturity of the man has come, then there will be no religious leaders. At the same time, most of the people who are in these positions of power, which controls the STM, have gotten their hands into so much criminality and wrong doing, that by them stepping down, they'll be digging their own grave. It's not out of the fear that the man won't succeed, that they deny the new change, but it is to save their own neck from what can happen to them. The biggest fear of the Vatican, now that they are saying that the Christ will never come back, is, because 'we have done so much bad, that Christ help us, what are we going to do, if he does come back.' Or would the mankind forgive and at least start a new cycle.

Belgium Monarchy in Turmoil:

A lot of things are happening because we have raised the level in a different direction. He goes into detail about the changes taking place in Belgium within the monarchy. The king lied to his nation for so long that when the truth finally came out about his illegitimate daughter, the queen had a heart attack. The Belgium monarchy is in mayhem and turmoil beyond belief, and now the queen wants to kick the king out. This is the reality for a lot of these people, they'll bring their own demise, then the world leadership will come to that of the STM alone with no one to dictate to it.

The True man:

When you are suffering and still you will help those who have created your suffering, this is a true man, what I call, being to exist. We have seen none in the world leadership, except one, and one day I'll tell you which nation, who, where and why. (he explains this with drawings of fields forces) ... Don't look to the others for answers, look inside yourself through your soul.

If you understood today's teachings, then in every single page, I have shown you zero-time communication, transportation, conversion, transmutation. This is a page of the knowledge of the universe, for the first time opened to the man for him to look. The question mark that I have drawn, is for the man himself, then you'll see the picture is complete.

What Man has Done on this Planet:

We have not understood the work of our own soul, nor the work of the soul of this planet, nor the soul of the universe, and the rest of it. If we had, then we might understand the work of the soul of the Creator. We have damaged the soul of our own creator, which is the planet, and yet, we expect to move up. We have caused suffering to the soul of the children of this planet, which are other men and creatures, and we still expect to go up. When is the "jam jar" going to open? Has the man made the jam without infestation and bacteria, that when he opens it, it doesn't contaminate the rest of the Universal Community? We want more and more, but we don't even understand what we have less of. The greed of the man doesn't only go with his physicality, he tries to get it into the dimension of his soul, but it doesn't work that way. At the same time you have to look inside, what have you done, what has brought you to this point. As I just said, the queen

had a heart attack, but did she tell the king that when he was busy playing out, that she was playing out too, then we'll see if the king will also have a heart attack. The biggest heart attack will come when the second and third hidden children come on the plate in the Keshe court cases, now before the European court of Justice. These people are part of those, who have touched the KF. I knew through my soul that all the connections had to be made, and that I had to take the time, to get everything correct for the right time, place, and position. The queen has another child by another man called the king of Persia. The king as a civilian has already given the DNA, and any document in a civilian court is a public document. We can test these very easily now in the court. This man has played with the KF, and now you can see the end of the kingship. Now you understand what was hidden. It doesn't matter if they eliminate him, his documents and saliva, and blood tests are in the public court, and we can all upon them. Now you can see the end of kingship. Now you understand why the Belgium's oppose the Iranians, because the king wants his brother at the throne in Iran. Now you understand why the KF ever came to be in Belgium in the first place. The plan has been to get rid of kingship in all dimensions. Man's king has to be his own soul and his correct conduct, and not be king by murder, rape, and abuse. This goes for other world leaders as well. The Tehran conference is not just a peace conference, it's the end of kingship, and the end of one man's priority over another in soul and in power of physicality.

All Prophets are of the Same Soul:

He brings back the previous drawings of the souls creating balance. We have already made all the matter states, and the human souls are ready for the time. Each one has a connection to every single soul on this planet and the sufferings man has created in the universe. Now you understand more. We took the man of the earth into space before, and we saw him carrying on with the same criminalities in the distance, so we came to cleanup the mess from the source. Six thousand years is nothing, but for man it's a life history. Putting the same soul in the name of Christ, Mohammad, and Moses and the rest, is the game man likes to play and be happy with, but in essence it is the same soul. He said, quite simply, I'll see you in 622 years, and again in 1,200 years in another name. Because he is the Father, that soul could dictate where he is going to be. In the essence of the True Messenger, that soul can decide where it is going to be. If he decides to appear in the dress of a clown in one, or in a business suit in another, that is his problem, not yours. He has appointed the time and the place, and now it is the time and the place to bypass all the mistakes of the past, because he has decided and no one else. Seeing him as a fire, or lights or whatever, is his decision, how he entertains at the time of the Presence.

Coronavirus in China:

For those of you who are following the situation in China and the spread of the virus, the KF has developed the machinery to disinfect en mass, which means there should be no worries for anyone. The machine has already been made and will be released to the Chinese government sometime today. However, if the incompetence in the Chinese leadership carries on the way it has been, and with so many people suffering, the technology will go through the Iranian government to all the nations around the world in conjunction with our manufacturing base in Austria.

This is a selected virus for the Chinese blood only, and it was sponsored and developed by the Rothschild's family and the others, and they used MIT to assess its potential damage. We have the only system which can overcome the genetic modifications caused by this virus. This is a tailor made virus sponsored by the Rothschild's, Rockefeller, and Gates Foundation. They developed it without knowing that the KF had also developed a technology that can overcome viruses.

If you or your nation gets hit by this, advise your people to speak to the KF or directly with the Iranian officials, which will operate through the KF contacts and operations. Those who boycotted and caused suffering to the nation of Iran, will beg for the life of their own nations to not be boycotted, as they have done. It doesn't matter how much suffering was brought by other nations in the past years, the Iranian government will still open the door of knowledge and share the technology to overcome this virus. At the moment we cannot help China, because the Chinese leadership is in turmoil from those who are going to lead it into more disasters. They have to sort that out themselves. The incompetence has led to more suffering, and that is their problem. In the next year, maybe sooner, the virus will move out of China into Russia, Arab nations, and elsewhere.

We have seen that the American virus injection, actually gives life to the patients for 3 to 7 days and then the patients usually die with suffocation from 20% of oxygen in their blood. After receiving the injection the fever goes down and the doctors release them to go home. But when they die in their home after 3 to 7 days, the government doesn't include them in their statistics as part of the Coronavirus. The count today, is only of those who die in the hospital and not those who said they have been given an injection and then die at home, due to lung failure and lack of oxygen. So at the moment in China, the total death toll passes millions.

It's a Trojan gift given by the American administration, or what we call, Rothschild's, Bill Gates organizations and the rest of it. If you look at it, they say, we gave a hundred million to the Chinese for the virus, but that hundred million goes to buy the American injections, which were designed to kill more, and that way they can make more. The game is so dirty.

How the Vaccine Kills:

You see, with this injection that they give for the fever, it sorts out the fever, but this disease sits in the lungs, so the lungs collapse and they die at home. It's very much the trick they played with chemotherapy. The chemotherapy is successful, but they don't tell you, that it kills you 5 years down the line with a small infection. It's effective killing. Yes, these injections have paracetamol in them and a bunch of other things mixed up together. We have requested the following from the World Health Authority, which is run by a Rockefeller organization as their private game. We want to know the amount of Mercury in this new vaccine. We want to know the amount of Cu and of Zn. We want to know the combination of Phosphorus used to effect genetic deformation. It is the responsibility of MIT to give us of this information, because they are the ones who tailor designed this virus. There is also a certain amount of lead, and mixture of Aluminum used in this vaccine. We have asked the Chinese government, and we ask now, any

organization in the world who can get hold of one of these vaccines, please give us the Raman Spectroscopy of it. This will give us indication on how they have tailor made it to kill. Don't forget that Mercury was used in the 3 M (3 in 1) vaccinations for children, that caused so many problems for parents like autism. Now they have loaded up the vaccine and this is how this virus is killing, and it is so bad. Because the Cu is connecting it to the muscle tissue, the Zn to the lungs. You'll see when the analysis comes out for the virus and the energy levels, that we are 100% correct. It creates rapid genetic defects in the lungs, and that causes the death. I know how they made the virus and I know how they are using the antidote to kill more. As I said in the teaching last night, MIT has to be closed. It has become the center for planning mass murders through biochemical and bioplasma technology by way of using viruses. I raised the red flag on MIT years ago and it stands much stronger today with this virus. Because 3 years ago, it was MIT that did the study on how many people will die by using this virus. According to their open study, they forecasted that 60 million, and in uncontrollable studies, 600 million will die!

But we have the technology for overcoming this virus, and we taught you the Cup of Life, now we have developed mass production systems to cleanup the environment, hospitals, and ports. All you literally need to do, is to breath in as you are walking through a tunnel.

Iranian Nation Helping those who Boycotted Them:

The only masks, more or less, which can, at least stop the size of the virus from crossing through the masks, are made by Iranian scientists. They're called Nano masks, and there are about 14 or 15 machines like these across the world. It's developed by the Iranians, the Germans did the original ones, but now the mass production for this size is done by the Iranians. In the news the Chinese Prime Minister has called Iran and to thank them for their support with the virus, but mainly to make sure that the Nano layer masks are shipped to directly China, because they can't meet the demand. At the same time, this same nation that is now asking for support, has put a ban on everything from Iran sold in China and outside. I said, knowledge against peace, I wonder when the Iranians will become wise to it. No one, except the Iranian nation, would help their own enemies. It's a shame to be a Chinese at that level of administration. Now you understand, the Iranian culture stands by its word, "talk good, do good, and think good," irrespective of what happens outside, because time will change.

Questions:

It was asked, how do we access the STM, is it enough to wish for it? He told a story about Caroline with a veterinarian, who raises her hands in front of the horses and says, 'I wish to help you and that you will heal', and they change. She was able to strengthen the soul of the animal through her own soul.

We can reach any soul, because in us, we have a link by dimension, to all the souls of created things. How many times have you walked into a position and said, 'my god why am I here?' and then you see the result. It was the soul that organized for you to be there, so that you could see or experience that thing. Then you think, 'I have done it', no,

partially, as I said, your soul, guides you and your physicality rides you. And "you," is something in-between existence and nonexistence.

The Real Function of Neutrons Nonexistence:

He draws a circle to represent the structure of a nucleus and says, 'this is the field barrier, not a physicality, we don't have a physical position in a nucleus.' He draws many protons inside the circle and an equal number of electrons outside it. 'That which accommodates and holds these two together, and what the world of science has never understood, are what we call neutrons.' It's the neutrons, with their nonexistence, that creates the condition for the protons and electrons to stay connected. Collectively without the neutrons connecting to the protons and electrons, everything would fall apart, each proton would pull its own electron apart. The neutrons are there to bring the balance, even though they look as, "nonexistence."

This is the same with those around us that we don't see, our neighbors, the man down the street, the cleaner and the bus driver. It's the presence of these souls, that creates the balance in the soul of humanity. And this, mankind has not understood. Why do we need billions of more souls? It's because in the future, these neutrons will become the new cells. At the same time, at this very moment they are holding the gel of the atomic nuclear structure together. Every creature on this planet exists for a purpose. Maybe it doesn't look that way in the dimension of physicality, but in reality, in the dimension of soul, those creatures are like the neutrons, they are the glue to keep everything together. We need to have many glues to create a condition, to create a leader to vote for. Or for example, to create Christianity, Islam, and the rest, you need to have those who believe, they are the neutrons, the glue to keep it together. To create a condition, you need many glues to hold it together. Then you understand why we are created, why we are here, and why we suffer. It's not the physical existence, it's the existence of that glue of the soul. Even the glue of the ants, count in the totality if the soul of the planet. When mankind understands this, then he will have matured to the truth about the world of the creation and of his own meager position, let alone that of the soul. Then you'll see that the soul of this planet has the same meager "glue" in the creation of the galaxies, universes and the rest. If you look at a neutron, at that point, it is just a neutron, but when the energy of the proton gets used up and consumed, then its electron moves to another dimension to become another neutron, then the original neutron now becomes the queen. Then you understand the purpose and why that soul was put there. Then you understand why the history and life of mankind has been set. Man is ignorant to the truth of his own creation and that is the biggest problem. His being correct in conduct counts, and even more is, being correct at time of need, because that is when the elevation of the soul comes.

In today's teaching, I have shown you the secret of creation in the line of man's physical need. Man has to understand that existence in physicality is a burden rather than a pleasure. It is for him to understand the separation of the two and that he can choose the time, space, and the place, to convert and go through the transition, if he wishes to do so. But since mankind has the same dimension, he should be able to return back into dimension of physicality, when he feels like it, but, in so many ways, it is done for fun and not by obligation.

More Questions:

Q: When the spheres of M and G fields cross each other they create a vortex, which become the sounds and images we see in our dreams, or the sound we hear in our head. We don't actually hear anything in our ear, but we go into that vibration, we go more inside, but how about when the energy of the soul comes out to the boundary, do we hear these vibrations or more often voices?

K- The soul is always out, it's just at a weaker strength and we call it the aura. Or it's just how much we reduce the dilution of the field strength of the cells of the brain. We have shown this a few times in the history of man, but those who have been witness to it could not understand it. "In the time and the place, we say the position of the STM literally sits in your head, when you eat." In the mythical way, the Chinese call it, "Fire Dragon", in which the fire comes out of the mouth. This can be done by souls who have matured beyond the physicality and who speak through the "soul of correctness." Historically, in the Chinese language, dragon carries good with it. There are still souls who can reach this point of, "the light of the soul". It's a condition when the brain creates too much filter and they show the light through the mouth, what we call the fire. This is the same fire that Moses saw, but the Chinese have changed it into their own language, which is a dragon. If you are enlightened enough, you can see it in the physical dimension, in the world of the man, the beauty of it is that fire, but it comes from the STM.

In Chinese theology they transferred it to the fire of the dragon, but it is the fire of knowledge, the fire of existence, the knowledge of the STM, and not fire in the physical sense. In essence, it's the interaction of the STM with the dimension of the physicality. From the mythology you could have put it in a candle, a dog, or even in a stone. When I listened to Chinese try to explain it, it was clear they didn't understand it, because in the present time and culture all that has disappeared. In the original mythology the fire symbol was used to give knowledge. As I said earlier about the Father manifesting at different times, it is the same father but it is he who decides where to be, how to manifest himself and in what clothes, but the essence is the same. You can extend this idea to the soul, it is already of a weaker strength when it goes beyond the boundary of the physicality. It's like when you have central heating in your apartment building, you put a blanket over the radiator so it radiates less heat and keep more in. But if you take one of the blankets away, it gives off more heat, but the heat inside is still the same, you just hold it. The brain is like that blanket and it is controlled through the blood circulation.

"The Cup of Life is that copy, if you look at the 4 fields in the Cup, you'll see the same circulation as the flow in the body with the blood."

Q: How about the hissing sound I developed? K- It just depends on how close you get to the dimension of the soul that the physicality moves within the inner ear. You're expanding it beyond the physicality. Now, many people are hearing this noise. You are taking the blanket from inside, not from outside.

Q: It's more noticeable around 3 AM. K- Yeah, around 3 or 4 o'clock in the morning is when the position of physicality changes from the left side to the right. It's a transition time and you become more vulnerable to it. It's the time when we dream, or we

remember our dreams, it's a very fixed pattern in dreaming, for man, the condition depends on position of physical dimension and dimension of the soul and circulation of the blood.

Sleep and repair Cycle of the Body:

He describes in detail what happens during sleep when the body also repairs. When you sleep the whole body doesn't go to sleep, instead half of the body starts repairing itself. The repair cycle is between 4 to 5 hours, from one half of the body to the other. He draws 2 halves of the brain and 2 halves of the body and how they coordinate the repairs during sleep. The switch over time is around 3 AM. The side which is used less during the day by habit, goes into repair during the second phase. When you go through the switch over, is when the STM more open and you may hear the noise in your "ear".

Iranian Advancement in Plasma Technology:

A video was shown on the Persian Chats of pulses of plasma visibly flowing through the clouds. Iran has started showing the power of the technology in a very rapid way. They stopped being ashamed of what they own, and start being proud of how advanced they are, and I have been openly fighting with Iranian officials to allow them to show it. We should show what we have. If you understand what we call, quick plasma energy release, it is horrendous what our brains can do with ourselves, you don't need a system, you can do it with the body of the man. This is the first time we see waves in motion and they can be seen in a very beautiful way. It's the first time we are actually able to see plasmatic field flows. This is what was used 3 weeks ago in Iraq. If you are caught inside it you can't see anything, you become totally blind. It's a physical, field barrier. This is a plasmatic field, and you can create a pulse of it, and it works. If you look outside of the cloud you don't see anything, but within the cloud you see the compression of the fields in different stages and how it manifests itself. This is what the Americans couldn't get through. You can rapidly send it to cover a much bigger space. The cloud has circles in its cell structure and this allows us to see it. In our work we have to start becoming more aware of the energy rather than the matter state, and this will open up a new dimension in the world of our own understanding of our own creation and many created things. For the first time you see how the MG fields of a plasma are used. What you see in the video as lines, are plasmatic fields floating continuously from the central plasmatic reactor. It can cover kilometers and there will be no communication because there are layers of it. The reason you only see it in the clouds and not in the blue sky, is because it shows the compression of it as a plasmatic field, the space gap between the lines doesn't allow anything to penetrate it. This is very much what we saw on the Caribbean Island when the hurricane destroyed everything around the house and left the house untouched. If you look at the space gap between them, they can change it in a compression way of the plasma, so that nothing can penetrate. You can throw as many missiles as you want, it just takes them out. And even if they come at a higher speed, it does the same. At a lower speed it changes them to Nano coating. So it's an impenetrable situation. This is one of the biggest achievements of the Iranian defense technology. This will enforce world peace. Instead of keeping it as a continuous dome, they created a pulse dome and they decide on the strength of the pulse. It creates a total barrier and this is how I told you that we captured the American drones. The new weapons technology is obsolete. As I said,

now that we saw the Senate's situation yesterday, he managed to get himself off the hook, because they have nobody else. If they vote him out, who are they going to put as the president next time around? He is the only one they have. He will become arrogant and start talking big again, but the limitations will be decided very soon by the others, this, what I call the barking.

The Process of Creation is the Same throughout the Universe:

Q: Before when you showed us about the black hole, you used 3 protons, which were not balanced, and in not being balanced were, basically rotating. And there were 3 electrons outside that were trying to match with these protons, so they were creating 2 rotations, and also massive G fields, and which is the same as the black hole. But then the talk was about Deuterium, which has only 1N, 1P, and 1E. I can't understand where the third proton came from?

K- Yes, but this is what happens in the womb of the mother. You have an egg and a sperm and they come together, the third energy comes from the interaction of these two. This action has caused an imbalance, because this new cell wants to feed itself, so it takes energy and divides into two more cells. This is how nature works. In other words, when the original two cells try to come together, if they are of the same strength, then they will create a common denominator shell of energy, this is the third cell. But this shell is too weak to feed itself, because the original two cells are in a strength that he cannot match. So he ends up taking the energy from the womb of the mother to make the division. And now it becomes four cells. This is how the division works. When these divisions go on to the point of multiplying by several billions, it then decides that it has too much energy. It doesn't want to have so much, so what is it going to do. Then one of the cells positions itself to get rid of the energy, because that's the way he finds his position, and then it becomes a kidney. This is the natural process of the physical body to create a disposable unit, storage unit, recycling unit, and one central control unit. It's the same everywhere in the universe. If I take you to Mars or to planet Zeus. it's the same as it is here on Earth.

You Create a Soul in One Cup

Q: Is it the same as what happens in the One Cup One Life?

K- Exactly, for the first time man creates a soul. You are used to having a baby in your hands and calling it your creation. Now I gave you a Cup, and with it you created a life, you created a soul. You are used to seeing physical life within a womb of the mother, but I gave you a life in a cup, and that's why it's called One Cup One Life. And I said, it saves a life, and you haven't understood exactly what it means. I tried to explain this in the teachings of the past few days. This Cup feeds your soul, because it has a surplus energy of continuously creating. That is why you can overcome any disease or virus, because a virus is energy dependent. I have given you the chance to see the creation of a soul with your own hands. This soul feeds and elevates your own soul, and through that elevation, allows you to overcome any other energy which is attaching itself to you, whether you call it a virus, genetic, or whatever else. The beauty of my knowledge is that I know so much, that I can make it so simple, that even an infant can understand, and that infant is man himself.

Mr. Keshe says, "I never finish teaching, it is nice to share."

Plasma Patterns in the Periodic Table:

He explains the plasma patterns in the table, which was given early on in the teachings. See the transcription. ... In the plasma state, you get to Fe which is 56, then you come into the isotopes of Ca. In these points you see the interactions and bindings, and the creation of Fe, and its connection with hemoglobin and the other things.

Why Ca Bones are formed to the Heartbeat of this Planet:

K- Why does Ca become solid in the body of the man, and why does it stay behind when we die? Why doesn't our muscles or heart get left behind? Man hasn't solved this mystery yet. Go back to the teachings, C6 is a physical matter that we see. But in a different dimension, it is a diamond, and in a different environmental condition it becomes an odor. Now the strangest thing happens to Ca at a given strength, it sits within the heartbeat of the earth, which has a frequency of about 7.5. If you go by multiples of the C, which is 6 and times it by the frequency of the earth, 7.5 then comes to about 42 to 45. That is in the range of Fe, and then you see that Ca becomes bone in the man. It's just happens to be that way. The structure of the physicality to solidify, has to do with the heartbeat of the earth, which converts it. As you saw those waves of plasmatic fields going through the clouds, earlier, that is exactly the same as what it does in this case. It's the earth's frequency which dictates the C and nearest to its combination, which is the Ca in the matter state, which also confirms and converts into matter state, and it becomes bone. If you take away that frequency, you'll have no bone structure. This is why astronauts loose weight in the space, because that frequency is lower and weaker in strength. Man in deep space will have no physicality, it would just become a gel, and that's why he has to rely on his soul. It's the heartbeat of the earth that dictates the Ca manifestation. But not all Ca can become bone, this is a specific type of Ca which carries a specific field interaction of the Fe, and it allows the Ca to be converted into the solid state. That is why in the creation of every cell of Amino Acid you have 1 Ca as a seed, without it, you don't have life. We even find the field strength of Ca in hemoglobin. Those of you who create Gans's should have noticed that by now. There is a specific salt content conversion, which leads to creation of hemoglobin and certain combinations of it leads to the solid state of the physicality. The creation of man on this planet came about all because of this. Certain combinations together with the frequency from the earth lead to solidification in a plasmatic condition of Ca. It was very much accidentally. At the same time, the same thing happened with the protein coming in and they linked up with the hemoglobin, and that became the beginning of the structure of life. A freak of accident of the creation.

The physicians will see in the new systems to come, that I can create man with bone, a brain, and muscle, because we know the secret. In the majority of the time, when the heartbeat of the man reaches a fraction of the multiplication of the heartbeat of the planet, man dies. It releases the soul.

The Creation of Life:

The creation of life is the same wherever you go in the universe, if you understand it. If you have the right salinity, the right protein, the right condition of the field strength

vibration between the Ca and the waters of the ocean and the Fe, as it brings that field strength through the hemoglobin, it is inevitable to create Ca bones. There is no other choice, and then that structure tries to find out how he can build it at the level of the body of the man, the fish, or whatever, and according to the salt and the position, it manifests itself. The creation of life is so simple. I can make a man while you are watching it, you don't need a test tube. It's just what soul do you want to put in it. I showed to Mark in Barletta when I started teaching how to create brain. If you understand this, you give me a skull, and I'll give you the man. You give me the skull of Christ, I'll give you the man as Christ, but go and find his real physicality. It's so simple, it's done everyday in the oceans of this planet, it can't be that difficult, it's just that we never understood it up to now. It's like making spaghetti with the Italians, the length and the thickness goes with a specific sauce for a specific taste. If you change the spaghetti size it won't match the sauce. It's the same here, you have to have everything right in the oceans, and if you understand it, you can create life. I can create you as many life's as you like, with or without bone, or use Mg or even C as bone. When you go to any position in the universe, then according to the conditions there, you create the life to fit those conditions. It comes from the heartbeat of the center of the plasma of the planet, and nothing else. It's like a whip cream, you select the speed and how thick you want it to get. It's very simple. Now maybe today you understood the secret of your creation.

Q: Alzar asks yet another question about colors...

K- You see the problem with you Alzar is you are trying to confirm your own existence continuously, but you don't enjoy the existence you have, because if you do, you will reach your soul. Chasing it to confirm it, has become the biggest problem for you. You go anywhere to find it, but it is within you, but you don't realize it. Color, noise, different temples, materials to take or swim in, or whatever. Look within you will find the soul. The brother says, I hope she listens.

Q: But there is a problem here, the connection of the Fe which made the blood and caused man to start killing all the entities. K- Yes, because we connected that same life and its blood, with the hemoglobin, and we kill for that existence. We don't eat the bone and leave the flesh, we go for the hemoglobin and its conversions which are added to the Cu or Zn or whatever. If we understand this, man and animals will stop killing. This is why we introduced the creation of ZnO and CuO, was to elevate the soul of the totality. You'll understand very soon, what we are playing at and with.

Q: I noticed you didn't mention CH₃, because it takes care of the physicality and emotion, of the connection of the Cu and Zn?

K- Yes, but what is a CH₃, it's 15 isn't it (C=12. H=1), if you put 4 of the CH₃ in a structure what do you get? Cu (?60). The CH₃ is not only 15, sometimes it's a higher energy of 16, of the C energy (Cu and Zn), and now you understand why man uses CH₃ as sugar, because it's a combination of feeder. My students, you are so ignorant of your own creation, that is the problem.

Q: If you add one more thing to the CH₃ then we don't need to eat, and I think I found it?

K- No, no, that's not it. If you find a link to CH₃, it's different, then adding.

Q: If you take all the food we crave for and like and we take the energy of them and add that to the CH₃, then the emotion and texture of the food and all these things are solved too. K- Good morning!

Now you understand what I mean when I say, when you go into the Enhancement Unit (EU) it will feed you, repair you, and fly you, it does everything you can imagine.

Q: I think we can also create the One Cup by using several individual Gans's, if it is right can you give us the percentage of each of them. Personally I think I can do it with my soul, is that right?

K- Maybe, if I can answer you. In the past there was a time when the knowledge of the man had matured and reached to the stage we are trying to take you to now, but this time we are doing it collectively.

Creation through the Fields:

In response to your question, you put together the Cu, Zn, water and the salt and you created a soul, now if you understood that and what we just discussed today, do you need the Cup, salt, Cu, Zn, to create the soul? Or you can use the salt and Cu and Zn as a field of the universe and create that soul in the palm of your hand for the man to hold. If any of you can achieve this, then hasn't that become the Adam and Eve? And if you go one step further, hasn't that become the Creator and the man? Do you need the physicality to confirm the existence of the soul, or can you create that soul, in the dimension of physicality. Then the truth comes, has there ever been a Virgin Birth? Or does the virgin purity come from the purity of the STM, in understanding the level of his own creation, not the physicality of the birth of the virgin?

It's like what I said about the Chinese Fire Dragon, or burning bush with Moses. You have to understand the essence, not the myth put around it to cover it, so that you'll never see or understand it. Then it comes, if I have created this soul, do I want it to be me, or an image of me, or did I create it that I can confirm that I can love, I can nourish, and I can protect. Then it comes to the point of, when I have such a love, and I want to give it to somebody else, to another soul, then would that soul have same level of giving, so that between us we could create, by the interaction of our two souls, a child of the soul. This is how life started. The physical life never started in the dimension of intercourse. The life in the universe started through the interaction of the fields in the dimension of the plasma, and not through matter. Now you understand the secret of creation. You need to have a salt. Look at this planet, salt flows everywhere in the shape of a cloud, so this planet itself is like the Cup, and the materials created in the upper atmosphere falls down to the earth, so there you have the Zn and the Cu. You already live within that Cup, now all you need to do is to put a soul in it.

Travelers of the Universe bring Souls with them:

When we travel the universe we bring with us the souls we love from other dimensions. It's like when you go from London to Turkey, what do you do, you call your lover or your girlfriend, and say, come over it is nice here, we can be together, and she comes over. Then what you do is so nice, an accident happens, you put too much love in it, and then there comes another young soul. It's the same for us passengers of the universe, we carry a matching soul with us. We have been in love, long before we understood the love of man. Then what happens is, you bring your lover home, you give it a physicality to love and to create new lives or offspring's. As we say, 'hello my friend, we meet after a

long time.' When you go to the airport and you welcome your lover, what is it? It's the same love, but now you have brought it to be with you. If she is a doctor or a princess it doesn't make any difference, when she arrives she is a lover, and carries the knowledge which comes with the physicality of the man in the dimension of the soul. Man has got a lot to learn, and man misunderstands it due to the lack of his own knowledge. I think today we opened a new dimension for many of you to understand what is to come, and how the end of kingship and leadership is about to come to an end. When you try to rot it from outside, then somebody has done something, but when it rots from inside there is no enemy. This time everything is rotting from inside, because the feelings of peace have to fire.

Questions making One Cup:

Question is about changing the conditions in the Cup and he said, it's for you to decide what you want to create, you are the creator of it.

The color of the Gans varies from yellow, brown, blue, some without blue or just a shade of it. People are afraid that there isn't Cu in it, but they are all strengthened in conjunction with the Cu you put in, so it depends on the strength which is added, or what it is. Then if you leave it aside, after awhile they all go green or blue as they have more plasmatic interaction between the fields of the Gans and the M field of the earth.

Some of the materials created in the combinations are Gans as an energy, and these you can't even attain it in theoretical physics. I can. But as an energy they exist, then as they give their energy to become balanced with the atmospheric condition they become green.

Tehran Conference:

If we bring all the religious leaders together at the Tehran conference, we'll then have all the physical and soul leaders in one room to decide the future of mankind. And as Messengers we are present there to support to bring the change.

The Americans played their biggest card with the virus, but now that has been disarmed. They tested it on the Chinese and they have plans to use it on Iran. We have again unfolded the terrorist activities of a nation. But in Iran we are ready, able, and we'll face it. But the thing is, sometimes these experiments go wrong and turns back on its creators, like the missile that went back to the sender. When the virus changes to American blood, I hope they can take it. This is the biggest game they started and they have already lost at the start. They became so desperate to win, that in that desperation they shot themselves, literally in the brain.

International SEPAH:

One of my biggest wishes is that the International Sepah will be established in the Tehran conference, and collectively the world leaders will put control on the arms and prevent them from crossing any borders. We'll see extreme opposition from the Americans, but we have systems to cover this point, as we have foreseen it. It's very simple, do you want to be a human, or do you want to be an American. Do you want to be a man or a murderer. The American nation has to decide how the humanity looks at them, because

they never stood still or try to understand how they're looked at from outside by the rest of the world. Instead they believed all the fallacies that they have been told. We'll bring the Americans to understand about themselves, then their leaders have to follow. It's time for a woman to lead the nation into peace. We support that motion head.
